| Investment<br>Strategy        | The Investment Philosophy of the fund manager is to generate superior risk-adjusted returns on a consistent basis through a research driven investment approach in line with the investment objective of the scheme. The investment manager will aim to allocate assets of the scheme between various money market and fixed income securities. The actual percentage of investment in various fixed income securities will be decided after considering various factors like the prevailing interest rate and inflation scenario, performance of corporate sector, general liquidity and other considerations.  |
| Risk Profile of the<br>Scheme | Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme Specific Risk Factors are summarized below:   |
|                               | <ul> <li>Risk Factors associated with investments in Fixed Income Securities:</li> <li>Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.</li> </ul>   |
|                               | • <b>Credit Risk:</b> In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.   |
|                               | Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.  |
|                               | • <b>Reinvestment Risk:</b> Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.  |
|                               | • <b>Pre-payment Risk:</b> Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.   |
|                               | Concentration Risk: The Scheme portfolio may have higher exposure to a single sector, subject to maximum of 25% of net assets as specified, depending upon availability of issuances in the market at the time of investment, resulting in higher concentration risk. Any change in government policy / business environment relevant to the sector may have an adverse impact on the portfolio.   |
|                               | <ul> <li>Different types of securities in which the scheme would invest as given in the Scheme Information<br/>Document carry different levels and types of risk. Accordingly the scheme's risk may increase or<br/>decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of<br/>risk than Government securities. Further even among corporate bonds, bonds, which are AA rated,<br/>are comparatively more risky than bonds, which are AAA rated.</li> </ul>   |

|                            | Risk Factors associated with Listing of units:   |  |  |  |  |
|----------------------------|--|--|--|--|--|
|                            | <ul> <li>Listing of units of the scheme on stock exchange(s) does not necessarily guarantee liquidity and<br/>there can be no assurance that an active secondary market for the units will develop or be<br/>maintained.</li> </ul>  |  |  |  |  |
|                            | <ul> <li>Trading in the units of the Scheme on the Exchange may be halted because of market conditions,<br/>including any halt in the operations of Depository Participants or for reasons that in view of the<br/>Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition,<br/>trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to<br/>stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock<br/>Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain<br/>unchanged.</li> </ul>  |  |  |  |  |
|                            | <ul> <li>Further, the Scheme being a close ended scheme and listed on stock exchange, as per SEBI guidelines, no redemption / repurchase / switches of units will be allowed prior to maturity under the scheme. The investors wishing to redeem their units may do so through stock exchange mode.</li> </ul>   |  |  |  |  |
|                            | <ul> <li>The Units of the scheme may trade above or below their face value / NAV. The NAV of the scheme will fluctuate with changes in the market value of schemes holdings. The trading prices of units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand which may even lead the units to quote at significant premium or discount to NAV.</li> </ul>   |  |  |  |  |
|                            | <ul> <li>There is a possibility that the unitholders find it difficult or uneconomical to liquidate their<br/>investments at any particular time. As a result, investors in the scheme must be prepared to hold<br/>the units until the maturity under the Scheme.</li> </ul>  |  |  |  |  |
|                            | <ul> <li>Regulatory Risk: Any changes in trading regulations by the Stock Exchange or SEBI, inter alia, may also result in wider premium/ discount to the NAV of the Schemes. Although the Units are proposed to be listed on the Stock Exchange, the AMC and the Trustees will not be liable for any loss suffered by investors due to delay in listing of units of the Schemes on the Stock Exchange or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.</li> </ul>   |  |  |  |  |
|                            | <ul> <li>As the units of the scheme may be held in electronic (demat) mode through depositories, the records of the depository shall be final with respect to the number of units available to the credit of unitholder. Settlement of trades, redemption/dividend payment, in lieu of such units held in electronic (demat) form, by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control.</li> </ul>  |  |  |  |  |
|                            | <ul> <li>Risk Factors associated with Close Ended Scheme:</li> <li>A close ended Scheme endeavours to achieve the capital appreciation only at the scheduled maturity of the Scheme. However, there is no assurance that the said objective will be achieved at the scheduled maturity of the scheme and there is a risk that the capital invested may not be fully realisable upon maturity of the scheme.</li> </ul>   |  |  |  |  |
|                            | • The scheme being close ended in nature does not allow redemption during the tenor of the scheme. Redemptions shall happen only at the time of maturity of the scheme, and hence returns generated by the scheme may be affected if the underlying markets are at unfavourable level at the time of maturity of the scheme.   |  |  |  |  |
|                            | <ul> <li>Investors who wish to exit/redeem before the scheduled maturity date may do so through the stock<br/>exchange mode. For the Units listed on the exchange, it is possible that the market price at which<br/>the Units are traded may be at a discount to the NAV of such Units. Hence, Unit Holders who sell<br/>their Units in a Scheme prior to maturity may not get the NAV returns.</li> </ul>  |  |  |  |  |
| Risk Control<br>Strategies | Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC. <b>Credit Risk</b> |  |  |  |  |
|                            | Every investment in Debt and Money Market Instruments of any issuer would be made in accordance with Credit policy as defined and established by AMC from time to time. The Credit Policy, which is reviewed and monitored on a regular basis by Investment Committee, inter alia, enumerates issuer selection process, the various parameters to be considered for setting up credit exposure limits and Credit authorisation matrix for such limits, credit monitoring process etc.  |  |  |  |  |
