The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum, subject to compliance with provision 3.6.3.1 of SEBI Master Circular on Mutual Funds dated May 19, 2023.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

Investment Strategy

The scheme will be managed passively with investments in stocks in a proportion that is as close as possible to the weightage of these stocks in the Nifty Bank Index. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections / redemptions in the scheme. Since the scheme is an exchange traded fund, the scheme will only invest in the security constituting the underlying index. However, due to corporate action in companies comprising of the index, the scheme may be allocated/allotted securities which are not part of the index. Rebalancing of the scheme shall also be carried out whenever there is a change in the underlying index or any change due to corporate action with respect to the constituents of the underlying index within 7 days. The Scheme may also invest in cash and debt/ money market instruments, in compliance with Regulations to meet liquidity and expense requirements.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors including Risk associated with Securities Lending and Borrowing are summarized below:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investing in companies forming part of Nifty Bank Index, liquidity risk, regulatory risk, passive management of investments, lack of active market ,tracking error, redemption risk, investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments). Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objective will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for detailed scheme specific risk factors.

Risk Control Strategies

The Scheme is passively managed and linked to the Nifty Bank Index, which is well-diversified index comprised of the most liquid and large capitalised Indian Banking stocks. The Mutual Fund has built adequate internal risk management controls and safeguards including ongoing oversight to ensure that the Scheme, which is passively managed is in line with the defined investment objectives as per the Scheme Information Document and in compliance with SEBI (MF) Regulations. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

TRACKING ERROR

While the objective of the Scheme is to closely track the index, the performance may not be commensurate with the performance of the underlying Index on any given day or over any given period. Such variations are commonly referred to as the tracking error.

Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty Bank Index or one or more securities covered by / included in the Nifty Bank Index and may arise from a variety of factors including but not limited to:

- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and
 realisation of sale proceeds and / or the registration of any securities transferred and / or any delays in
 receiving cash dividends and resulting delays in reinvesting them.
- The Nifty Bank Index reflects the prices of securities at close of business hours. However, the Fund
 may buy or sell the securities at different points of time during the trading session at the then prevailing
 prices which may not correspond to the closing prices on the NSE.
- The constituent stocks of the underlying index may be revised periodically by either excluding or
 including new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the
 available investment/ disinvestment opportunities may not permit precise mirroring of the underlying
 index in a short period of time.
- The charging of expenses to the scheme including investment management fees and custodian fees.
- The potential for trades to fail, which may result the Schemes not having acquired shares at a price necessary to track the index.
- The holding of a cash position and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, etc.

AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.
