Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.

- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Silver ETF is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS FOR ADITYA BIRLA SUN LIFE SILVER ETF:

Some of the scheme specific risk factors are included as below but are not limited to the following:

- **Liquidity Risk:** Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.

The Mutual Fund scheme has to sell silver only to bullion bankers/ traders who are authorized to buy silver.

Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell silver. However, the Fund may have to resort to distress sale of silver if there is no or low demand for silver to meet its cash needs of redemption or expenses.

The Lack of an Active Trading Market

Although the units are listed and traded on the exchange, there can be no guarantee that an active trading market for the units will be maintained. If you need to sell your Shares at a time when no active market for them exists, the price you receive, assuming that you are able to sell them, likely will be lower than the price you would receive if an active market did exist.

Withdrawal from Participation by Market Makers May Affect the Liquidity of Units

If one or more Authorized Participants withdraws from participation, it may become more difficult to create or redeem Creation Units, which may reduce the liquidity of the Units. Such circumstances may be more pronounced in market conditions of increased volatility. If it becomes more difficult to create or redeem Creation Units, the correlation between the price of the Units and the NAV may be affected, which may affect the trading market for the Units.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker/ Large Investor to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of silver or silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell silver against the purchase and redemption requests received.
- **Passive Management of Investments:** Scheme shall follow a passive investment strategy. The scheme's performance may be affected by the general price decline in the silver prices. The scheme shall invest in Silver regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets.
- **Active Market:** Although the scheme is proposed to be listed on exchange, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Risks associated with handling, storing and safekeeping of physical silver:** There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the Scheme's silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- **Tracking Error:** The Fund Manager may not be able to invest the entire corpus in the same proportion as in the underlying benchmark due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying benchmark and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying benchmark. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, time to reallocate the portfolio subsequent to changes in the underlying benchmark etc. ABSLAMC will endeavor to keep the tracking error as low as possible.

"Tracking Error" i.e. the annualised standard deviation of the difference in daily returns between physical silver and the NAV of Silver ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on monthly basis on the website of the AMC. Tracking Error may arise including but not limited to the following reasons: -

- a. Expenditure incurred by the fund.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents, etc.
- e. Disinvestments to meet redemptions, recurring expenses, etc.
- f. Execution of large buy / sell orders
- g. Transaction cost (including taxes and insurance premium) and recurring expenses
- h. Realisation of Unit holders' funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, for which approval of Board of AMC and Trustees shall be taken and the same shall prominently be disclosed on the website of the AMC.

Along with the disclosure of tracking error, Silver ETF schemes shall also disclose the tracking difference i.e. the difference of returns between physical silver and the Silver ETF, on the website of the AMC on monthly basis for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

- **Redemption Risk:** Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are to be listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Makers (MMs) to provide liquidity for the units of Silver ETFs in secondary market on an ongoing basis. The Market Maker (s) would offer daily two-way quote (buy and sell quotes) in the market. Further, the price received upon redemption of units may be less than the value of the silver represented by them.
- The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. Hence, the units of the scheme may trade above or below the NAV. However, given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.
- The silver price reflects the prices of silver at a point in time, which is the price at close of business day. The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of silver.
- **Market Risk:** The value of the Units relates directly to the value of the silver held by the Scheme and fluctuations in the price of silver could adversely affect investment value of the Units. The factors that may affect the price of silver, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of silver that may be imposed by RBI, trade and restrictions on import/export of silver or silver jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the silver.
- **Performance/Asset Class Risk:** The performance of the silver will have a direct bearing on the performance of the scheme. The returns from physical silver may underperform returns from any other asset class.
- **Currency Risk:** The formula for deriving the NAV of the units of the scheme is based on the imported (landed) value of the silver, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or silver will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical silver:** There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the Scheme's silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- Price volatility in Silver as a commodity will be much higher because of the industrial use of it. The commodity also goes through different business cycle according to demand situation arising from specific industries.
- Silver as a commodity is very different from Gold. While Gold is considered as the most defensive bet and has act as safe heaven to an investor the same may not be the case with silver. Gold has a separate place in Indian household and is one of the most preferred form of investing in India since ages. This may not be the case for Silver as the commodity is heavily dependent on the industrial use.
- **Counter party Risk:** There is no Exchange for physical silver in India. The Mutual Fund may have to buy or sell silver from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.

- **Operational Risks:** Silver Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Silver Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. In addition, investors should be aware that there is no assurance that silver will maintain its long-term value in terms of purchasing power. In the event that the price of silver declines, the value of investment in Units is expected to decline proportionately
- The scheme may not be able to acquire or sell the desired number of units of silver due to conditions prevailing in the market, such as, but not restricted to circuit filters on the silver ETF (if any), liquidity and volatility in silver prices
- The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.
- The NAV of the units of Silver ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of silver at based on the prescribed formula. This may lead to a condition where the NAV is too different from the domestic market price of silver. In such cases the trustees reserves the right to delay or suspend the buy/sell transactions.
- A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.
- The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.
- Governments, central banks and related institutions, own a significant portion of the aggregate world silver holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world silver prices, the price of Units of the Scheme will be adversely affected.
- Conversion of underlying physical silver into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, debt securities in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more-risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Factors Associated with Investments in Exchange Traded Commodity Derivatives:

Commodity risks

The Fund may invest in commodities markets and may therefore have investment exposure to the commodities markets and one or more sectors of the commodities markets, which may subject the Fund to greater volatility than investments in traditional securities, such as stocks and bonds. Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Fund's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Fund's shares.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may always not be available. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.

Systemic risks which may be witnessed while trading in Indian Commodities Market are Liquidity risk, Price risk in terms of volatility, Exchange Risk and counterparty risks.

- **Liquidity Risk:** While ETCs that are to be listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes of the ETC contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETC.
- **Price risk:** ETCs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCs is nascent in India hence, arbitrage can occur between the price of the physical commodity and the ETC, due to a variety of reasons such as technical issues and volatile movement in the price of the physical good. This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.
- **Settlement risk:** ETCs can be settled either through the exchange or physically. The inability to sell ETCs held in the Schemes' portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities.

If the Commodities futures position passes its last square off date or the 'Intention' is missed to be provided before the Delivery Intention period, the buyer or the seller will be allocated delivery of the commodity. Thus, there emerges a risk of holding goods in physical form at the warehouses. Though the commodity is inclusive of insurance cost, there is a small deductible in each claim which is not payable by the Insurance company.

Risks Factors Associated with Creation Of Segregated Portfolio:

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

Liquidity Risk: A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Segregated Scheme's assets. This may more importantly affect the ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few of the investments. This may impact the NAV of the segregated portfolio and could result into potential loss to the Unit holders.

Credit risk: The scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated. Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment

capability of the issuer will not be available. The issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. This may impact the NAV of the segregated portfolio and resultant loss to the Unit holders.

Listing of units: Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

B. RISK CONTROL STRATEGIES

TRACKING ERROR RISK

While the objective of the Scheme is to closely track the price of Physical Silver, the performance may not be commensurate with the Price of Silver on any given day or over any given period. Such variations are commonly referred to as the tracking error.

Tracking errors may cause the scheme to generate returns which are not in line with the performance of the underlying benchmark and may arise from a variety of factors including but not limited to:

- Any delay experienced in the purchase or sale of Silver due to:
 - Illiquidity of Silver,
 - Delay in realization of sale proceeds,
 - Creating a lot size to buy the required amount of silver.
- The charging of expenses to the scheme including investment management fees, custodian fees, taxes, levies, etc.
- The potential for trades to fail, which may result in the Scheme not having acquired silver at a price necessary to track the benchmark.
- The holding of a cash position prior to distribution and accrued expenses.
- Execution of large buy/sell orders
- The Scheme may buy or sell silver at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- Disinvestments to meet redemptions, recurring expenses etc.

AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile.

Tracking Difference: The tracking difference i.e. the annualized difference of daily returns between the index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying benchmark.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

As per provision 6.11.4.2 of para 6.4 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the provisions with respect to minimum number of investors and maximum holding for single investor are not applicable to an exchange traded fund and accordingly, these provisions shall not be applicable to Aditya Birla Sun Life Silver ETF.

D. SPECIAL CONSIDERATIONS

- Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each unitholder is advised to consult his / her own professional tax advisor.

The funds managed by these associates may acquire a substantial portion of the Scheme's Units and collectively constitute a major investment in the Scheme. - A Unitholder may invest in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unitholder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.
- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the scheme of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the scheme falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions

The valuation will take into account the credit event and the portfolio will be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV. However, in case of segregated portfolio, applicability of NAV will be as under:

1. Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
2. Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.

In case ABSLTPL does not approve the above valuation process, all subscription and redemption applications will be processed based on the NAV of total portfolio.

Disclosure requirements

Further, adequate disclosure of the segregated portfolio will also appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme. Further, the NAV of the segregated portfolio will be declared on daily basis.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc. The scheme performance required to be disclosed at various places will include the impact of creation of segregated portfolio. These disclosures regarding the segregated portfolio will be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.

However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. The legal charges related to recovery of the investments of the segregated portfolio will be charged to the segregated portfolio in proportion to the amount of recovery. However, the same will be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, will be borne by ABSLAMC. The costs related to segregated portfolio will in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the ABSLAMC puts in sincere efforts to recover the investments of the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the ABSLAMC to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of segregated portfolio will be optional and at the discretion of ABSLAMC.

To further illustrate the above, for the Scheme under reference, suppose an Investor invested Rs. 10,000/- the impact of expenses charged will be as under:

	Amount (Rs.)	Units	NAV (Rs.)
Invested on March 31, 2022 (A)	10,000.00	1,000	10.00
Value of above investment as on March 31, 2023 (post all applicable expenses) (B)	11,500	1,000	11.50
Expenses charged during the year @ 1% (assumed) (C)	100		0.10
Value of above investment as on March 31, 2023 (net of all expenses) (D) [D= B-C]	11,400	1,000	11.40
Returns (%) (post all applicable expenses) (E) [E= (B/A)-1]		15.0%	
Returns (%) (net of all applicable expenses) (F) [F= (D/A)-1]		14.0%	

Note(s):
