Information

To provide you with ease while you glance through the Empower booklet, we have structured the important information in an organised way.

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is Rs 100 and the exit load is 1%, the investor will receive Rs 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Investment Outlook

Equity Investment Outlook

The most important and keenly awaited event of the month was the Union Budget. In our view, it has struck a balance between growth and fiscal prudence. There have been no big bang ideas & announcements from the government especially the negative ones that the markets were anticipating in the run up to the budget. The focus was clearly to ride the course it has chartered over the past 18 months through Make in India, Ease of doing business, Creating job opportunities, Efficient direct benefit transfer among other things.

Additionally, it has rightfully focused on supporting rural economy, agriculture and infrastructure. The allocation to MGNREGA at ₹ 38,500 crores, roads & highways (including PMGSY) at over ₹ 100,000 crores, agriculture & farmer welfare at nearly ₹ 36,000 crores are a testimony to that. Most importantly, it has stuck to the fiscal deficit target of 3.5% of GDP even at a time it could have taken liberty to miss it. Now this puts pressure on RBI to do its bit on monetary easing. The lowering of rates and focus on transmission would ease interest payouts for corporate and individuals. (Source: <http://www.unionbudget.nic.in/>)

The fiscal arithmetic which the government assumed is quite achievable. It estimates tax revenues to grow at 11.7% and expenditure by 10.8% - both with a nominal GDP growth of 11%. The expenditure assumes most of the implementation of seventh pay commission and OROP (One Rank One Pension) to be done in this fiscal. However, we should keenly watch the targets on divestment (pegged at ₹ 56,500 crores) and revenues from telecom spectrum (assumed to be ₹ 70,000 crores). These seem a little optimistic considering the market conditions. (Source: <http://www.unionbudget.nic.in/>)

To recapitalize the PSU banks, the budget has an allocation of ₹ 25,000 crores which is in line with the proposal of scheme “Indradhanush” announced last year. The Finance Minister also promised more if required. Just a day after the budget, RBI has allowed banks to revalue their assets which would increase their Tier 1 capital by over ₹ 35,000 crores. So, we are on the path to bring PSU banks back on track. (Source: *Business Standard*)

The thing that stands out in the budget is the exemption of dividend distribution tax given on the distribution of income from SPV to ReITs & InvITs. This will pave the way for the listing of these trusts and offer a new investment vehicle for retail investors. Overall, it's a well balanced budget from economy and markets point of view.

Specifically in the month of February, Indian equity markets corrected the most – 7.6% on the large cap index (NSE Nifty 50) underperforming almost all indices across the world. This was the largest monthly fall in over four years. The midcap index (NSE Midcap) has corrected by similar amount but the small index (BSE Small Cap) has corrected by 5% more. The correction got compounded by domestic concerns on what negative could come from the budget and a weak global background. The month saw the CDS spreads on one of the known banks spike up due to fear of default. There was uncertainty around the cooperation between OPEC and Russia to cut oil production. Finally as they announced a production freeze, the oil rallied 20% leading to some what of a risk-on trade. In terms of flows, the FPIs sold over USD 1,160 mn worth of shares in the cash market while the mutual funds continued their purchasing spree for 22 months in a row as they bought over ₹ 6,000 crores. (Source: *Bloomberg*)

If one were to look at India as an investment case, it provides the right recipe of 3 R's – lowering Rates & continuing Reforms to get Reflation. We are positive on the market from a medium term view and advise investors to invest in our balanced, large cap and multi cap funds.

USD: United States Dollar; GDP: Gross Domestic Product; FPI: Foreign Portfolio Investors; MGNREGA: Mahatma Gandhi National Rural Employment Guarantee Act; PMGSY: Pradhan Mantri Gram Sadak Yojana; OROP: One Rank One Pension; OPEC: Organization of Petroleum Exporting Countries; CDS: Credit Default Swaps; SPV: Special Purpose Vehicle; ReITs: Real Estate Investment Trusts; InvITs: Infrastructure Investment Trusts; PSU: Public Sector Undertaking

Investment Outlook

Debt Investment Outlook

The shortest month of the year had too many events that kept market participants on their toes. Starting with the RBI policy, which in terms of action was a non-event, but it continued to emphasize on the accommodative stance of the central bank. All eyes after this were on the union budget which adhered to fiscal discipline, bringing some cheer to the bond market.

Growth outlook

CSO released the GDP and GVA numbers for Q3FY16, the advance estimates for FY16 were also released. Real GDP grew @ 7.3% in Q3 while, GVA growth stood at 7.1%. While growth rates declined from Q2, they were better than expected as manufacturing growth shot up to 12.6% from 9% in Q2, on account of higher margins for India Inc, while the top line growth stagnated. The growth for FY16 was pegged at 7.6% in terms of GDP, marginally up from 7.2% in FY15. GVA on the other hand is expected to improve only by 20bps in FY16 @ 7.3%. (Source: CSO)

While the GDP data got some comfort with respect to economic activity, the IIP continued to be a dampener. IIP de-grew @ -1.3% in Dec-2015, though better than -3.4% print it clocked in Nov-2015. The continued double digit de-growth in capital goods component was the driver of this de-growth in the headline. (Source: Bloomberg)

The data for Jan has shown some improvement, core IP growth is up from 0.9% in Dec – 2015 to 2.9% in Jan-2016, both PMI manufacturing and Services expanded @ 51.1 and 54.3. Early signs suggest that there has been some moderation in activity in Feb as manufacturing PMI remained unchanged and services PMI expanded at a slower pace. (Source: Bloomberg) Going forward, we think that growth may be tepid at best as large gains from value add component could be behind us. Though normal monsoon and some improvement in rural demand on account of this and urban demand on account of 7th pay commission could offset this to some extent.

Inflation outlook

Contrary to market expectation of moderation, CPI inflation inched up in Jan-16 from 5.6% in Dec-15 to 5.7%. This increase was largely food led as core inflation moved a tad lower. The upward pressure on account of high pulses inflation persisted, add to this was a jump in prices of eggs and other protein items, which resulted in a 40bps increase in food inflation in Jan-16. Since then, there has been some moderation in prices of vegetables and pulses. Add to this, the return of normalcy to base is likely to result in some moderation in headline inflation in the coming months. (Source: MoSPI)

While the CPI inflation moved up on account of higher food inflation, reverse was visible in case of WPI. WPI continued to deflate @ -0.9%, down from -0.7% in Dec-15. This was on account of lower food inflation, down from 8.2% in Dec-15 to 6% in Jan-16. The persistent deflation in fuel and manufactured products, down ~10bps each in Jan also kept the headline lower. Going forward, we expect WPI to move out of the deflation trajectory in FY17 as commodity prices stabilize at lower prices, instead of plummeting, which was visible in the series throughout FY16. (Source: Bloomberg)

Fiscal front

The Union Budget 2016-17 adhered to fiscal consolidation roadmap by sticking to a fiscal deficit target of 3.5% of GDP. Also, the revised estimates suggest that FY16 fiscal deficit would be maintained at 3.9% of GDP, as budgeted. The budget saw a much needed thrust on reviving rural infra by means of investment in irrigation, rural roads, crop insurance scheme etc. While walking the tightrope in terms of pushing growth and maintaining fiscal

discipline, the Finance minister had a challenging task to provide for OROP and the award for 7th pay commission in this budget. However, through a mix of some cesses (Krishi Yojana Cess @ 0.5% on taxable services), increase in surcharge on super rich (from 12% to 15%), divestment proceeds, strategic stake sale and spectrum auctions etc, the govt was able to provide for this increase in revenue expenditure, while allowing for a 4% increase in capex in FY17. The principle of budget governance saw continued adherence to and a budgeted nominal GDP growth rate of 11% seems realistic.

As the new fiscal year unfolds, the credibility of the fiscal math would be keenly watched, especially in the backdrop of a meagre sum allocated for bank recapitalization (@ ₹ 25000 crs) in this budget, which seems small, given the size of the stressed assets problem. (Source: Ministry of finance)

External Equation

Trade deficit moderated to 7.6bn\$ in Jan-16, smartly down from 11.7bn\$ in Dec-15. This was largely on account of lower oil and gold imports. However, the continued de-growth in the non-oil, non-gold imports is an important concern with respect to overall growth outlook. While lower commodity prices have allayed CAD concerns, but this year the drying up of FII flows has been a major concern. In light of reversal of FII flows, we think that BoP surplus could be lower than earlier estimated. (Source: Bloomberg)

Portfolio positioning

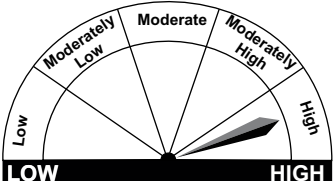

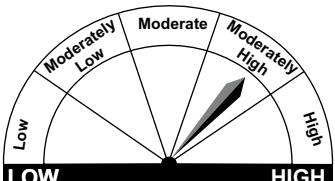

The month of February proved to be quite a volatile one with bonds being sold off steadily in the run on to the Budget. Market was in a vicious circle as sell off led to loss and which led to further selling in the markets. At one point the 10 y benchmark was higher by almost 20 bps from the month start levels. The malaise in the bond market spread to the short end bonds with 5-9y bonds selling off the most with yields hardening up by almost 30 bps there. (Source: Bloomberg)

Market seems to be geared for one number and that was the FD announcement in the Budget which came in line with the FRBM target of 3.5. Market and economist also looked to examine the credibility of such a number and satisfied with it gave it a thumbs up with bond rallying up by around 15-20 bps on an average on that day. RBI also seemed concerned about the sell-off in G-Sec markets without any fundamental basis and looked to announce an OMO couple of days before budget and followed it up with another OMO announcement on 3rd March. Govt and RBI made a concerted effort to arrest the slide in yields by doing a debt switch with RBI and also doing near end bonds buyback to ease pressure. (Source: Bloomberg)

We remain constructive on rates due to our prognosis of lower inflation, headwinds to local growth and uncertainty over global growth providing disinflationary pressure to our economy. The actions of both RBI and Govt as they sought to calm the debt markets and tried to arrest the hardening in yields will in our opinion provide a ceiling on yields in absence of any change in fundamentals. Thus we would suggest investors to stay put in duration.

GDP : Gross domestic Product, GVA: Gross Value Add, CSO: Centre for statistical Organisation, IIP: Index of Industrial Production, PMI: Purchasing Manager's Index, CPI: Consumer Price Index, WPI: Wholesale Price Index, MoSPI: Ministry of Statistics and Program Implementation, CAD: Current Account Deficit, FD: Fiscal Deficit, OMO: Open Market Operation, FRBM: Fiscal Responsibility and Budgetary Management, OROP: One Rank One Pension, FII: Foreign Institutional Investor, BoP: Balance of Payment

Schemes

It is our constant endeavour to only offer you schemes that best suit your needs, thus we have classified our schemes under four broad solutions.

Wealth Creation Solutions

What are Wealth Creation Solutions?

Our Wealth Creation Solutions aim to grow your money through equity/gold investments and are available in a range of conservative to aggressive options.

Who can benefit from Wealth Creation Solutions?

These solutions can be ideal for investors who are planning for future expenses, like higher education of children, marriage, buying a home etc. These solutions are available in the range of aggressive to conservative options to suit the needs of the investor.

Tax Savings Solutions

What are Tax Savings Solutions?

Our Tax Savings Solutions help to reduce your tax burden and at the same time, aim to grow your money through equity investments.

Who can benefit from Tax Savings Solutions?

Tax saving is important, especially when investors can save up to ₹ 51,912 in taxes! Section 80C of the Income Tax Act, 1961 provides options to save tax by reducing the taxable income by up to ₹ 1.5 lakh. But, wealth creation is also important. Isn't it?

That's why this solution is ideal for investors who would like to create wealth along with tax saving.

Tax savings of ₹ 51,912 is calculated assuming qualifying amount of deduction is ₹ 1.5 lakh & investor falls in the top income tax slab of 34.608% & includes applicable cess & surcharge. Investors are advised to consult their tax advisor in view of individual nature of tax benefits. Further, Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein. Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

The rates are applicable for the financial year 2015-16.

Regular Income Solutions

What are Regular Income Solutions?

Our Regular Income Solutions aim to preserve your money and provide regular income.

Who can benefit from Regular Income Solutions?

This is an ideal solutions for investors who are interested in alternative modes of regular income, either in present of after retirement stage, and have low propensity for risk. (Regular income is not assured & is subject to availability of distributable surplus.)

Savings Solutions

What are Saving Solutions?

Our Savings Solutions are aimed at preserving your money, providing you with liquidity and giving you tax-efficient returns.

Who can benefit from Saving Solutions?

This is an ideal solutions for investors who have low - medium propensity for risk and high liquidity. These can be ideal for first time investors in mutual funds.

The Financial Solution(s) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Wealth Creation Solutions

What are Wealth Creation Solutions?

Our Wealth Creation Solutions aim to grow your money through equity/gold investments and are available in a range of conservative to aggressive options.

Who can benefit from Wealth Creation Solutions?

Equity may be considered as an ideal option to give attractive long term returns and hence may be used for funding long-term needs (like child's education, buying a home etc.)

Benefits of Wealth Creation Solutions:

Tax Free Returns: No capital gains tax (on withdrawal) if you stay invested for over a year as per current tax laws. Invest in the long-term to overcome short-term ups and downs.

Risk is lowered: Mutual funds invest in many companies and funds are managed by experts; which can be considered as an alternative to direct investment in shares.

Investors are requested to consult their tax advisor before investing for individual nature of tax benefit. The Financial Solution (Wealth Creation Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above.
 For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for dividend option would assume reinvestment of tax free dividends declared at the then prevailing NAV.
 CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown.
Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Dividends are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Note: The exit load rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 / 1800-22-7000 or from any of our Investor Service Centers.

Performance for dividend option would assume reinvestment of tax free dividends declared at the then prevailing NAV.

CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown.

Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Dividends are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Note: The exit load rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 / 1800-22-7000 or from any of our Investor Service Centers.

Tax Savings Solutions

What are Tax Savings Solutions?

Our Tax Savings Solutions help to reduce your tax burden and at the same time, aim to grow your money through equity investments.

Who can benefit from Tax Savings Solutions?

Tax saving is important, especially when investors can save up to ₹ 51,912 in taxes! Section 80C of the Income Tax Act, 1961 provides options to save tax by reducing the taxable income by up to ₹ 1.5 lakh.

But, wealth creation is also important. Isn't it?

That's why this solution is ideal for investors who would like to create wealth along with tax saving.

Tax savings of ₹ 51,912 is calculated assuming qualifying amount of deduction is ₹ 1.5 lakh & investor falls in the top income tax slab of 34.608% & includes applicable cess & surcharge. Investors are advised to consult their tax advisor in view of individual nature of tax benefits. Further, Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein. Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

The rates are applicable for the financial year 2015-16.

Benefits of Tax Savings Solutions:

Low lock-in period: Your money is locked-in for just 3 years, as against the much longer lock-in periods in other options.

Potential to earn dividends: While your money is locked-in for 3 years, you may opt for the dividend option and can receive returns in the form of tax-free dividends during this time. This feature is unique only to tax saving solutions from mutual funds.

Earn market linked returns: Since investments are made in stocks of Indian companies, the value of your investment moves with the stock market. Although it comes with market related risks, your money is diversified i.e. spread out across stocks of multiple companies and is being monitored by an investment expert with an aim to minimize such risks.

Tax-free returns: When you withdraw your investment after 3 years, the returns are totally tax free. Yes, you save taxes on both, your initial investment and also on the returns.

Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits.

The Financial Solution (Savings Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Regular Income Solutions

What are Regular Income Solutions?

Our Regular Income Solutions aim to preserve your money and provide regular income.

Who can benefit from Regular Income Solutions?

This is an ideal solution for investors who are interested in alternative modes of regular income, either in present or after retirement stage, and have low propensity for risk.

(Regular income is not assured & is subject to availability of distributable surplus.)

Benefits of Regular Income Solutions:

They aim to preserve your money & provide regular income: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively safe in order to generate regular income for you.

They aim to fight Inflation: A small part is invested in equity i.e. stocks of Indian companies to help you stay ahead of inflation.

Tax-efficient Returns: You may opt for a monthly dividend option where, in addition to the growth of your invested amount, a portion of the same comes to you as monthly income which is given in the form of dividends. These dividends are completely tax-free in your hands!

A dividend distribution tax of 28.325% is applicable and is deducted by the fund house.

The DDT rate of 28.325% is effective June 01, 2013 and further, upto May 31, 2013 DDT rate applicable shall be 14.1625% as amended by Finance Bill/Act 2013.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits

Wherever mentioned, Regular Income / Second Income / Monthly Dividend is not assured and is subject to availability of distributable surplus. The Financial Solution (Regular Income Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Birla Sun Life Monthly Income

(An open-ended income scheme. Monthly income is not assured and is subject to availability of distributable surplus.)

Regular Income Solutions

What is it?

A fund that seeks to provide you regular income with an opportunity to grow your money through fixed income investments and a limited exposure to the equity markets.

Savings Solutions

What are Saving Solutions?

Our Savings Solutions are aimed at preserving your money, providing you with liquidity and giving you tax - efficient returns.

Who can benefit from Saving Solutions?

This is an ideal solution for investors who have low - medium propensity for risk and high liquidity. These can be ideal for first time investors in mutual funds.

Benefits of Savings Solutions:

Make Inflation work in your favour: Inflation affects your returns from any investment including mutual funds. But, in case of savings solutions, you can use it to your advantage - through indexation - which can help you reduce the amount on which you have to pay tax. You can benefit from indexation, if investing for more than 1 year. Please consult your tax advisor on how to take advantage of indexation.

Aim to preserve your money: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively safe.

Aim to provide Liquidity: If you need to withdraw your money, all you have to do is submit a redemption slip and your money is normally credited to your bank account within one working day. You may also opt for an online redemption facility offered by many fund houses for added convenience.

Tax-efficient returns: You can earn returns in the form of monthly / quarterly dividends etc. which are completely tax-free in your hands. A dividend distribution tax of 28.325% is applicable and is deducted by the fund house.

There are various savings solutions available depending on the time period that you would like to invest for: a. 1 day to 3 months b. 3 to 6 months c. 6 months to 1 year d. 1 year +

The DDT rate of 28.325% is effective June 01, 2013 and further, upto May 31, 2013 DDT rate applicable shall be 14.1625% as amended by Finance Bill/Act 2013.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits

The Financial Solution (Savings Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns. stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

What is it?

A fund that aims to provide the convenience of a savings account with the opportunity to earn higher post-tax returns. (Investors are advised to consult their tax advisor in view of individual nature of tax benefits.)

Investment Objective

WEALTH CREATION SOLUTIONS

Birla Sun Life Balanced '95 Fund	An Open ended Balanced Scheme with the objective to generate long term growth of capital and current income, through a portfolio with a target allocation of 60% equity and 40% debt and money market securities. The secondary objective is income generation and distribution of dividend.
Birla Sun Life Frontline Equity Fund	An Open-ended growth scheme with the objective of long term growth of capital, through a portfolio with a target allocation of 100% equity by aiming at being as diversified across various industries and or sectors as its chosen benchmark index, S&P BSE 200.
Birla Sun Life Top 100 Fund	An Open-ended growth scheme with the objective to provide medium to long term capital appreciation, by investing predominantly in a diversified portfolio of equity and equity related securities of top 100 companies as measured by market capitalization.
Birla Sun Life Equity Fund	An Open-ended growth scheme with the objective of long term growth of capital, through a portfolio with a target allocation of 90% equity and 10% debt and money market securities.
Birla Sun Life MNC Fund	An Open-ended growth scheme with the objective to achieve long-term growth of capital at relatively moderate levels of risk by making investments in securities of multi-national companies through a research based investment approach.
Birla Sun Life Dividend Yield Plus	An Open-ended growth scheme with the objective to provide capital growth and income by investing primarily in a well-diversified portfolio of dividend paying companies that have a relatively high dividend yield.
Birla Sun Life Midcap Fund	An Open ended Growth Scheme with the objective to achieve long term growth of capital at controlled level of risk by investing primarily in 'Mid-Cap' Stocks. The level of risk is somewhat higher than a fund focused on large and liquid stocks. Concomitantly, the aim is to generate higher returns than a fund focused on large and liquid stocks.
Birla Sun Life Small & Midcap Fund	An Open ended Small and Mid Cap Equity Scheme with an objective to generate consistent long-term capital appreciation by investing predominantly in equity and equity related securities of companies considered to be small and midcap. The Scheme may also invest a certain portion of its corpus in fixed income securities including money market instruments, in order to meet liquidity requirements from time to time.
Birla Sun Life Advantage Fund	An Open-ended growth scheme with the objective to achieve long-term growth of capital at relatively moderate levels of risk through a diversified research based investment approach.
Birla Sun Life India GenNext Fund	An Open-ended growth scheme with the objective to target growth of capital by investing in equity/equity related instruments of companies that are expected to benefit from the rising consumption patterns in India, which in turn is getting fuelled by high disposable incomes of the young generation (Generation Next). The scheme will invest in companies that have the following characteristics: 1. Companies that seek growth in revenues arising out of demand from the younger generation (GenNext) for their products or services. 2. They should be engaged in manufacturing of products or rendering of services that go directly to the consumer. 3. The products and services should have distinct brand identity, thereby enabling choice.
Birla Sun Life Banking and Financial Services Fund	The primary investment objective of the Scheme is to generate long-term capital appreciation to unit holders from a portfolio that is invested predominantly in equity and equity related securities of companies engaged in banking and financial services. The Scheme does not guarantee/indicate any returns. There can be no assurance that the schemes' objectives will be achieved
Birla Sun Life Infrastructure Fund	An Open-ended growth scheme with the objective to providing for medium to long-term capital appreciation by investing predominantly in a diversified portfolio of equity and equity related securities of companies that are participating in the growth and development of Infrastructure in India.
Birla Sun Life Pure Value Fund	An Open ended Diversified Equity Scheme with the objective to generate consistent long-term capital appreciation by investing predominantly in equity and equity related securities by following value investing strategy.
Birla Sun Life India Reforms Fund	An Open ended Equity Scheme with an investment objective is to generate growth and capital appreciation by building a portfolio of companies that are expected to benefit from the economic reforms, PSU divestment and increased government spending.
Birla Sun Life New Millennium Fund	A multi-sector open-ended growth scheme with the objective of long term growth of capital, through a portfolio with a target allocation of 100% equity, focusing on investing in technology and technology dependent companies, hardware, peripherals and components, software, telecom, media, internet and e-commerce and other technology enabled companies. The secondary objective is income generation and distribution of dividend.
Birla Sun Life India Opportunities Fund	An Open ended Growth Scheme with the objective to achieve superior long-term growth of capital by investing in shares of companies that do one or more of the following: 1. Leverage India's intellectual capital for providing services, research and creative inputs. 2.
