DECEMBER 2024

**Vikas Mathur**  
Head - Institutional Sales  
Aditya Birla Sun Life AMC Limited

Election results around the world don't seem to be following the trajectory predicted by political analysts. One of the most important events - the US Presidential election is behind us. Contrary to predictions, Donald Trump's re-election as President of the United States has stirred both optimism and apprehension in global financial markets. His administration's policy agenda is focused on tax cuts, trade protectionism, deregulation, and stricter immigration policies. Though it is early to assess the implications for the economy and equity markets, but the world eagerly awaits 20th January, the day he officially begins his second term.

Assembly elections in key states of India also exhibited political dynamism. State election results for Haryana and Maharashtra surprised most. The BJP-led Mahayuti alliance's victory in Maharashtra with a decisive mandate, securing over 200 seats in the 288-member assembly and BJP on its own crossing the majority mark in Haryana, retaining power for the third consecutive term, signals consistency in economic policies and political stability. Both these outcomes were welcomed by the markets.

Mr. Sanjay Malhotra took charge as the 26th Governor of the Reserve Bank of India (RBI). In his first public interaction as the central bank's new head, he promised to focus on restoring trust, promoting growth, and ensuring policy stability.

The RBI, in its recently concluded monetary policy meeting, reduced the cash reserve ratio (CRR) by 50 basis points to inject liquidity into the banking system but kept the benchmark repo rate unchanged at 6.5 per cent to combat inflation. RBI also lowered its projection for GDP growth in FY25 from 7.2 per cent to 6.6 per cent. India's retail inflation moderated in November to 5.48% compared to 6.21% in October, led by lower vegetable prices.

For Q3, we expect growth to be closer to 6.25%- 6.50% against the RBI's expectation of 6.90%. Growth is mean reverting to the pre-Covid rate of 5.75%. We see 75-100 bps easing in this cycle. Local conditions pave the way for easing monetary conditions, but external stability might push rate cut to April 2025 instead of Feb 2025 given the uncertainty associated with Trump policies.

For Fixed Income, we remain constructive on duration. Investors with more than 1 year of investment horizon can add duration to their portfolios through corporate bond fund and investors at the short-end of the curve having over 1 month duration can look to switch to one bracket (Money Manager, Low Duration and Floater funds) higher, given the kink available in the curve from 3 months to 1 year.

For equity investors, we advise customers for a disciplined investment approach through SIP/STPs and asset allocation with large cap bias. For long-term wealth creation, patience and realistic expectations would help through such times in equity markets.

To cater to the needs of our customers in a dynamic market environment, we endeavour to build innovative Active, Passive and Alternate investment solutions.

In Debt Passive space, we launched the industry first Aditya Birla Sun Life CRISIL-IBX Financial Services 3 to 6 Months Debt Index Fund, which invests in CP (Commercial Papers), CD (Certificates of Deposits) & Bonds of AAA-rated issuers from the financial services sector. It is a perpetual index fund which starts with 6 months maturity profile and rolls down to 3 months, resetting to 6 months after every roll-down period. Our endeavour is to provide investors with various investment avenues that optimally leverage the current market conditions, making their money work.

In the new year we aim to come up with another industry first proposition in the perpetual index fund category capturing another spot in the yield curve, offering both term premia and superior portfolio quality.

To further enhance our passive offerings, we recently opened the Aditya Birla Sun Life BSE India Infrastructure Index Fund and the Aditya Birla Sun Life Nifty India Defence Index Fund.

In the actively managed equity fund space, post the success of the Aditya Birla Sun Life Quant Fund, we curated another offering for our customers - The Aditya Birla Sun Life Conglomerate Fund, a fund that invests in the top conglomerates of India. The fund covers prominent business groups across 22 sectors, representing 169 companies, and aims to capitalize on their resilience and growth potential.

The diverse needs of customers and the growing wealth effect in India makes it pertinent for asset managers to adapt to these and curate solutions that address the different wealth creation opportunities that investors are seeking. Our 'Customer First' approach helps us innovate and pre-empt customer needs and be present across these asset classes and provide the relevant solutions.

As we step into 2025, I extend my heartiest wishes to you and your entire family. May the upcoming year navigate you towards health and wealth consciousness, leading to what we all want to eventually attain - peace of mind.

# EQUITY OUTLOOK

DECEMBER 2024

**Dhaval Shah**  
Senior Analyst & Fund Manager  
Aditya Birla Sun Life AMC Limited

Indian equity markets continued to retrace from its peak since end September as both macro and micro economic variables took peddle of the acceleration foot. Real GDP growth which was above 8% for each of the 4 quarters in FY24, has decelerated to 6.7% in Q1FY25 and 5.4% in Q2FY25 (est 6.5%). This slowdown is led by weak investment growth and muted government spending in the wake of elections even as consumption has held well. We access growth to improve from here on but would still be 50 bps below street expectations of 7% yoy growth for FY25. Recently released high frequency indicators also reflect a mixed trend with CV sales subdued in Nov 2024 and contraction in air cargo traffic for the 4th consecutive month. At the same time, toll collections continue to be robust, PV sales growth is on an improving trend, PMIs are resilient and water reservoir levels are healthy. RBI has maintained policy rates at 6.5% with neutral stance and opted for CRR cut of 50 bps to ease system liquidity. Commentary from the regulator indicates that they are more worried on lingering inflation rather than growth at the moment and would be data dependent for further rate cuts possibly pushing out expectations of a cut by couple of months.

Recent quarterly earnings also depicted the visible slowdown in economic activity. Aggregate sales growth of private sector (non-government and non-financial companies) grew at 5.4% yoy (6.9% in previous quarter) and operating profit growth was also muted at 3.5% yoy. We expect street earnings growth would moderate to mid-single digit in FY25 and low double digit in FY26. Corporate commentary on festive demand is mixed with optimism on pick in rural demand due to good monsoon, high reservoir levels and increasing purchasing power whereas urban demand is marred by high inflation particularly in the mass end of the markets. Investment oriented companies are expecting pick up in ordering activity and improved execution in H2 which should bode well for the economy. India has always been a “two step forward, one step back” kind of growth economy and hence investors should not be too perturbed with the current slowdown.

Valuations of the broader market continue to be higher than long term averages. While valuations of top 100 corporates are marginally higher than historical averages, small, mid and micro caps are quoting at marked higher multiples. Investor would be well advised to follow a disciplined asset allocation on the overall portfolio and prefer large caps via small and mid-caps in terms of equity allocation over the next few quarters.

Thank you.

## Global Macro

Global growth is solid, but slowing a bit, as we enter 5th year after the pandemic lows. There are divergences in the growth rates in various parts of the world. US is growing well led by a healthy consumption and solid job market. However, growth is a worry in Europe and China as domestic demand remains weak.

Inflation, globally, has been coming down for last couple of years and still stabilizing. Next year, we expect additional progress to be made on lowering inflation. On the policy front, central banks have begun cutting rates while fiscal policies remain unusually loose for current levels of growth and employment.

In 2025, the policies of the new US administration are expected to play a key role in shaping the macro. The key policy changes expected are Tariffs, Tax cuts, regulatory easing and immigration. Trump is also a big proponent of lower energy prices so crude prices should remain benign. On an aggregate, the balance of risks suggest that thrust of policy measures will be positive for US growth but may have negative impact on world growth. It may also turn out to be inflationary, but it would depend on the quantum of tariffs, and the response from the trade partners. As a result, various central banks and governments are expected to have divergent reactions. US may see slowdown in the rate cuts. Europe and China may see continued monetary easing and some additional fiscal measures to absorb the shock from the Trump policies.

## Indian Macro

India GDP data for 2QFY25 came at 5.4%, which was much below market expectations of 6.5%. Consumption data continues to remain lackluster at 5.7%; whereas investments, which has been doing well, also slowed down to 5.4%. Government capex is running very slow vis-à-vis the target. It is one of the contributors to the slowdown in investments, we expect government capex to pick up from here. On the GVA front, Industry growth deteriorated to 3.6%. High frequency indicators like GST collection, 2-wheeler sales, PMIs etc. which showed weakness in July-Sep quarter are showing signs of improvement in Oct-Nov data. Other indicators like Credit growth, PV sales, power generation etc. continue to show weakness. Overall, datapoints suggest some uptick from 2nd quarter but there is still slack in the economy. We expect FY25 GDP growth to be about 6.3%.

Oct Headline CPI surprised with a 6.21% print, due to a big uptick in food prices. Core inflation remained benign at 3.67%, 11th consecutive month of below 4% number. CPI prints should come down as winter crop arrivals would lead to a cooling off in vegetable prices. We expect CPI to average around 4.5% in CY25.

## RBI Policy and Market Outlook

RBI kept the policy rates unchanged and cut the CRR rate by 50 bps to inject 1.16 lakh crs of liquidity in the system. The forecasts for both GDP and Inflation moved in the wrong direction. FY25 GDP forecast has been decreased from 7.2% to 6.6% and FY25 Inflation increased from 4.5% to 4.8%. We believe that the revised GDP number is also optimistic and further downside surprises are possible. As inflation is expected to be benign, going forward, growth outcomes will significantly influence the direction of policy.

Change in stance to neutral in the Oct policy, CRR cut in the Dec policy and weaker GDP numbers have created the necessary environment for rate cuts. We believe that we should get 75-100 bps of rate cuts in this cycle. We remain overweight on duration and are targeting a move to 6.5% on the 10Y over the next 6 months.

For 2025, we believe investors should add duration through short-term funds (Short term fund, corporate bond fund, and Banking & PSU fund). Actively managed duration funds should continue to do well this year. Investors who want to benefit from index inclusion related inflows into Indian Government Bonds should invest in our actively managed Gilt fund and our passively managed Index funds / ETFs investing in GSecs. Ultra short-term investors should look to invest in money market, ultra-short-term funds & low duration funds. We have also launched 100% AAA sectoral target maturity funds which can be a good addition given elevated spreads.

Aditya Birla Sun Life Dynamic Bond Fund	5.62%

Note: The fall in NAV is to the extent of the portfolio segregated due to the credit event.

Note: Pursuant to the default of a security issued by Adilink Infra & Multitrading Private Limited to another bondholder on November 25, 2019, the AMC had created segregated portfolio in the Scheme with effect from November 25, 2019.

Aditya Birla Sun Life Mutual Fund has fully recovered the segregated amount and the proceeds have been paid to investors in the year 2022.

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: In terms of para 10.4.1.a of SEBI Master Circular on Mutual Funds dated May 19, 2023, no entry load will be charged by the Scheme to the investor effective August 1, 2009

**Exit Load :** Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99.

**Modified Duration :** Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

**Standard Deviation :** Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

**Sharpe Ratio :** The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

**Beta :** Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

**AUM :** AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

**Holdings :** The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

**Nature of Scheme :** The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

**Rating Profile :** Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
