	The scheme may also invest upto 75% of the portfolio (i.e. net assets including cash) in su derivative instruments as may be introduced from time to time subject to framework specified SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted und SEBI Regulations. Under normal circumstances this scheme shall not have an exposure of more than 25% of its assets in foreign securities. However, the AMC with a view to protecting the interests of investors, may increase exposure in foreign securities as deemed fit from time to time. In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1990 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in unit of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF			

	Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.
	However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.
	Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.
	As per SEBI Circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/152 dated September 06, 2023, for calculation of asset allocation limits of the Scheme in terms of Part IV of Chapter 2 on 'Categorization and Rationalization of Mutual Fund Schemes' of Master Circular for Mutual Funds dated May 19, 2023, investment in units of CDMDF shall be excluded from base of net assets.
	<b>Change in Asset Allocation</b> In the event of deviations from asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Fund Manager will carry out rebalancing within 30 business days in terms of para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023. Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of scheme is not rebalanced within the extended timelines, AMCs shall not be permitted to launch any new scheme and exit load shall not be levied to the investors exiting the Scheme, till the time the portfolio is rebalanced.
	Further, in terms of para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the AMC shall report the deviation to the Trustees at each stage. In case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of Scheme, the AMC shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced. Subsequently, the AMC shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced. Additionally, the AMC shall disclose the deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.
Investment Strategy	As the Scheme is an income scheme, the investment strategy will reflect the relatively conservative character of the portfolio. The fixed income investment strategy would emphasize investment in instruments that generate consistently superior yields at low levels of risk. Rigorous indepth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out by ABSLAMC's research team. In addition, criteria such as sound corporate managements, prospects of good future growth and strong past performance will be considered. Essentially, the focus would be on long term fundamentally driven values. However, short term opportunities would also be seized, provided they are supported by underlying values.
	<b>Portfolio Turnover</b> The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate.
	The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is frequently used by portfolio managers who use an immunization strategy.
	Macaulay duration can be calculated:
	MacaulayDuration = $\frac{\sum_{t=1}^{n} \frac{t * C}{(1 + y)^{t}} + \frac{n * M}{(1 + y)^{n}}}{Current Bond Price}$

	Where:
	<ul> <li>t = respective time period</li> <li>C = periodic coupon payment</li> <li>y = periodic yield</li> <li>n = total number of periods</li> <li>M = maturity value</li> <li>Current Bond Price = Present value of cash flows</li> </ul> The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond.
	<b>Factors Affecting Duration</b> A bond's price, maturity, coupon and yield to maturity all factor into the calculation of duration. All else equal, as maturity increases, duration increases. As a bond's coupon increases, its duration decreases. As interest rates increase, duration decreases and the bond's sensitivity to further interest rate increases goes down. Also, sinking fund in place, a scheduled prepayment before maturity and call provisions lower a bond's durations
