There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk or mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. 	In the event of deviations from asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Fund Manager will carry out rebalancing within 30 business days in terms of para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023. Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. Investment Strategy	Aditya Birla Sun Life Focused Fund is designed for those investors who seek exposure to multi capitalization stocks with Growth at Reasonable Price (GARP) style of investing. The Scheme would adopt top-down and bottom-up approach of investing and will aim at being diversified across various industries and / or sectors and/ or market capitalization. The investment emphasis of the scheme would be on investing in a maximum of 30 companies with sound corporate managements and prospects of good future growth. The Fund's focus shall be on the companies driven by long-term fundamentals though not limited to it. The Scheme may also invest in ADR/GDR and equities of listed overseas companies. These investments will be made in line with the RBI and SEBI guidelines and will be within the limits prescribed by SEBI/ RBI from time to time.
	Stock Selection Strategy The Fund will select stocks from within the investment universe based on its internal analysis based on the following criteria:
	• Visionary & Trustworthy management with Established Track record: The scheme may invest in companies with a reasonably long and established track record of good corporate governance. The management's attitude towards minority stake owners and transparency in terms of information dissemination would be considered as an important criterion for stock selection.
	 Nature and Stability of businesses: The companies considered for investments are likely to have established business and significant presence in the areas and sectors of their operations.
	• Prospects for future growth and scalability: The scheme may invest in companies which have above average growth prospects. Besides, companies considered would be those whose business models are scalable along with the growth in Indian economy and sector growth prospects in which it operates.
	• Financial discipline and returns as measured by ratios like Return on Investment (ROI) and Return on Equity (ROE): The scheme would try and target companies with above average financial performance and those with demonstrated higher efficiency in use of capital, measured in terms of ROE and ROI, as compared to Industry peers.
	 Valuations in relations to broad market and expected growth in earnings:

	 The Scheme would seek to invest in companies with valuations cheaper on a growth-adjusted basis in comparison to the broad market indices and the benchmark index. In other words, the future earnings growth expectations would be an important criterion for selection and those companies with cheaper valuations adjusted to earnings growth may be considered. The analysis process would cover review of external and internal research, external database, management reviews, etc. The investment emphasis of the scheme will be in identifying companies with a strong competitive position in good business and having quality management. While constructing the portfolio, the following norms will be kept in mind: Liquidity: Adequate care will be taken to ensure liquidity of the portfolio. Exposure norms: The AMC may from time to time prescribe internal norms on maximum exposure to particular sectors and industries. Concentration: Within the universe, the fund manager will follow 'controlled diversification'. Care would be taken to avoid over- diversification. Asset Allocation: The scheme will follow a strategy of bottom-up stock picking. However, this would be reviewed at periodic intervals from risk control point of view.
Risk Profile of the Scheme	Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below: Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), risks associated with Writing of Covered Call Options. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of IDCWs and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. IDCW payouts will be entirely at the discretion of the Trustee. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units. Please refer to SID for detailed scheme specific risk factors.
Risk Control	Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. The overall portfolio structuring would aim at controlling risks at a moderate level. Both very aggressive and very defensive postures would be avoided. Stock specific risk will be minimised by investing only in those companies that have been thoroughly evaluated by ABSLAMC's investment team. Risk will also be managed through broad diversification of portfolio within the framework of the abovementioned investment objectives. Macroeconomic risk will be addressed through focus and ongoing review of relevant businesses and economic environment. Liquidity would be an important consideration of investment decisions, due to potential of large redemptions inherent in an open ended scheme. As a result, a reasonable portion of the portfolio will be invested in liquid counters. The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by RBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.
Plans/Options	 The Scheme will have Regular Plan and Direct Plan** with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form. Each of the above (Regular and Direct) Plan under the scheme will have the following Options: (1) Growth Option and (2) IDCW Option (Payout / Reinvestment / Sweep Facility)^
