PERSPECTIVE

July 2021

Dear All,

In the last quarter, we witnessed another period of uncertainty due to the second wave of Covid-19 which turned out to be worse than the first wave. It was a very challenging time for the whole country. I pray to the Almighty to give humanity all the strength to overcome these tough times and emerge stronger than ever. It is heartening to see the monetary, regulatory and fiscal policy measures and guidance provided by the Government has helped stabilise markets and maintain economic and financial stability. The partial lockdowns have resulted in breaking the chain of transmission and creating a sense of caution amongst public at large. I felt that public discipline and cooperation with authorities was far better than the previous lockdown. I salute all the government officials, frontline workers and Covid Warriors for all their tireless and selfless service towards humanity and the country. There was some initial disruption, but we can see economic recovery take shape with pent up demand likely to come back soon. The RBI has been taking proactive measures since the outbreak and has promised to do whatever it takes to support the economy. The recent economic commentary from RBI has been positive and this has provided some comfort to the financial market and businesses across the country.

I appreciate the efforts of the Honourable RBI Governor for injecting liquidity into the system which today stands at the highest in history. This abundant liquidity has resulted in interest rates coming down and increase the credit extended to support entities impacted by the pandemic. The Honourable Finance Minister has been extending support to the MSMEs time and again through various measures. Recently, she has increased the allocation to the MSME credit guarantee scheme which has created confidence in the banks to carry out lending activities during these stressful times. All these measures have created optimism in the stock market which is pushing it to touch new highs.

There has been an ongoing debate whether the high valuations achieved by the equity market is sustainable or a result of irrational exuberance. While the question is valid when looked at in the light of uncertain economic fundamentals, in my experience the market has always moved based on future expectations of economic recovery. Also, this time around across the globe, we have witnessed swift actions being taken to support economic recovery. This has helped global markets bounce back on hopes of quick economic recovery on account of pent-up demand and higher savings. This should result in higher earnings for the businesses and subsequently bring back employment levels to normal. As more and more of the population is vaccinated, we should see the broader economy opening sooner than expected. The Government will provide higher stimulus to enable increased infrastructure and industrial spending which should further boost economic recovery. In the world of investing, people have now started choosing stocks that will benefit from the opening of economy. All these factors should keep the stock market buoyant and result in a long-term bull scenario. As investors, one should focus on the long-term picture, maintain asset allocation and stay invested.

Regards, **A. Balasubramanian** MD & CEO, Aditya Birla Sun Life AMC Limited

Equity Outlook

July 2021

Mr. Mahesh Patil Chief Investment Officer Aditya Birla Sun Life AMC Limited

Global equity markets took a breather in June due to concerns of increasing inflation in the US, seemingly hawkish tilt by the US Fed, and strengthening Dollar. However, 1-Yr returns continue to remain strong. US markets are at all-time highs and India continues to be amongst the best performing markets.

Globally, mobility and economic indicators are showing a strong recovery with both manufacturing and services firing. Strong demand recovery has led to higher commodity prices, which along with supply disruptions, have contributed to increasing inflation. However, rising inflation is seen to be transitory and Central Banks are expected to maintain an accommodative stance. Earnings estimates are being upgraded. Strong growth, loose monetary policy, and excess liquidity are boosting global equity markets to all-time highs.

In India, 2nd Covid wave has peaked out. Pace of vaccinations is rising which is positive for consumer and business sentiment. Mobility and economic indicators are on an uptrend and impact of 2nd wave is less than feared. Monsoons are normal thus far which is good for the rural economy.

India now has Increased linkages to global growth and fund flows. Consequently, exports are showing robust growth. India has seen a steady acceleration in Foreign Direct Investment (FDI) inflows and forex reserves are at an all-time high.

In addition, fiscal policy remains pro-Growth with the mix of expenditure skewed to Capex and monetary policy would remain accommodative till economic recovery is secured. Reforms momentum has also picked up pace which should lead to higher productivity. Especially, the Production Linked Incentive (PLI) Scheme should boost large scale domestic manufacturing of goods to bring about import substitution and increase global market penetration. India is one of the few large economies to see favourable demographics which gives us a competitive advantage.

Overall, India's economy should come back on track by FY23 to its trend growth of 6-7% YoY. This should also lead to a turnaround in corporate profits.

Globally, earnings estimates are being upgraded on the back of strong economic recovery. In the past, recovery years which followed sharp earnings drawdowns saw very strong EPS growth. Importantly, consensus projections ended up being revised higher during those recovery years. A case in point is that in the US, S&P500 EPS growth for CY21 has been upgraded to 35-37% YoY vs 24% at the start of last earning season.

In India, Q4FY21 earnings showed strong growth due to low base. Impact of 2nd wave of COVID has been less than feared and businesses are rebounding faster than in the first wave. Earnings may get impacted by a 3rd wave which is a possibility, but its impact is expected to be much less than the earlier waves. Upgrade in earnings for Commodity sectors such as Metals and Oil & Gas is offsetting any downgrades in other sectors. Higher commodity prices could have a short-term impact on margins of some companies. Overall, FY22 earnings growth estimates have been upgraded from 35% to 40% YoY mainly driven by Commodities. Going forward, earnings should normalize with Nifty earnings growth projected at ~15% in FY23.

Globally, valuations are elevated due to low interest rates and high liquidity. And even in India, headline valuations seem elevated currently due to depressed earnings. However, from a medium-term perspective, valuations seem fair as the economy and earnings would normalize by then.

FII flows have been strong and given positive global backdrop and with second wave having peaked out in India, we can expect FII flows to continue in the second half of this year. Strong domestic flows and increased retail participation should also support markets.

For med-to-long term, our outlook for economic and earnings growth remains positive, and we remain constructive on Equities. We maintain our view to play domestic cyclicals, industrials, IT and financials.

After the recent rally, short-term upside may be limited but any correction should also be temporary and minor. Investors should remain invested in Equities, mainly through SIPs, and use any correction as an opportunity to increase Equity exposure as risk-reward for Equities is fairly balanced in the med-to-long term.

Our outlook is reflected in our Aditya Birla Sun Life Asset Allocator FOF where we have maintained an allocation of 60% to Equities (Domestic Equity: 55%, International Equity: 5%), 15% to Gold, and the remaining 25% to Debt & Cash.

Flexi Cap and Multi Cap category can be suited for the current environment. Investors who are looking for lower volatility can consider categories such as Balanced Advantage and Asset Allocation.

Debt Outlook

July 2021

Mr. Kaustubh Gupta Co-Head – Fixed Income Aditya Birla Sun Life AMC Limited

The strong second wave of Covid has declined significantly with new cases 90% down from the peak. The decline is broad - based with most states witnessing steady decline. Restrictions have also eased up significantly across states. Cumulative activity indicators have started recovering fast and are back at September 2020 levels. Overall, the impact of second wave on economy has been much lower than the first wave. However, consumer confidence has been badly hit which may weaken the strength of recovery relative to the spectacular rebound we saw in first wave.

High frequency data suggest that the lockdown restrictions in the wake of second wave did not have much impact on supply side particularly in industrial and exports sector.

Exports in particular have been the bright spot in Q1FY21, clocking the highest number ever in the first quarter of the fiscal and growing by strong 13.9% on 2-year CAGR basis. This is a result of strong global demand and lack of restrictions in production in India. We expect exports to remain the silver lining in this growth cycle. Imports growth was much weaker at 1% largely due to weaker oil imports because of travel restrictions and should normalise. On the flip side, credit growth still remains very anaemic and private placement of bonds have also been quite low. This could be a result of companies sitting in good amount of cash, favourable condition in equity market and general deleveraging.

Overall, the peak impact of second wave induced lockdowns/social restrictions has been 25-35% of the first wave and the duration of the lockdown/restrictions have also been for much lower time duration. Moreover, global growth and financial conditions remains very strong and should aid recovery. However, we expect the rebound and pent-up demand to be more gradual given the low drawdown/restrictions and also because of lower work-at-home adjustment purchases. Consumer sentiments are also damaged much more this time given the widespread health crisis. Overall, we expect FY2022 GDP growth at 10.5%, above market consensus of about 9.5%. The key risks in our view are 1) emergence of very strong third wave; 2) sharp tightening of financial conditions should the inflation scare turn out to be permanent and non-transitory and 3) Oil prices settling higher than \$80 per barrel.

Vaccination remains the key to prevent third wave and sustainably control pandemic. Pace of vaccination has picked up with Center's new vaccination policy and now averages about 40 lakh dose per day and total vaccine dosages have crossed 36 crores. We expect the rising pace of vaccination in July-August and believe that in a few months' time, pace of vaccination will be limited by demand rather than supply. Also, we should note that significant number of populations has already got infected in the second wave and maybe having some sort of natural immunity.

India has joined the global bandwagon of higher Consumer Price Index (CPI) surprise that we are witnessing across the world (as discussed earlier). In May 2021, the CPI inflation rose sharply to 6.3% against market consensus of 5.38%. Internals suggest a broad-based momentum in prices of majority of articles. The numbers are reflection of sharp rise in prices of commodities like agriculture, crude and metals, spreading to create broad-based inflationary pressure in the economy. However, we note that the lower data points collected due to pandemic may have resulted in some upside bias to numbers and we would be closely watching June numbers for confirmation of rising inflation trend.

Central government's fiscal account remains quite healthy relative to budgeted. The FY2020-21 ended with 9.2% Fiscal deficit compared to budgeted 9.5% due to better than budgeted tax revenues and higher revenue expenditure, particularly in subsidy payments. Fiscal account for FY22 has made a good beginning with decent tax collections despite the second wave. Expenditure has been on the lower side with government machinery probably unable to spend much due to Covid. We do not expect incremental borrowing more than already announced.

RBI remains committed towards "orderly evolution of yield curve" and completion of the government's borrowing program in a non-disruptive manner, with regular intervention to keep a lid on long-term yields. RBI had paused the gradual normalisation post the second wave, however, post the higher inflation print for May 2021 and expectation of elevated prints for the next few months, markets are now pricing in an early and quicker normalization by RBI. We believe that increased uncertainties on growth front would keep RBI accommodative for a longer period than market consensus. Keeping overnight rates lower is necessary to keep an anchor on rates for central banks so that no deep scars are left due to Covid and economic recovery gains momentum. Current huge liquidity surplus is likely to continue for the next 12 months.

Thus, vols embedded in steep curves are a good compensation in line with our views since February. Accordingly, roll down continue to be good volatility adjusted strategies if investors have reasonable time horizon to stay with them. For investment horizon of 6 months+, Investor can consider Aditya Birla Sun Life Floating Rate Fund • For investment horizon of 12 months+, Aditya Birla Sun Life Banking & PSU Debt Fund can be considered • For longer investment horizon of 36 months+, Investor can consider Aditya Birla Sun Life Government Securities Fund and Aditya Birla Sun Life Credit Risk Fund.

PROTECTING INVESTING FINANCING ADVISING

Tax Reckoner 2021-22

Snapshot of Tax rates specific to Mutual Funds

Tax rates applicable for the Financial Year 2021-22.

income tax implications on income in respect of units of Mutual Funds.						
Sr. No.	Investor type	Withholding tax rate				
1	Resident	10%*				
2	NRI	20%**				

* As per section 194K, tax is not deductible if dividend income in respect of units of MF is below ₹ 5000/- in a financial year

 ** Base tax rate is required to be further increased by surcharge at the following rates -

a. 15% where total income exceeds ₹ 1 crore but does not exceed ₹ 2 crores and

b. 10% where total income exceeds ₹ 50 lakhs but does not exceed ₹ 1 crore

Further, 'Health and Education Cess' is to be levied at 4% on aggregate of base tax and surcharge.

Finance Act, 2020 has capped maximum surcharge at 15% w.r.t. WHT on dividends paid to non-resident non-corporate investors (namely individual, HUF, AOP, BOI, artificial judicial person etc.)

Mutual Funds Aditya Birla Sun Life Mutual Fund

When you think about your future, we are sure you are also thinking about your family members too. Since not all goals are the same and each member has a unique goal, you can fulfil them by investing via multiple SIPs.

What is an SIP?

A Systematic Investment Plan (SIP) is a facility with which you can invest in mutual funds through small and periodic instalments. You can initiate your investment on any day of the month by investing a fixed amount in a scheme of your choice.

Over a period of time, you can accumulate enough wealth to turn your dreams into actionable decisions.

Flexibility: You can adjust the investment amount as per your convenience.

Convenience: You can also choose the frequency of your investments (weekly, monthly, quarterly instalments) as per your convenience.

Pocket Friendly: You can start an SIP for as low as ₹500.

Power of Compounding: An SIP not only inculcates financial discipline but also helps you earn better returns as the interest on the invested amount gets compounded each time.

Limit Uncertainty by Investing Over Time: An SIP limits risks by spreading the investments over months, giving an even spread of investments across market movements.

Simplified Goal Planning: A disciplined approach towards your SIP can help you map out your goals for the present as well as the future.

Balances Market Volatility: An SIP helps you avoid timing the market. This means that when the cost is low, you get to buy more no. of units thus averaging the cost per unit.

Stability in Investment: When the market is down, you get more units. And when the market is up, you get more value of all the units allocated to you.

Since you and your family members may have different goals, you can also choose to invest via Multi-SIP.

Golden Rules for Investing in SIPs:

Start Early:

An early start with SIPs allows you to invest smaller amounts over a longer period of time, making it ideal for long-term goals.

Link one investment to one goal:

It's important to focus one investment plan on one specific goal. This will help you analyse your investments regularly, while letting you know how close you are to accomplishing your goals.

Stay committed for the long term:

A long-term investment in SIPs can help you realise your goals through the power of compounding.

An SIP for every need:

You can invest in an SIP from these available variants:

Step Up SIP:

This facility allows you to gradually increase the amount you want to invest based on investment appetite or increase in earnings.

Any day SIP:

You are given the flexibility to choose an investment date (from the 1st till the 28th of the month) as per your convenience.

Micro SIP:

Here, the minimum application amount in select schemes is as low as ₹100. This allows you to spend time in the market and gradually step-up the SIP amount.

SIP Pause:

This facility will give you the option to pause your SIP for a specified number of installments, and your SIP would restart from the immediate month after completion of the pause period.

Perpetual SIP:

Typically, an SIP comes with a pre-determined tenure. Here, you have the choice to not enter the end date in the SIP mandate. Thus, allowing you to redeem the fund after achieving the desired financial goal.

Fast Forward SIP:

This facility allows you increase the SIP frequency from monthly to weekly or quarterly to monthly and fast forward your investment journey to reach your goals faster.

Invest via SIP or Multi-SIP so that you and your family can <mark>#WINWITHSIP</mark>

Diversify your SIPs as per your risk appetite and time horizon required for each of your goals.

Avoid withdrawals based on market movements:

It's natural to feel anxious due to market movements. However, it's important to stay calm and remain invested in order to realise your goals.

Invest in multiple SIPs:

One SIP is not sufficient and you need a mutual fund portfolio. It is advisable to invest in SIP in equity funds for long-term goals and debt funds for all short-term goals.

What is a Multi-SIP?

Multi-SIP is a facility through which you can invest in multiple funds through just one cheque or just one click. Hence, you can aim to benefit from different returns from each fund.

How does Multi-SIP benefit you and your family members?

Since each family member have their own individual goals, we have bundled the funds according to each person's goals and risk appetite, you can also pick and choose the funds as per your preference. When everyone in your home invests in Multi-SIP, you and your family can **#WinWithSIP**.

Key Benefits of investing via Multi-SIP

- Ease of transaction with One-click/One-cheque.
- Invest in multiple schemes in one go.
- Investment diversification in multiple schemes as per your goals.
- Aim for risk-adjusted returns with diversification.

Investing Via Multi-SIP Is Simple and Easy

- 1. Simply select your risk profile Conservative, Moderate Or Aggressive.
- 2. Now select the amount you wish to invest in the Multi-SIP.
- 3. **Sit back** We have bundled funds for you and allocate your amount between these funds. You can also pick and choose the funds as per your preference.

What are Saving Solutions?

Our Savings Solutions seek to preserve your money and provide you with ready liquidity while delivering you tax efficient returns compared to traditional mode of savings

Who can benefit from Saving Solutions?

This is an ideal solution for investors who have low - medium propensity for risk and high liquidity. These can be ideal for first time investors in mutual funds.

Benefits of Savings Solutions:

- 1. Make Inflation work in your favour: Inflation affects your returns from any investment including mutual funds. But, in case of savings solutions, you can use it to your advantage through indexation which can help you reduce the amount on which you have to pay tax. You can benefit from indexation , if investing for more than 3 year. Please consult your tax advisor on how to take advantage of indexation.
- 2. Aim to preserve your money: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively safe.
- 3. Aim to provide Liquidity: If you need to withdraw your money, all you have to do is submit a redemption slip and your money is normally credited to your bank account within one working day. You may also opt for an online redemption facility offered by many fund houses for added convenience.
- 4. Introduction of TDS on IDCW: Finance Act, 2020 has abolished dividend distribution tax (DDT) w.e.f. 1st April 2020. IDCW will be taxable in the hands of investors basis tax slabs applicable to them.

There are various savings solutions available depending on the time period that you would like to invest for:

a. 1 day to 3 months b. 3 to 6 months c. 6 months to 1 year d. 1 year+

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are requested to consult their tax advisor before investing for individual nature of tax benefit as the information provided above is neither designed not intended to be a substitute for professional tax advice

The Financial Solution (Savings Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

CRISIL 1 Year T-Bill Index returns## (CAGR)	3.57	5.49	5.99	6.49

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above.

For SIP calculations above, the data assumes the investment of ₹10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAX. CASR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). More Elenchmark returns are not available, they have not been shown. **Past performance may or may not be sustained in future**. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Aditya Birla Sun Life Low Duration Fund

An open ended low duration debt scheme investing in instruments such that Macaulay duration of the portfolio is between **6 months and 12 months** Savings Solutions

Aditya Birla Sun Life Low Duration Fund is an open ended debt scheme which invests in a portfolio of debt and money market instruments of short maturities such that the Macaulay Duration is between 6-12 months, with a view and intent to provide reasonable returns & daily liquidity.

Fund Category

What is it?

Low Duration Fund

Investment Objective

The objective of the scheme is to provide income which is consistent with a portfolio through investments in a basket of debt and money market instruments of short maturities with a view to provide reasonable returns.

The impact on the NAV due to segregation is given in the following table	
Name of the schemes	Impact on the NAV due to segregation(%)
Aditya Birla Sun Life Dynamic Bond Fund	5.62%

Note: *The fall in NAV is to the extent of the portfolio segregated due to the credit event.

Note: The exit load (if any) rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 or from any of our Investor Service Centers.

Data as on 30th June 2021 unless otherwise specified

Note: The NAV of the scheme, pursuant to pay out of IDCW would fall to the extent of the payout and statutory levy (if applicable). Past performance may or may not be sustained in future. The Face Value - 10.00 Per Unit The Financial Solution(s) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Aditya Birla Sun Life Income Fund An open ended medium term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 4-7 years

The scheme is positioned in the medium to long duration fund category. Owing to its mandate the scheme will invest in a portfolio of debt and money market securities of varied maturities to maintain a Macaulay duration in the range of 4-7 yrs.

Fund Category

Investment Objective

What is it?

Medium to Long Duration Fund

The objective of the scheme is to generate consistent income through superior yields on its investments at moderate levels of risk through a diversified investment approach. This income may be complemented by price changes of instruments in the portfolio.

Date of First Installment: June 01, 2011 & Scheme Incention Date: May 09, 2011, Past Performance may or may not be sustained in future.				

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above. For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Aditya Birla Sun Life Financial Planning FOF - Moderate Plan An open ended fund of fund scheme investing in a portfolio of mutual fund schemes (predominantly in a combination of Equity Schemes, Exchange Traded Funds and Debt & Liquid Schemes)

An open ended fund-of-funds Scheme following the financial planning discipline with exposure to equity, ETF and debt Scheme. It is suitable for investors with prudent risk profile. It aims to provide long term capital appreciation. (Please consult your financial advisor for your risk profile

Fund Category

Investment Objective

What is it?

FoFs (Overseas/Domestic)

The Scheme aims to generate returns by investing in portfolio of equity schemes, ETFs and debt schemes as per the risk-return profile of investors. The Plan under the Scheme has a strategic asset allocation which is based on satisfying the needs to a specific risk-return profile of investors. There can be no assurance that the investment objective of the Scheme will be realized

REGULAR INCOME SOLUTIONS

What are Regular Income Solutions?

Our Regular Income Solutions seek to invest your money so as to provide regular income and tax efficient growth compared to traditional mode of savings

Who can benefit from Regular Income Solutions?

This is an ideal solutions for investors who are interested in alternative modes of regular income, either in present of after retirement stage, and have low propensity for risk.

(Regular income is not assured & is subject to availability of distributable surplus.)

Benefits of Regular Income Solutions:

They aim to preserve your money & provide regular income: These schemes generally invest in instruments like bonds of reputed Indian companies and securities (bonds) issued by the Government of India which are considered relatively safe in order to generate regular income for you.

They aim to fight Inflation: A small part is invested in equity i.e. stocks of Indian companies to help you stay ahead of inflation.

Introduction of TDS on IDCW:You may opt for a monthly IDCW option where, in addition to the growth of your Invested amount, a portion of the same comes to you as monthly income which is given in the form of IDCW Finance Act, 2020 has abolished dividend distribution tax (DDT) w.e.f 1st April 2020. IDCW will be taxable in the hands of investors basis tax slabs applicable to them.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are requested to consult their tax advisor before investing for individual nature of tax benefit as the information provided above is neither designed not intended to be a substitute for professional tax advice

Wherever mentioned, Regular Income / Second Income / Monthly IDCW is not assured and is subject to availability of distributable surplus. The Financial Solution (Regular Income Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

TAX PLANNING SOLUTIONS

What are Tax Savings Solutions?

Our tax saving solution provides tax benefits under section 80C and reduce your tax burden, while also providing long term capital growth to your money through equity investments.

Who can benefit from Tax Savings Solutions?

Tax saving is important, especially when investors can save up to ₹ 53,820 in taxes! Section 80C of the Income Tax Act, 1961 provides options to save tax by reducing the taxable income by up to ₹1.5 lakh. But, wealth creation is also important. Isn't it?

That's why this solution is ideal for investors who would like to create wealth along with tax saving.

Tax saving of ₹ 53,820 is calculated assuming that the qualifying amount of deduction is ₹ 1.5 lakhs and investor falls into highest tax slab (i.e. 30% plus applicable surcharge and health and education cess). Please note that savings mentioned above are based on general provisions of the Income tax act, 1961 and investors are advised to consult their tax advisors to determine tax benefits applicable to them. Amount mentioned above may undergo a change if assumptions specified herein do not hold good.

Benefits of Tax Savings Solutions:

- Low lock-in period: Your money is locked-in for just 3 years, as against the much longer lock-in periods in other options.
- **Potential to earn IDCW:** While your money is locked-in for 3 years, you may opt for the IDCW option and can receive cash flows though IDCW during this time.
- Earn market linked returns: Since investments are made in stocks of Indian companies , the value of your investment moves with the stock market with an aim to minimize such risks. Although it comes with market related risks, your money is diversified i.e. spread out across stocks of multiple companies and is being monitored by an investment expert.
- **Capital Gain Taxed:** When you withdraw your investment after 3 years, upto Rs 1 Lakhs, gain will be tax free and above Rs 1 Lakhs have to pay taxed at 10% (plus applicable surcharge and cess) and not at marginal tax rate.

Investors are requested to note that fiscal laws may change from time to time and there can be no guarantee that the current tax position may continue in the future.

Investors are requested to consult their tax advisor before investing for individual nature of tax benefit as the information provided above is neither designed not intended to be a substitute for professional tax advice

Tax deduction(s) available u/s 80C of the Income Tax Act, 1961 is subject to conditions specified therein.

Investors are advised to consult their tax advisor in view of individual nature of tax benefits.

The Financial Solution (Tax Savings Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

What are Wealth Solutions?

Our Wealth Creation Solutions seek to provide tax efficient growth of your capital through equity investments over a longer term.

Who can benefit from Wealth Creation Solutions?

These solutions can be ideal for investors who are planning for future expenses, like higher education of children, marriage, buying a home etc. These solutions are available in the range of aggressive to conservative options to suit the needs of the investor.

Benefits of Wealth Creation Solutions:

Capital Gain Taxed: When you withdraw your investment after 1 year, capital gain upto Rs 1 Lakh will be tax free. Any gain above Rs 1 Lakh will be taxable at 10% plus cess and not at marginal tax rate.

Risk is lowered: Mutual funds invest in many companies and funds are managed by experts; which can be considered as an alternative to direct investment in shares.

Investors are requested to consult their tax advisor before investing for individual nature of tax benefit as the information provided above is neither designed not intended to be a substitute for professional tax advice

The Financial Solution (Wealth Solution) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Aditya Birla Sun Life Equity Savings Fund

An open ended scheme investing in equity, arbitrage and debt.

Equity Savings

It is a hybrid fund that uses a unique combination of equity derivative strategies, arbitrage opportunities, pure equity investments, debt & money market instruments which together intends to deliver tax efficient capital growth and stable income with low volatility.

Fund Category

What is it?

Investment Objective

To provide capital appreciation and income distribution to the investors by using a blend of equity derivatives strategies, arbitrage opportunities and pure equity investments. The Scheme does not guarantee/indicate any returns. There can be no assurance that the schemes' objectives will be achieved.

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above. For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed in returns. Performance the value of the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Data as on $30^{\rm th}$ June 2021 unless otherwise specified

Note: The exit load (if any) rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 or from any of our Investor Service Centers.

Aditya Birla Sun Life Equity Hybrid '95 Fund

An open ended hybrid scheme investing predominantly in equity and equity related instruments

It is an open-ended hybrid scheme investing predominantly in equity and equity related instruments

What is it?

Fund Category

Aggressive Hybrid Fund

Investment Objective

The objective of the scheme is to generate long term growth of capital and current income, through a portfolio investing in equity, debt and money market securities. The secondary objective is income generation and distribution of IDCW

Scheme Benchmark. ## Additional Benchmark. * As on start of period considered above

For SIP calculations above, the data assumes the investment of ₹10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. **Past performance may or may not be sustained in future**. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

*Aditva Birla Sun Life AMC Limited has decided to temporarily suspend acceptance of fresh subscriptions under Aditva Birla Sun Life Century SIP ("CSIP") Facility (including the STP Facility under CSIP) with effect from Thursday, April 1, 2021

Aditya Birla Sun Life Frontline Equity Fund

An Open ended equity scheme predominantly investing in large cap stocks

Fund Category

Scheme Benchmark ## Additional Benchmark * As on start of period considered above

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCWs declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

*Aditya Birla Sun Life AMC Limited has decided to temporarily suspend acceptance of fresh subscriptions under Aditya Birla Sun Life Century SIP (*CSIP*) Facility (including the STP Facility under CSIP) with effect from Thursday, April 1, 2021

Aditya Birla Sun Life Infrastructure Fund

An open ended equity scheme investing in infrastructure sector

Fund Category

What is it?

Sectoral/Thematic

Aditya Birla Sun Life India GenNext Fund

by high disposable incomes of the young generation (Gennext)

An open ended equity scheme following Consumption theme

Sectoral/Thematic

What is it?

Fund Category

Investment Objective

The objective of the scheme is to target growth of capital by investing in equity/ equity related instruments of companies that are expected to benefit from the rising consumption patterns in India, which in turn is getting fuelled by high disposable incomes of the young generation (Generation Next). The scheme will invest in companies that have the following characteristics: 1. Companies that seek growth in revenues arising out of demand from the younger generation (GenNext) for their products or services. 2. They should be engaged in manufacturing of products orrendering of services that go directly to the consumer. 3. The products and services should have distinct brand identity, thereby enabling choice.

It is an open-ended equity scheme that strives to benefit from the rising consumption pattern in India fuelled

Scheme Benchmark, ## Additional Benchmark, * As on start of period considered above.

For SIP calculations above, the data assumes the investment of ₹10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCWs declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. **Past performance may or may not be sustained in future**. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.

Note: The ski load (if any) rate levice at the time of redemption/rate being considered. Note: The ski load (if any) rate levice at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 or from any of our investors are bearing the recurring expenses of the scheme, in addition to the expenses of other schemes in which the Fund of Funds Scheme makes investments.

For SIP calculations above, the data assumes the investment of 1 0000/- on 1st day of every month or the subsequent working day. Load & laxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. **Past performance may or may not be sustained in future**. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered. **Note:** The exit load rate levid at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units.

Note: The exit load rate levied at the time of redemption/switch-out of units will be the rate prevailing at the time of allotment of the corresponding units. Customers may request for a separate Exit Load Applicability Report by calling our toll free numbers 1800-270-7000 or from any of our Investor Service Centers.

Update on Stressed Assets

As we have been guiding in our calls and review earlier, credit market in India had faced significant headwinds on account of Covid 19 induced lockdown. In line, we have had to take valuation impact in some of our holdings (ITPCL, JRPICL & VIL). We continue to remain vigilant in wake of an evolving market & potential, and tracking our investments very closely. Hence in interest of conservatism & prudence while we have marked the valuation of these securities in line with the rating agency/internal valuation committee approved valuations, we are also hopeful of potential upside from such recoveries. Pl find below a brief update on these securities –

JRPICL - Jharkhand Roads consists of 5 roads for which the Government of Jharkhand pays annuities on a semi- annual basis. With government finances being stretched due to Covid- 19, there has been an elongation in the timeline of receipt of annuities. Keeping the stretched cash position in mind, all the NCD Holders, have accepted the company's proposal for a temporary extension in timelines under the RBI guidelines with respect to Covid 19 related issues following the KV Kamath framework for restructuring till such time as the company receives annuity from the govt. (Currently the asset is valued at 50% of its principal value).

ITPCL - This is an amber entity and IL&FS management along with the bankers have finalised the restructuring package to convert the entity into a green entity. As per the restructuring plans, our NCD along with interest would be segregated into sustainable and unsustainable portion. ~90% of the lenders' approval has come in for the restructuring proposal. Further, the company has also received RBI approval for restructuring under change of management provision. The company has filed the restructuring plan for NCLAT approval. On receipt of court approval, the NCD payment would start as per the terms of restructuring proposal. (Currently the asset is valued at 0% of its principal value).

VIL - On 1st Sept 2020, the Supreme Court of India directed Telecom operators (including Vodafone Idea Ltd.) to pay AGR dues over 10 years (rejecting their plea to pay it over 15 years). Also, Telcos have been asked to pay off 10% of AGR dues by March 31, 2021. Recently, Vodafone Idea Ltd. approached the Supreme Court seeking correction in the AGR Assessment. VIL listed various government errors, including double counting of revenue items and not including the earlier payments made by the company. (Currently the asset is valued at 0% of its principal value).

Total Net Assets

The Financial Solution(s) stated above is ONLY for highlighting the many advantages perceived from investments in Mutual Funds but does not in any manner, indicate or imply, either the quality of any particular Scheme or guarantee any specific performance/returns.

Note: The above Allocation is As on June 30, 2021, as per Industry classification as recommended by AMFI.

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme. **Minimum Additional Amount :** This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
