Investment Strategy	<p>Floating rate debt issuance is a relatively new concept in India and has grown rapidly with the introduction and wide acceptance of benchmarks such as NSE MIBOR / Reuters MIBOR etc. The Government of India has also started issuing floating rate sovereign debt which is expected to give a major impetus to the pace of development of floating rate market in India. The scheme proposes to invest substantially in floating interest rate securities, fixed interest rate securities swapped for floating rate returns and fixed rate securities. The aim of the investment strategy is to generate stable returns by minimizing the interest rate risk in the short as well as long term.</p> <p>The domestic debt markets are maturing rapidly with improvement in liquidity in various debt segments as a result of introduction of new instruments and investors. The development of derivatives markets particularly swaps and Forward Rate Agreements (FRA) have made the environment more dynamic and has provided opportunity to manage interest rate more actively.</p> <p>The aim of the investment manager will be to allocate the assets of the scheme between various fixed interest rate securities and floating interest rate securities and use derivatives like swaps and FRAs effectively with the objective of achieving stable returns. The portfolio of the Long Term Plan will be normally skewed towards longer term maturities.</p> <p>The scheme will endeavour to minimise interest rate risk. Fixed interest rate securities are subjected to volatility in price movements corresponding to movements in interest rates. However, the interest rate in case of floating rate securities is reset in regular time intervals based on certain benchmark or a reference rate (eg. NSE Mibor, T Bill Yield, Reuters MIBOR, etc.). Hence the prices of these securities are less sensitive to interest rate fluctuation leading to minimal interest rate risk in case of floating interest rate securities.</p> <p>Floating interest rate securities market in India is in a developing phase. Government of India has started issuing Government securities carrying floating rate coupon payments. This will help the floating rate market to develop rapidly. A large number of corporates borrow their short term requirements and funds through floating rate instruments. However, as the markets develop corporates would start accessing the market for their long term requirement of funds at a floating rate.</p> <p>In the absence of floating rate securities, the same can be created synthetically with a combination of derivatives like Interest Rate Swaps and FRAs and fixed interest rate securities. The fixed income derivatives market has developed considerably during the last 2 years in India. The scheme intends to use derivatives as permitted by RBI/SEBI for hedging interest rate risk.</p> <p>The actual percentage of investments in various floating and fixed interest rate securities and position of derivatives will be decided after considering the prevailing political conditions, economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity as well as other considerations in the economy and markets</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme Specific Risk Factors are summarized below:</p> <p>Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in unrated securities, investments in Derivatives, including Interest rate swaps, (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans.
