Perspective

JANUARY 2024

A. Balasubramanian
Managing Director & CEO
Aditya Birla Sun Life AMC Limited

Dear Investor,

At the outset, let me wish you and your family a very happy and prosperous new year.

India appears to be enjoying a Goldilocks moment with reasonable growth momentum, stable commodity prices especially crude oil, slowing inflation, and a weakening dollar bias. Its GDP is expected to grow by 6.2% in 2024 and is poised to retain the top spot as the fastest-growing major economy in the world. With a projection of crossing \$7.3 trillion in GDP, India is likely to move into the third spot among world economies by 2030. India's resilient march has continued on the back of strong domestic demand despite global macro uncertainties. A steady focus on macro stability and sustainable fundamental growth has ensured that the Indian economy remains robust in an uncertain global environment that has been marked by geopolitical tensions, inflationary pressure and tight liquidity conditions.

We have seen an aggressive pace of rate hikes globally from central bankers in order to rein in inflation. It appears though that interest rates have peaked and there is a possibility of rate cuts in the second half of the year. As global growth remains muted, with commodity prices stabilising and demand-supply dynamics normalising, it further supports the rate view. This in turn can lead to flow of funds in emerging markets and India could be a likely beneficiary given its positive growth forecast. Equity markets will be driven by earnings growth and liquidity flows. Both these factors are likely to be supportive going forward, with corporate earnings growth expected in the low teens and FII flows also relatively better than last year due to the weakening dollar globally as the rate cut cycle begins.

Domestic mutual fund flows will continue to grow steadily, primarily driven by the SIP book. Considering the market valuation for NIFTY is above the long-term average, one can anticipate market returns to align with earnings growth. In the realm of equities, the outlook appears more favorable for large-cap stocks compared to mid and small caps, where valuations seem slightly stretched. The risk-reward across various asset classes is poised to be well balanced, highlighting the crucial role that asset allocation products will play in investor portfolios. A few other key risks include geopolitical tensions, a US economic hard landing, or rising oil prices.

As we move into 2024, strategic asset allocation will remain key to navigating market movements. For those seeking growth and stability, Large-cap funds and Flexi-cap funds offer excellent opportunities. Those prioritising diversification may find Multi-asset allocation funds to be an attractive choice as they invest across equities, fixed income and commodities. First-time investors can consider hybrid funds like Balanced advantage funds for a suitable equity and fixed-income allocation. Remember, tailoring your investment timeline to your risk appetite and experience is crucial for success.

At ABSLAMC, we remain committed to delivering value to our investors, distributors and shareholders. We are confident that the Indian economy presents endless opportunities for growth and wealth creation. By diversifying your portfolio, investing for the long term and choosing the right investment vehicles, you can capitalise on these avenues.

Thank you for your continued trust and support. We look forward to embarking on this journey of shared success in 2024 and beyond.

Equity Outlook

JANUARY 2024

Mahesh Patil
Chief Investment Officer
Aditya Birla Sun Life AMC Limited

As we look forward into 2024 the picture looks much brighter as some of the concerns which dominated headlines in better part of 2023 such as global growth concerns, US recession, stubborn inflation, rate hikes, USD strength, geopolitical risk have reduced at the margin. The biggest surprise globally was on growth as we saw upgrades to global growth including India. Looking back, 2023 turned out to be a healthy year for equity markets and most asset classes.

The key highlight of our markets was the strong outperformance of small and midcaps and the market breadth, which was at a historical high. Last year we witnessed large macro sectoral themes play out like Realty, Capital goods, Auto, PSUs which gave outsized returns compared to the Nifty. In 2024, we think the macro trends have less influence and the market breadth can narrow down which means that bottom-up stock picking will play an important role for generating alpha and some consolidation of our portfolio holdings will be necessary.

For an emerging market, India also exhibited profound macro-economic stability last year which reflected in the fact that the volatility in our currency (INR) and Bonds was one of the lowest compared to other developed and emerging markets. Even the volatility of our equity market also trended lower as India VIX hit historic lows. This can make a case for lower risk premium for Indian markets going forward.

Moving forward the macro-outlook for India seems to be enjoying a Goldilocks scenario with reasonable growth momentum (expecting 6.5% GDP growth in FY25), stable commodity prices, especially crude, slowing inflation and a weakening dollar bias. Relatively, most of the global economy faces some headwinds like lagged impact of tighter monetary policy, limited fiscal space considering high public debt, lower nominal GDP growth and depletion in excess savings. We expect "mild slowdown" as a base case for global growth for CY24. Also, in 2024, more than 60% of the world economy will have elections, which makes us believe that these governments will try to maintain stability and not escalate any geopolitical risk.

The recovery in India's GDP is driven by investments which is now trending above the pre-covid trend while consumption is still to catch up as the rural economy and the bottom of the income pyramid is still recovering. Election-related spending this year should lead to some stimulus, and we remain hopeful of revival in consumption growth in the second half of CY24. The foundation for a sustained capex recovery from the private sector is also in place with banking balance sheets in good shape and corporate debt to equity at its lowest level in a decade. All these factors give us greater confidence in the long-term sustainable growth for our economy despite some global headwinds.

In this backdrop, the outlook for FII flows will be further supported by a weakening USD. India's overweight in emerging market funds is lower than historical levels and there is room to increase it as foreign investors look for markets that offer better growth. The domestic flows are also more resilient with MF SIP, EPFO, NPS and Insurance averaging USD 3.5bn on monthly basis. The confluence of strong liquidity flows from domestic and FIIs will ensure that India's premium to other emerging markets continues to be at a significant premium.

Post-covid corporate earnings growth have been strong with high teens CAGR, however, as the base effect and efficiency gains plateau, earnings growth going forward should track marginally above nominal GDP growth. The big difference between the pre-covid period and now is that the growth is more broad-based, driven by many sectors where the outlook is looking better.

The key themes of interest for us are: - a) Banking and Finance: riding on the strong credit growth driven by revival of corporate credit and benign credit cost; b) Domestic manufacturing: as the private sector capex revives and PLI-led investment gain traction in various sectors including the new age sectors like renewables, semiconductor, EVs, etc. c) Discretionary consumption: a secular theme for the next decade as India's per capita GDP crosses the inflection point of 2,500 USD and the young India which is aspirational drives premiumization. Discretionary consumption is still below its pre-Covid peak and with inflation on a declining trend, we should see a pickup in discretionary consumption. Apart from these, other sectors which we prefer are Real estate, Pharma and Autos.

Currently, despite markets making a new high, the valuation of Nifty is only marginally above the long-term average. Hence market returns will track earnings growth. In the last two years, large cap stocks have significantly under-performed the midcap and small caps and their ratio to total market cap is at a decadal low. Also, the relative valuation of large cap stocks vis-a-vis Small and Midcap is also favorable. All this data makes us believe that despite equity returns being moderated in the coming year, risk reward favors large cap stocks, and we would advise more flows to large cap biased funds. Also, with interest rates at their peak and expectations of moderate equity returns, fixed income looks attractive. Overall, risk reward seems balanced across asset classes, hence, a multi-asset allocation approach with exposure to Equity, Fixed Income, and Gold continues to remain well-suited for the coming year.

Debt Outlook

JANUARY 2024

Sunaina Da Cunha
Co – Head, Fixed Income
Aditya Birla Sun Life AMC Limited

Corporate India remains in fine fettle when measured against various credit metrics. Looking at the past 10 years timeframe, we see that the debt servicing metrics of leverage and interest cover have recovered significantly post the significant dip seen during Covid and we believe they are likely to remain comfortable going ahead despite the expected pick up in capital expenditure and M&A activity. The debt fueled growth mindset has now changed and companies are looking to prudently use internal accruals and conservative capital structures when planning acquisitions or brownfield / greenfield expansions. The various profitability metrics are also at their highest point seen during the last 10 years in part enjoying the tailwind of the dip in input costs and this is likely to sustain over the next 6 months before normalizing in the second half of the year. The ~2:1 upgrades to downgrades ratio seen in Sept '23 on the back of very high credit ratios seen in the last 2 years is testimony to the strong credit profiles of various entities that form Corporate India.

This Credit Underwriters' dream period dovetails well into the goldilocks situation we are experiencing in India on the Macro side of strong growth coupled with a downtrend in inflation. Most of the high frequency indicators of PMIs, credit growth, tax collections, e-way bills, passenger car sales, and capacity utilization other than the external sector continue to flash bright green pointing to a healthy continuing underlying momentum. CPI inflation has continued its broad decline despite intermittent shocks from volatile vegetable prices and the decline seen in the sticky core inflation is particularly heartening. Liquidity is expected to remain broadly balanced blunting the use of that tool for the RBI. Thus, this dream run wrt creditworthiness that Corporate India is experiencing is expected to continue for some time more.

Credit demand has picked up and is expected to CAGR at 17% in the next decade. Continued tightness in the dollar markets would lead many corporates who used to borrow abroad using UDS financing are now finding domestic borrowing is relatively cheaper. With the balanced liquidity now in the banking system, and steep rise in the credit-deposit ratio of the banks - corporates will need to look outside the banking system to meet their needs. Many large wholesale financing Non Banks have slowed down their disbursements. So we expect a lot of this high quality supply to start feeding into the Corporate Bond Markets

The abundant liquidity previously sloshing about the banking system had driven spreads to decadal lows. Corporate bond spreads are finally showing signs of expanding. With liquidity expected to remain balanced going forward, a return to better risk adjusted pricing is expected just when the Supply of good quality papers is expected to hit the Bond Markets.

All this augurs well for a relook at Higher Yielding papers. Smart money and large family offices have already picked up the pace of investments as evidenced in the volume pick up in various online platforms retailing Higher Yielding bonds. A well-diversified professionally managed basket which offers liquidity would always be a better proposition.

We continue to prefer cash flow generating companies and sectors with good promoters, performance track record, and a conservative capital structure and accordingly, will selectively invest in those sectors and companies.

Our Recommendations

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (Investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Past Performance may or may not be sustained in future. The fund's inception date is October 03, 2002, and the initial SIP installment is considered to have been made on that date. Subsequent installments occur on the first day of every following month.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (Investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (Investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Investment Objective

The objective of the scheme is to target growth of capital by investing in equity/ equity related instruments of companies that are expected to benefit from the rising consumption patterns in India, which in turn is getting fuelled by high disposable incomes of the young generation (Generation Next). The scheme will invest in companies that have the following characteristics: 1. Companies that seek growth in revenues arising out of demand from the younger generation (GenNext) for their products or services. 2. They should be engaged in manufacturing of products or rendering of services that go directly to the consumer. 3. The products and services should have distinct brand identity, thereby enabling choice.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (Investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (Investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return).Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day. Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration.

ITPCL - This is an amber entity and IL&FS management along with the bankers had finalised the restructuring package to convert the entity into a green entity. As per the restructuring plans, our NCD along with interest would have been segregated into sustainable and unsustainable portion. However, Operational Creditors are to be taken into consideration as part of the restructuring plan as per the Court order and hence some changes are expected to happen to the restructuring plan. The final plan post incorporating these changes is still awaited.

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: In terms of para 10.4.1.a of SEBI Master Circular on Mutual Funds dated May 19, 2023, no entry load will be charged by the Scheme to the investor effective August 1, 2009

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
