Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. ### Rebalancing due to Passive Breach:

Further, as per para 2.9 of SEBI Master Circular on Mutual Funds, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9 of SEBI Master Circular on Mutual Funds .

Investment Strategy

Special Situations are exceptional market scenarios when the market offers businesses

at prices which do not reflect the true potential or true value or there is a significant deviation from its own long term trajectory. During such events, typically, the prospects of such impacted businesses are at an inflection point, such that market participants view such companies as departing from their traditional growth path, either up or down. As such, different portfolio managers could benefit out of the same opportunity in different ways (like going long or short on the same stock), but primarily focused on benefiting from the special situation.

The Scheme will follow a bottom up approach for stock selection. The Scheme will invest in stocks with an emphasis on situations that are considered out-of-the-ordinary and therefore, present interesting stock picking opportunities.

The list of special situations is mentioned below. The below list is only an indicative list and is not exhaustive.

## **Company Specific (Event/Developments)**

These include factors like change in management, mergers & acquisitions, corporate restructuring, holding companies trading at discount, regulatory changes, product line changes/disruptions, sale of business line or assets unfavorable macro/business cycle, unforeseen circumstances like strikes, fires, business related events, controversy, etc.

# Industry Specific (Event/Developments)

Special situations might arise due to regulatory changes, government reforms including disinvestment or privatization, change in macro-economic scenarios, change in tariffs/taxes, high leverage, change in market conditions. Most of these developments are likely to have an impact that is not easily measurable.

### Macro-economic/Global changes

Here are some instances of Special situations which may arise owing to global or domestic macro-economic changes. There may be unusually large swings in prices of raw material/final products in certain industries, any global/domestic event impacting Crude oil prices, any domestic event or macro environment impacting inflation, foreign exchange rates, Current account & Fiscal Deficits etc, Socio or financial crisis caused by Global political events etc.

# **Corporates Actions**

Special situations could also be Arbitrage opportunities arising out of buy-backs, mergers, disinvestment of business, large asset sales, special dividends, de-mergers, delisting, bonus & stock split, IPOs, QIPs, Parent sell down or creeping takeover by Parent, etc.

**Technological Disruption:** Companies in various sectors and industries are continually engaged in the process of technological innovation, addition of new product lines developed basis some new technology to suit the customer requirement. This would usually result in either one company leading the technological disruption while a few others getting disrupted. Both can be considered as opportunities for a Special Situations themed fund.

Such special situations and consequent investment opportunities are almost always available as there are a mix of company specific development/opportunities, changes or development in the macro environment or business cycle, any significant development at the sector or political scenario going on always. The frequency of such opportunities may increase or decrease but they continue to be available at all points in time.

It is important to note that special situation is a global theme. Such opportunities are available to all market participants including other equity funds such as diversified funds, thematic funds etc. However, it is important to note that while the opportunity is available to both diversified equity fund and special situation focused fund, the rationale and the way this opportunity will pan out is likely to differ. Same stock may be viewed and considered for fundamental reasons as maybe a value buy or a stock where a special situation exists. Hence, two different portfolio managers may pick the same stock with different expectations and maybe different holding periods too. Some of the key differentiators (including but not limited to) are as follows:-

**Holding Period:** The investment strategy and the special situation may be perceived by different portfolio managers for different time periods. Diversified equity funds usually

invest in companies with a secular growth potential in a medium to long term holding period so these funds may continue holding a stock even after the special situation has panned out. On the other hand, Special Opportunities Fund may consider benefitting from the same special situation only till the time the event plays out.

**Theme Allocation in the Portfolio**: A diversified equity fund may only allocate a smaller proportion of its overall portfolio to special situation as compared to a Special Situations Fund which has its whole portfolio dedicated to such opportunities theme. **Portfolio Concentration**: Given the investment universe available for Special Situations, a thematic fund, focused on Special Situations theme, is likely to have a higher portfolio concentration compared to a more diversified theme.

**Risk – Reward Positioning**: As mentioned above, compared to a more diversified mandate, a thematic fund based on Special Situations theme, is likely to be more aggressive and hence a higher risk-reward positioning. Hence, this fund may be more suitable for a more evolved or nuanced investment with a higher risk appetite as compared to a diversified equity fund which is suitable to a relatively conservative or a first time equity investor also.

There may also be such periods where owing to a variety of reasons, there is a shortfall of special situations where a fund may resort to some of the following amongst many things:

- Since this fund has the enablement to invest in foreign securities (upto 25% of the corpus), in periods where the opportunity in the India market may be limited, the portfolio manager may widen the scope of investing to international opportunities pertaining to special situations.
- Given that the impact of a certain special situation can be longer lasting and hence, the holding period of such companies which are expected to be beneficiaries of these special situations may also be extended.

The Scheme may also invest in ADR/GDR and equities of listed overseas companies. These investments will be made in line with the RBI and SEBI guidelines and will be within the limits prescribed by SEBI/RBI from time to time.

The Scheme may also invest a small portion of its corpus in money market instruments to manage its liquidity requirements. All companies selected will be analysed taking into account the business fundamentals like nature and stability of business, prospects of future growth and scalability, financial discipline and returns, valuations in relation to broad market and expected growth in earnings, the company's financial strength and track record.

The fund may make investments in debt securities and money market instruments issued by corporate and/or state and central government with the aim to controlling volatility and providing cash flows on a continuous basis. Rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC for its fixed income investments. In addition, the Investment Team of the AMC studies the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates.

The portfolio shall be structured so as to keep risk at acceptable levels and invest across market cap. This shall be done through various measures including:

- Ongoing review of relevant market, industry, sector and economic parameters.
- Investing in companies which have been researched. Companies deemed to be leaders in their respective products/industry.
- High quality businesses exhibiting favorable economics, capable and trustworthy management teams.
- Other parameters like operating profit margin, net profit margin, P/E ratio, better earnings visibility, etc.
- Investments in debentures and bonds will usually be in instruments which have been assigned investment grade ratings by any approved rating agency.

### **Derivatives**

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

ABSLAMC may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interests of the unitholders and if market conditions warrant it. Investments in securities and instruments not specifically mentioned earlier may also be made, provided they are permitted by SEBI/RBI and approved by the Trustee.

### Portfolio Turnover

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate.

A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges etc.

# Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in foreign securities, investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc., and risks associated with investments in units of REITs and InvITs. The Scheme may engage in Stock lending activities. The Scheme may also invest in mutual fund units as permissible. The Scheme shall not invest in Credit Default Swaps, short selling and debt instruments having Structured Obligations / Credit Enhancements. Different types of securities in which the Scheme would invest as given in the SID/KIM carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Schemes' investment objective will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of IDCWs and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Payout of IDCWs will be entirely at the discretion of the Trustees.

Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.
