In cases where unit holder uses a pre-printed transaction slip/application form where details in the 'ARN No' or 'Broker Code' column is already printed, unit holder should cancel the ARN No/ Broker Code, write 'DIRECT' in the said column. Also, in case ARN No/ Broker Code is mentioned in the application form, but "Direct Plan" is indicated, the ARN No/ Broker Code will be ignored and the application will be processed under Direct Plan, subject to it being complete in all other aspects. Further, where application is received for Regular Plan without Distributor code or "Direct" mentioned in the ARN Column, the application will be processed under Direct Plan.

- Value STP**
 - a. Value STP is a facility wherein Unit holder(s) can opt to transfer variable amounts into the Transferee Scheme from the Transferor Scheme on the date of transfer at predetermined intervals. The amount to be transferred will be arrived at on the basis of the difference between the Investment Value [(first installment amount) X (number of installments; including the current installment)] and the actual Market Value of the holdings in the Transferee Scheme on the date of transfer.
 - b. The first Value STP installment will be processed for the first installment amount specified by the Unitholder at the time of enrolment. From the second Value STP installment onwards, the transfer amount may be higher or lower than the first installment amount, as derived by the formula stated below:
 [(First installment amount) X (Number of installments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer)
 - c. On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that month [(first installment amount) X (number of installments; including the current installment)], then there would be no transfer effected from the Transferor Scheme.
 - d. If the amount of transfer as calculated by the above formula is less than Rs.500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme. However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.
- Minimum balance in the Scheme at the time of enrolment for any STP Facility: Daily STP ₹ 10,000/-, Weekly STP ₹ 6,000/-, Monthly STP ₹ 6,000/- Quarterly STP ₹ 8,000/-

Thereafter, transfers shall be effected on all business days at NAV based prices, subject to applicable exit load. Thus, in the event of an intervening non-business day STP triggers will not take place and consequently the total number of Daily STP installments opted by the investor will be adjusted to that extent i.e., For eg. if the investor has opted for 100 instalment and if 3 non-business days happen to occur in the intervening period, then only 97 Daily STP installments shall be triggered.
 - Weekly Systematic Transfer Plan:** Transfers shall be on Monday, Tuesday, Wednesday, Thursday or Friday of each week.

- Minimum Application Amount' specified in the SID(s) of the respective designated Transferee Scheme(s) will not be applicable for STP registration.
- Daily STP
 - a) There will be no maximum limit on number of transfers/duration for Daily STP enrolment. - Value STP**
 - a. Value STP is a facility wherein Unit holder(s) can opt to transfer variable amounts into the Transferee Scheme from the Transferor Scheme on the date of transfer at predetermined intervals. The amount to be transferred will be arrived at on the basis of the difference between the Investment Value [(first installment amount) X (number of installments; including the current installment)] and the actual Market Value of the holdings in the Transferee Scheme on the date of transfer.
 - b. The first Value STP installment will be processed for the first installment amount specified by the Unitholder at the time of enrolment. From the second Value STP installment onwards, the transfer amount may be higher or lower than the first installment amount, as derived by the formula stated below:
 [(First installment amount) X (Number of installments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer)
 - c. On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that month [(first installment amount) X (number of installments; including the current installment)], then there would be no transfer effected from the Transferor Scheme.
 - d. If the amount of transfer as calculated by the above formula is less than Rs.500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme. However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.
 - e. The total amount invested through Value STP over its tenure in the Transferee Scheme, may be higher or lower than the Total Investment Value of the investment i.e. the [(first installment amount) X (total number of installments specified by the Unitholder)]. This may be on account of fluctuations in the market value of the Units of the Transferee Scheme.
 - f. The maximum amount of transfer under this option would be limited to twice the amount per transfer specified in the application form.
 - g. The frequencies available under this facility are as follows: Monthly & Quarterly
 - h. The minimum number of installments and amount for enrolment to avail Value STP are as below:

Calculation of Value STP amount of the second installment i.e. 16-Feb-18:

- First Installment Amount- ₹ 10000/-
- Number of installments including the current installment is 2
- Total of 63.3995 units allotted up to the date of last installment i.e. January 2018 in ABSL Frontline Equity- Growth. The NAV of ABSL Frontline Equity- Growth on February 16, 2018 is 167.92/- per unit. Hence the market value of the investment in ABSL Frontline Equity- Growth on the date of transfer is ₹ 1,0646.04 [167.92 X 63.3995].
- Amount Derived for second installment Amount from the formula - [(First installment amount) X (Number of installments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer) is - [(₹ 10000) X 2] - ₹ 10,646.04 = ₹ 9,353.96

Investment Strategy	<p>Special Situations are exceptional market scenarios when the market offers businesses at prices which do not reflect the true potential or true value or there is a significant deviation from its own long-term trajectory. During such events, typically, the prospects of such impacted businesses are at an inflection point, such that market participants view such companies as departing from their traditional growth path, either up or down. As such, different portfolio managers could benefit out of the same opportunity in different ways (like going long or short on the same stock), but primarily focused on benefiting from the special situation.</p> <p>The Scheme will follow a bottom up approach for stock selection. The Scheme will invest in stocks with an emphasis on situations that are considered out-of-the-ordinary and therefore, present interesting stock picking opportunities.</p> <p>The list of special situations are mentioned below. The below list is only an indicative list and is not exhaustive.</p> <ol style="list-style-type: none"> Company Specific (Event/Developments) <p>These include factors like change in management, mergers & acquisitions, corporate restructuring, holding companies trading at discount, regulatory changes, product line changes/disruptions, sale of business line or assets unfavorable macro/business cycle, unforeseen circumstances like strikes, fires, business related events, controversy, etc.</p> 																

2. Industry Specific (Event/Developments)

Special situations might arise due to regulatory changes, government reforms including disinvestment or privatization, change in macro-economic scenarios, change in tariffs/taxes, high leverage, change in market conditions. Most of these developments are likely to have an impact that is not easily measurable.

3. Macro-economic/Global changes

Here are some instances of Special situations which may arise owing to global or domestic macro-economic changes. There may be unusually large swings in prices of raw material/final products in certain industries, any global/domestic event impacting Crude oil prices, any domestic event or macro environment impacting inflation, foreign exchange rates, Current account & Fiscal Deficits etc, Socio or financial crisis caused by Global political events etc.

4. Corporates Actions

Special situations could also be Arbitrage opportunities arising out of buy-backs, mergers, disinvestment of business, large asset sales, special dividends, de-mergers, delisting, bonus & stock split, IPOs, QIPs, Parent sell down or creeping takeover by Parent, etc.

5. Technological Disruption: Companies in various sectors and industries are continually engaged in the process of technological innovation, addition of new product lines developed basis some new technology to suit the customer requirement. This would usually result in either one company leading the technological disruption while a few others getting disrupted. Both can be considered as opportunities for a Special Situations themed fund.

Such special situations and consequent investment opportunities are almost always available as there are a mix of company specific development/opportunities, changes or development in the macro environment or business cycle, any significant development at the sector or political scenario going on always. The frequency of such opportunities may increase or decrease but they continue to be available at all points in time.

It is important to note that special situation is a global theme. Such opportunities are available to all market participants including other equity funds such as diversified funds, thematic funds etc. However, it is important to note that while the opportunity is available to both diversified equity fund and special situation focused fund, the rationale and the way this opportunity will pan out is likely to differ. Same stock may be viewed and considered for fundamental reasons as maybe a value buy or a stock where a special situation exists. Hence, two different portfolio managers may pick the same stock with different expectations and maybe different holding periods too. Some of the key differentiators (including but not limited to) are as follows:

- **Holding Period:** The investment strategy and the special situation may be perceived by different portfolio managers for different time periods. Diversified equity funds usually invest in companies with a secular growth potential in a medium to long term holding period so these funds may continue holding a stock even after the special situation has passed out. On the other hand, Special Opportunities Fund may consider benefiting from the same special situation only till the time the event plays out.
- **Theme Allocation in the Portfolio:** A diversified equity fund may only allocate a smaller proportion of its overall portfolio to special situation as compared to a Special Situations Fund which has its whole portfolio dedicated to such opportunities theme.
- **Portfolio Concentration:** Given the investment universe available for Special Situations, a thematic fund, focused on Special Situations theme, is likely to have a higher portfolio concentration compared to a more diversified theme.
- **Risk – Reward Positioning:** As mentioned above, compared to a more diversified mandate, a thematic fund based on Special Situations theme, is likely to be more aggressive and hence a higher risk-reward positioning. Hence, this fund may be more suitable for a more evolved or nuanced investment with a higher risk appetite as compared to a diversified equity fund which is suitable to a relatively conservative or a first-time equity investor also.

There may also be such periods where owing to a variety of reasons, there is a shortfall of special situations where a fund may resort to some of the following amongst many things:

- Since this fund has the enablement to invest in foreign securities (upto 25% of the corpus), in periods where the opportunity in the India market may be limited, the portfolio manager may widen the scope of investing to international opportunities pertaining to special situations.
- Given that the impact of a certain special situation can be longer lasting and hence, the holding period of such companies which are expected to be beneficiaries of these special situations may also be extended.

The Scheme may also invest in ADR/GDR and equities of listed overseas companies. These investments will be made in line with the RBI and SEBI guidelines and will be within the limits prescribed by SEBI/RBI from time to time.

The Scheme may also invest a small portion of its corpus in money market instruments to manage its liquidity requirements. All companies selected will be analysed taking into account the business fundamentals like nature and stability of business, prospects of future growth and scalability, financial discipline and returns, valuations in relation to broad market and expected growth in earnings, the company's financial strength and track record.

The fund may make investments in debt securities and money market instruments issued by corporate and/or state and central government with the aim to controlling volatility and providing cash flows on a continuous basis. Rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC for its fixed income investments. In addition, the Investment Team of the AMC studies the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates.

The portfolio shall be structured so as to keep risk at acceptable levels and invest across market cap. This shall be done through various measures including:

- Ongoing review of relevant market, industry, sector and economic parameters.
- Investing in companies which have been researched. Companies deemed to be leaders in their respective products/industry.
- High quality businesses exhibiting favorable economics, capable and trustworthy management teams.
- Other parameters like operating profit margin, net profit margin, P/E ratio, better earnings visibility, etc.
- Investments in debentures and bonds will usually be in instruments which have been assigned investment grade ratings by any approved rating agency.

ABSLAMC may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interests of the unitholders and if market conditions warrant it. Investments in securities and instruments not specifically mentioned earlier may also be made, provided they are permitted by SEBI/RBI and approved by the Trustee.

Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in foreign securities, investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc., and risks associated with investments in units of REITs and InvTs. The Scheme may engage in Stock lending activities. The Scheme may also invest in mutual fund units as permissible. There can be no assurance that a Schemes' investment objective will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of the Trustees. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for detailed scheme specific risk factors.

Risk Control

Investments made by the Scheme would be in accordance with the investment objectives of the Scheme and provisions of SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The Scheme would invest in a diversified portfolio of equity and equity related securities which would help alleviate the credit, sector/market capitalization related concentration risk. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in. The Scheme may also use various derivative products for the purpose of trading, hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.
