Asset Allocation Pattern of the Scheme

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instrument	Normal Allocation (% of total Assets)	Risk Profile
Securities comprising of underlying benchmark Index	95 to 100%	Medium to high
Money Market Instruments including CBLO (with maturity not exceeding 91 days)	0 to 5%	Low

The net assets of the scheme will be invested predominantly in stocks constituting the S&P BSE SENSEX. This would be done by investing in all the stocks comprising the S&P BSE SENSEX in approximately the same weightage that they represent in the S&P BSE SENSEX. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme.

The scheme does not intend to invest in securitized debt instruments, ADR, GDR and Foreign securities. The scheme does not intend to invest in Credit default Swaps, repo in corporate debt securities, short selling and/or derivative instruments. The scheme shall not engage in securities lending

The cumulative gross exposure through equity shall not exceed 100% of the net assets of the scheme.

AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

Change in Asset Allocation

The Scheme, in general, will hold all the securities that comprise of underline Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.

The funds raised under the Scheme shall be invested only in securities as permitted by SEBI (Mutual Funds) Regulations, 1996.

Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index.

In the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to corporate action activity undertaken in the underlying securities to bring it in line with the underlying index. Also, the AMC shall ensure that in case of involuntary corporate action (Refer note 1) undertaken in the underlying securities, the portfolio will be realigned to the constituents of S&P BSE Sensex Index.

In case of such above mentioned deviations is due to voluntary corporate action, the AMC shall rebalance/realign within a period of 7 days. In case of any involuntary inclusion of non-eligible securities due to corporate actions as defined in the SEBI guidelines, the portfolio shall be rebalanced within a period of 30 days.

Note 1: The corporate action shall be in accordance with the SEBI Circular no. CIR/MRD/DP/32/2012 dated December 6, 2012.

- (i) **Involuntary corporate actions:** In case of corporate actions where investors has no choice in the matter, for example: demerger of companies, etc,
- (ii) **Voluntary corporate actions:** In case of corporate actions where investors has the option to exercise

	his choice and thereby result in debit of securities, for example: buy-back, etc, the same shall be considered as a sale transaction for the purpose of the scheme.
Investment Strategy	The Scheme would invest not less than 95% of its corpus in stocks comprising the underlying index and endeavour to track the benchmark index while minimizing the tracking error and therefore would follow a passive investment strategy. The Scheme would aim to maintain least amount of cash and will also try and avoid investment in debt and money market securities. This would only be for the purpose of redemption requirements.
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme Specific Risk Factors are summarized below:</p> <ul style="list-style-type: none"> • Liquidity Risk: Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged. • Regulatory Risk: Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant/ Large Investor to arbitrage resulting into wider premium/ discount to NAV. • Passive Management of Investments: Scheme shall follow a passive investment strategy and shall provide exposure to constituents of the underlying index with an aim to track its performance and yield as closely as possible. The scheme's performance may be affected by the general price decline in the stock markets relating to the underlying Index. The scheme shall invest in constituents of the underlying index regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets nor shall the scheme attempt to make individual stock selection. ETF being a passive management tool does not carry risk of active fund management. An actively managed mutual fund manager, on the other hand, can tailor portfolio holdings which are beyond the mandate of an ETF. ETFs are passively managed and hence the risk associated with the particular ETF corresponds closely to the risk of the underlying asset subclass the scheme is tracking. • Active Market: Although the scheme is proposed to be listed on exchanges, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available. • Tracking Error: The Fund Manager may not be able to invest the entire corpus in the same proportion as in the underlying index due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying index and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying index. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, dividend payout, time to reallocate the portfolio subsequent to changes in the underlying index etc. ABSLAMC will endeavor to keep the tracking error as low as possible. <p>It will be the endeavor of the fund manager to keep the tracking error as low as possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.</p> <ul style="list-style-type: none"> • Redemption Risk: Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Authorised Participant(s) to provide liquidity in secondary market on an ongoing basis. The Authorised Participant(s) would offer daily two-way quote in the market. • The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. And hence the units of the scheme may trade above or below the NAV. However given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the

arbitrage opportunity available.

- The index reflects the prices of securities at a point in time, which is the price at close of business day on BSE Limited (BSE). The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the BSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from BSE closing prices.
- The performance of the index will have a direct bearing on the performance of the scheme. Hence, any composition change made by the index service provider in terms of weightage or stocks selection will have an impact on the scheme.
- The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.
- The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.

Risks associated with investment in Equity and Equity related instruments:

- Equity and Equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- In respect of investments in equity and equity-related instruments, there may be risks associated with trading volumes, settlement periods and transfer procedures that may restrict liquidity of investments in equity and equity-related securities. In the event of inordinately large number of redemptions or of a restructuring of the schemes' investment portfolio, there may be delays in the redemption of units.
- Within the regulatory limits, the Fund Manager may choose to invest in unlisted securities that offer attractive yields. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may however increase the risk of the portfolio. The liquidity and valuation of the schemes' investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of disinvestments.
- Investment made in unlisted equity or equity-related securities may only be realizable upon listing of these securities. Settlement problems could cause the Scheme to miss certain investment opportunities.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment may not get implemented instantly.

Risk Factors associated with investments in Fixed Income Securities:

The Scheme intends to invest not less than 95% its corpus in the securities representing S & P BSE Index. As this Scheme endeavors to earn returns that closely correspond to the total returns represented by S&P BSE SENSEX Index, the Scheme will have insignificant cash or debt/ market investments. Therefore, the Scheme is not significantly susceptible to risks associated with debt/ money markets.

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed

income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

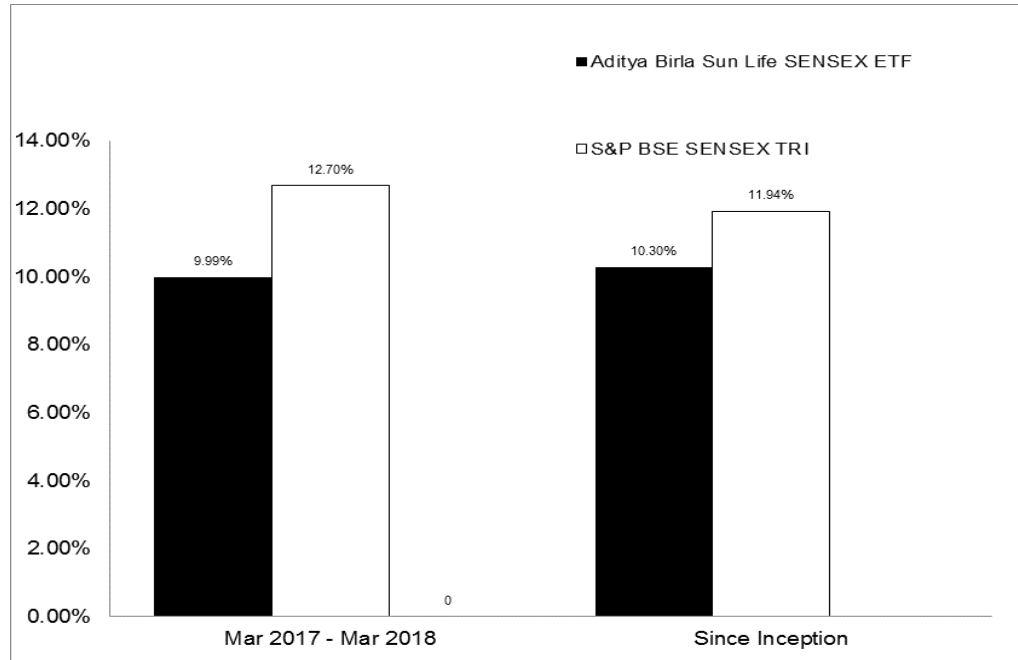

Risk Factors associated with Listing of units:

- Listing of units of the scheme on stock exchange(s) does not necessarily guarantee liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained.
- Trading in the units of the Scheme on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged
- Further, the Scheme being a close ended scheme and listed on stock exchange, as per SEBI guidelines, no redemption / repurchase / switches of units will be allowed prior to maturity of the scheme. The investors wishing to redeem their units may do so through stock exchange at prevailing listed price on such Stock Exchange.
- The Units of the scheme may trade above or below their face value / NAV. The NAV of the scheme will fluctuate with changes in the market value of schemes holdings. The trading prices of units of the scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand which may even lead the units to quote at significant premium or discount to NAV.
- There is a possibility that the Unitholders find it difficult or uneconomical to liquidate their investments at any particular time. As a result, investors in the scheme must be prepared to hold the units until the maturity under the Scheme.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange or SEBI, inter alia, may also result in wider premium/ discount to the NAV of the Scheme. Although the Units are proposed to be listed on the Stock Exchange, the AMC and the Trustees will not be liable for any loss suffered by investors due to delay in listing of units of the Scheme on the Stock Exchange or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- As the units of the scheme may be held in electronic (Demat) mode through depositories, the records of the depository shall be final with respect to the number of units available to the credit of unitholder. Settlement of trades, redemption/dividend payment, in lieu of such units held in electronic (demat) form, by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

<p>Risk Control Strategies</p>	<p>The Scheme aims to track the S&P BSE SENSEX as closely as possible before expenses. The index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.</p> <p>Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>For risk control, the following may be noted:</p> <p>Liquidity risks: The 30 stocks in the S&P BSE SENSEX are selected by applying liquidity as one of the criterion and hence the portfolio of the Scheme is highly liquid. The index is rebalanced based on certain criteria after which certain illiquid stocks are replaced by more liquid stocks. The fund manager makes the changes to the portfolio accordingly. Therefore liquidity issues in the scheme are not envisaged.</p> <p>Interest Rate Risk: Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well diversified portfolio may help to mitigate this risk.</p> <p>Volatility risks: ETF being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager</p>

- b. Employee Unique Identification Number (EUIN) is a unique number allotted to Sales personnel i.e. employee/ relationship manager/ sales person of the distributor interacting with the investor for the sale of mutual fund products. Such sales personnel associated with Distributor, should also be holding a valid NISM certificate. **Thus, in case of applications routed through distributors, in addition to the AMFI Registration Number (ARN) of the distributor, investors are requested to also provide the EUIN of the individual ARN holder or of employee/relationship manager/sale person of the Distributor interacting with the investor.** Providing appropriate EUIN in the application/transaction forms would assist in tackling the problem of mis-selling even if the Sales personnel on whose advice the transaction was executed by investor leaves the employment of the distributor or his/her sub broker. If the distributor has not given any advice pertaining to the investment (i.e. transaction is 'execution only'), then the EUIN box may be left blank, but it would be mandatory for the investor to provide confirmation as mentioned in the application form.
