Budget analysis inside (Refer Pg. No. IV)

Mr. A Balasubramanian
Chief Executive Officer

Let me begin by saying that Union Budget presented by the Finance Minister on 1st February 2017 is a unique budget compared to the budgets presented all these years. First time ever the country witnessed Railway Budget getting abolished and getting integrated with the Union Budget. Second, post the swap of high denomination notes such as ₹ 500 and ₹ 1000, lots of expectations got built for the budget sops.

Frankly, Capital market players were afraid of the Long Term capital tax being removed for equity investing, Estate tax would be levied and so on so forth but surprisingly none of such expectations were presented in the budget. Hence, market assumed that NO BAD news is A GOOD News. Therefore, we saw a pullback in the market on the day of budget and subsequent period.

Overall budget provisions were more or less in sync with the stated objective of the Government to move from Reform to Transform and create Clean India. Clean India is being extended to taxation post the Demonetization exercise. Tax reforms have been the primary focus in this budget apart from focusing on driving the growth through Government spending. Government spending is more focused towards sectors that not only create growth for the economy but generates employment as well. Capital allocations towards

Road and Railways, the two high capital consuming sectors, have been in line with expectation.

While doing so, increase in MNREGA allocation indicates Government focus in building rural India through the agriculture sector. The budget emphasized more on large pool of Medium Small Scale enterprises by cutting their tax payout to 25% as against their current tax rate of 30% plus. We also expected some incentives and initiatives that would come to kick start Affordable housing project in India, in order to drive the economy as well as provide employment. In totality, the budget can be termed as pro-growth and outcome oriented budget.

Contrary to the widespread belief that Government would shoot up on the fiscal balance to stimulate the economy, the budget focused on optimizing revenue through tax collection and widening the tax base and while bringing in efficiency in the collection mechanism. I am confident, Digital economy focus will bring higher tax compliance and this will further get a flip once Goods and Service tax is introduced.

Contrary to the widespread belief that government would overshoot the fiscal deficit, the budget focused on optimizing revenue through tax collection and widening the tax base

To sum up, I would rate the budget more balanced budget with no major changes. However, if we add all the small changes, the impact for good will be high. Therefore, I would rate the budget at around 8 in a scale of 10. From investment point of view, one needs to look beyond budget including Global outcomes. As we saw in the year 2016, wherein lots of unexpected events happened, this year too we might witness a similar trend. Therefore, investors have to look at investing for long term both in debt and equity. Given the fact, traditional assets like Real Estate and Gold will become less attractive from the financial investors point of view.

We remain committed to serve the growing financial savings in the country and Investors at large.

The month of January was dominated with three things – What would Donald Trump do after taking over office on 20th of Jan? Would there be changes capital gains tax of equities for both domestic and FPIs? Most importantly, what would be the impact of demonetization on quarterly results?

As quarterly results started pouring in with results being better than estimates, markets started figuring out that things were not that bad and hence started to rebound supported by global markets as well. All the losses made post demonetization were recouped by the indices. The large cap index - Nifty 50 Index rose 4.6% for the month. The midcaps were back in favor with the Midcap Index (Nifty Midcap 100 Index) gaining 7.4% for the month. The small cap index (Nifty Smallcap 100 Index) outperformed its large cap & midcap peers to gain 9% for the month. (Source: Bloomberg)

In terms of flows, the FPIs sold over USD 500 mn in the first half of the month in the cash market. However, after the CBDT circular on indirect transfer issued in Dec was put in abeyance, FPIs restarted their buying and bought over USD 500 mn in the second half. Among the domestic institutions, the mutual funds bought about USD 800 mn and other DIIs were net sellers with the total tally of DIIs at USD 697 mn. (Source: Bloomberg)

On the data front, the numbers are mixed. CPI for the month of December came in at 3.4%. a decrease of 0.2% over the previous month due to benign food inflation. The Dec WPI came in at 3.9% which was 0.7% above the previous month primarily driven by global commodity prices. The IIP for Nov increased by 5.7% which was a 13 month low. After touching a three year low of 47.6 in Dec, the composite PMI expanded by 1.8 points to 49.4 in Jan which still shows contraction. (Source: Bloomberg)

We are in the midst of the earnings season which has been a mixed bag. For most companies the results seem to be above estimates and that is primarily because the earnings estimates have been reset post demonetization.

On the global policy front, the fed stayed put without any change in interest rates in the US. On the domestic side, the budget in India was historic on many fronts. The railway budget was combined with Union budget after 92 years. The plan and non plan was combined into one. It was presented on 1st of Feb instead of last day of Feb as it would allow the bills to be passed and expenditure could start right from the first day of the new financial year.

- **The Budget highlight was that the fiscal deficit contracted to 3.2% for FY18 and would be at 3% for next three years. This signals seriousness of intent to international investors and rating agencies.**
- **Markets are likely cautious due to the ongoing state elections and developments because of Trump policies.**

The budget was prudent, credible, compliance focus and bridged gaps which were present earlier. The highlight was that the fiscal deficit is contracted to 3.2% for FY18 and would be at 3% for next three years. This is positive for signaling to international investors and rating agencies that we are serious about fiscal consolidation. The growth in revenues is taken at 12.7% and expenditure at 6.6% which are both achievable. The allocations to rural, agriculture and infrastructure have been significant. (Source: FinMin website)

From equity market perspective, we have seen a sharp recovery. There are always reasons for markets to be cautious like they would be due to the ongoing state elections and developments because of Trump policies are unraveling by the day. Though the markets are trading above fair valuations, we expect the recovery in

earning in FY18 would help the markets to scale to new high going forward. Hence participation in staggered manner is suggested. Investors could consider large cap funds, multi cap funds, balanced fund and dynamic equity fund based on their risk appetite and requirement.

Thank you. Happy New Year and Happy investing!

Markets are likely cautious due to the ongoing state elections and developments because of Trump policies.

USD: United States Dollar; FPI: Foreign Portfolio Investors; DII: Domestic Institutional Investors; BSL: Birla Sunlife; WPI: Wholesale Price Index; CPI: Consumer Price Index; IIP: Index of Industrial Production; PMI: Purchasing Managers Index; FY: Fiscal Year; CBDT: Central Board of Direct Taxes

Mr. Maneesh Dangi
Co-CIO Fixed Income

The monetary policy on Feb 8th 2017 surprised markets for more reasons than one. The MPC chose to stay on hold on rates but shifted its stance from accommodative to neutral. This has made market participants believe that rate easing cycle is close to conclusion. While the status quo on rates did have its impact on yields, it was the sudden shift in stance that led to yields soaring by ~40bps. To be sure, this move happened while the RBI accepted that FY17 and FY18 GVA growth is weaker versus their previous forecasts, average CPI inflation for Q4FY17 is clearly below 5% and also FY18 CPI inflation is estimated to average at ~4.5% (within RBI's flexible inflation target). (Source: RBI)

- *MPC stance shifted from accommodative to neutral*
- *Rate easing cycle close to conclusion*
- *CPI inflation for Q4 FY17 is below 5% and FY18 estimated to average at ~4.5%*

- *Shift in stance more likely governed by global uncertainty*
- *Global market have arguably overpriced positive impact of Trumponomics*

In this backdrop, the shift in stance seems more likely governed by global uncertainty and more optimistic expectation of local growth recovery. The impact of Trump's policies in the US and its implications on global growth, inflation and bond yields were the key reasons driving the shift in stance. These can have ramifications for commodity prices and exchange rate, thus impacting the domestic inflation trajectory. We think that global markets have arguably overpriced the positive impact of Trumponomics (if at all implemented) and that is in fact visible in the

recent retracement in US treasury yields. So, while global markets are reassessing the feasibility of these radical measures, our Central bank seems to have taken the over cautious road.

On local growth, our sense is RBI has overestimated the reflationary impact of remonetisation, budget spending and soft MCLR. The fact that we have consolidated fiscally with a total expenditure of 6.6% yoy budgeted for FY18 (lower than estimated nominal GDP growth rate of 11.75%) and capital spend as a % of GDP has stagnated 1.8%. This in effect means that govt's is in fact withdrawing its participation in stepping up growth. In such a situation one could have expected RBI to fill in the gap to facilitate recovery. On the contrary, RBI chose to turn neutral in uncertain times like these. As far as the supportive role of softer MCLR is concerned, the fact that the RBI is now neutral has made market participants believe that the rate easing cycle in mostly over. This leaves banks with hardly any incentive to cut MCLR or base rate. In fact, transmission to base rate was far more muted anyway. So by announcing to be neutral, RBI has made further transmission more challenging. Thereby obstructing the anticipated recovery aided by easy financial conditions.

- *Total expenditure of 6.6% yoy budgeted for FY18 (lower than GDP growth rate of 11.75%)*
- *Capital spend as a percent of GDP stagnated at 1.8%*

From an investment standpoint, yes this move has taken us by surprise and we await more clarity before firmly changing our view. For now, the losses to the investors may stay for a couple of months but investors can stay to their position, because should the gap between our assessment of local economic conditions and global developments versus RBI's understanding bridge in our favor, the MPC may have to come about to be accommodative again. As for new investments, accrual funds offer a great alternative on a risk adjusted basis given that the markets may remain volatile in near term.

To conclude, there have been times in the past where our assessment and the understanding of policymakers have differed. We are diligently assessing our view and would remain agile enough to take actions on either side post getting reasonable clarity basis incoming data.

Healthy financial habits to follow at every age

Hi, I am Mani Bachhan and I am here to share with you the financial plan of my life. I hope it encourages you to plan your finances not just for your secure future but the future of your loved ones too.

The Smart Cub

When I was a kid, my aunt Mrs. Ameera Bachhan would give me 100 rupees.

I would immediately put 50 rupees in my piggy bank and the balance I would spend on sweets.

After a few years, I bought a bicycle for myself, thanks to my savings habit.

The New Recruit

I have just secured my first job and am earning for the first time.

I now spend my income on some of my hobbies like photography and also contribute towards house expenses.

My mother Punji Bachhan encouraged me to save 10% of my income for my future, an advice I feel every youth should follow.

The ideal Partner

I met a nice girl called Ms. Achhi and within a short time she became Mrs. Achhi Bachhan.

Since we planned to have children in the very near future,

my wife and I decided to save 35% of our income towards our future needs.

A Family Man

My wife and I had 2 kids, our boy we called Bada Bachhan and our daughter Chhoti Bachhan. Combining our household expenses with their schooling fees, it amounted up to **50%** of our incomes.

30% + 20%

Of course to keep Bada, Chhoti and the wife happy I reserved another 30% of my income for expenses like movies, shopping, etc., which left 20% for savings, which was good enough.

Mr. Four wheels

We decided to invest in a car because as a family there were a lot of birthday parties, events and outings to attend.

When buying a car we followed the **20-4-10** rule: **20%** towards our down payment, **4 years** in terms of financing and Max **10%** of our income towards our EMIs. This ensured we never felt financially constrained.

Proud Home owner

It was finally time to have a house of our own.

We calculated our current house expenses, the down payment of the loan and the interest rate of the home loan.

Once we were convinced that we could manage our expenses and savings along with the home loan, we went ahead and bought our home.

Rainy day Kit

Accidents can happen anytime and one should always be prepared.

Though I had many investments in place, I still ensured that I had 3 years' worth monetary savings towards household expenses in my emergency fund reserve.

When my wife took ill I had to take a sabbatical for over 3 months, however that didn't impact us financially, thanks to our savings.

The Golden couple

My wife and I are now enjoying our retired life.

We ensured that we had the right investment and savings, we now have at least 20 times of our annual income in the bank.

We are not worried about our living expenses or medical costs. In fact we often plan vacations and visit our children and grandchildren.

Moral of Mani Bachhan's financial story so far –

Always plan your savings first and then spend on expenses accordingly, never the other way round. This is the only way to a financially secure life.

What are Saving Solutions?

Our Savings Solutions seek to preserve your money and provide you with ready liquidity while seeking to deliver tax efficient returns

Who can benefit from Saving Solutions?

This is an ideal solution for investors who have low - medium propensity for risk and high liquidity. These can be ideal for first time investors in mutual funds.

Benefits of Savings Solutions:

Make Inflation work in your favour: Inflation affects your returns from any investment including mutual funds. But, in case of savings solutions, you can use it to your advantage - through indexation - which can help you reduce the amount on which you have to pay tax. You can benefit from indexation, if investing for more than 1 year. Please consult your tax advisor on how to take advantage of indexation.

Aim to preserve your money: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively stable.

Aim to provide Liquidity: If you need to withdraw your money, all you have to do is submit a redemption slip and your money is normally credited to your bank account within one working day. You may also opt for an online redemption facility offered by many fund houses for added convenience.

Tax-efficient returns: You can earn returns in the form of monthly / quarterly dividends etc. which are completely tax-free in your hands. A dividend distribution tax of 28.325% is applicable and is deducted by the fund house.

There are various savings solutions available depending on the time period that you would like to invest for:

- a. 1 day to 3 months
- b. 3 to 6 months
- c. 6 months to 1 year
- d. 1 year +

The DDT rate of 28.325% is effective June 01, 2013 and further, upto May 31, 2013 DDT rate applicable shall be 14.1625% as amended by Finance Bill/Act 2013.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits.

The Financial Solution (Savings Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns. stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above. For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for dividend option would assume reinvestment of tax free dividends declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Dividends are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

What are Regular Income Solutions?

Our Regular Income Solutions seek to invest your money so as to provide regular income and tax efficient returns

Who can benefit from Regular Income Solutions?

This is an ideal solutions for investors who are interested in alternative modes of regular income, either in present of after retirement stage, and have low propensity for risk.

(Regular income is not assured & is subject to availability of distributable surplus.)

Benefits of Regular Income Solutions:

They aim to preserve your money & provide regular income: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively safe in order to generate regular income for you.

They aim to fight Inflation: A small part is invested in equity i.e. stocks of Indian companies to help you stay ahead of inflation.

Tax-efficient Returns: You may opt for a monthly dividend option where, in addition to the growth of your invested amount, a portion of the same comes to you as monthly income which is given in the form of dividends. These dividends are completely tax-free in your hands!

A dividend distribution tax of 28.325% is applicable and is deducted by the fund house.

The DDT rate of 28.325% is effective June 01, 2013 and further, upto May 31, 2013 DDT rate applicable shall be 14.1625% as amended by Finance Bill/Act 2013.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits

Wherever mentioned, Regular Income / Second Income / Monthly Dividend is not assured and is subject to availability of distributable surplus. The Financial Solution (Regular Income Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

What are Tax Savings Solutions?

Our tax saving solution provides tax benefits under section 80C and reduce your tax burden, while also providing long term capital growth to your money through equity investments.

Who can benefit from Tax Savings Solutions?

Tax saving is important, especially when investors can save up to ₹ 30,900 in taxes! Section 80C of the Income Tax Act, 1961 provides options to save tax by reducing the taxable income by up to ₹ 1 lakh. But, wealth creation is also important. Isn't it?

That's why this solution is ideal for investors who would like to create wealth along with tax saving.

Tax savings of ₹ 30,900 is calculated assuming qualifying amount of deduction is ₹ 1 lakh & investor falls in the top income tax slab of 30% & includes applicable cess. Investors are advised to consult their tax advisor in view of individual nature of tax benefits. Further, Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein. Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Benefits of Tax Savings Solutions:

Low lock-in period: Your money is locked-in for just 3 years, as against the much longer lock-in periods in other options.

Potential to earn dividends: While your money is locked-in for 3 years, you may opt for the dividend option and can receive potential returns in the form of tax-free dividends during this time. This feature is unique only to tax saving solutions from mutual funds.

Earn market linked returns: Since investments are made in stocks of Indian companies, the value of your investment moves with the stock market. Although it comes with market related risks, your money is diversified i.e. spread out across stocks of multiple companies and is being monitored by an investment expert with an aim to minimize such risks.

Tax-free returns: When you withdraw your investment after 3 years, the returns (if any) are totally tax free. Yes, you save taxes on both, your initial investment and also on the returns.

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above.

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month of the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for dividend option would assume reinvestment of tax free dividends declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown.

Note: The exit load rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 / 1800-22-7000 or from any of our Investor Service Centers.

Note: Standard Deviation, Sharpe Ratio & Beta are calculated on Annualised basis using 3 years history of monthly returns.
Risk Free Rate assumed to be 6.25% (FBIL Overnight MIBOR for 31st Jan 2017) for calculating Sharpe Ratio

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above.
For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month of the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for dividend option would assume reinvestment of tax free dividends declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown.
Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. Dividends are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.
Note: The exit load rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 / 1800-22-7000 or from any of our Investor Service Centers.

Performance details for close ended Capital Protection Oriented Schemes with less than 1 year of existence have not been disclosed. Schemes mentioned in order of performance for the period December 31, 2015 - December 30, 2016. Due to inherent difference in nature of schemes above (i.e. equity, hybrid, debt schemes) as may be managed by Fund Manager, performance of such schemes may not be strictly comparable. Further, for the schemes in existence for less than a year, the past performance details have not been provided. Further, performance of Fixed Term Plans (FTPs) / Fixed Maturity Plans (FMP) / Interval Income Schemes are not considered above, as FMPs / FTPs / Interval Income Schemes are close ended / interval schemes of varying maturities and performance of such schemes may not be strictly comparable with open ended schemes managed by Fund Managers.

Note: The above Allocation is As on January 31, 2017 as per Industry classification as recommended by AMFI.

The Financial Solution(s) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
