Investment Strategy	<p>Predominantly equity oriented Plan, the strategy aims to invest in a well-diversified portfolio of equity and equity related securities along with debt and money market instruments. The fund manager proposes to concentrate on business and economic fundamentals driven by in-depth research techniques and employing the full potential of the research team at the AMC. The stock selection process proposed to be adopted is generally a bottom-up approach seeking to identify companies with long term sustainable competitive advantage. The plan would also use a top down discipline by ensuring representation of companies from all key sectors in respective benchmarks. The Plan's investment universe shall comprise all listed and/or to be listed stocks. The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme.</p> <p>The Plan also invests in various debt securities and money market instruments issued by corporate and/or state and central government with the aim to controlling volatility and providing cash flows on a continuous basis. Rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC for its fixed income investments. In addition, the Investment Team of the AMC studies the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates.</p>
