Dividends, if declared, will be paid (subject to deduction of tax at source, if any) to those Unitholders, whose names appear in the register of Unitholders on the notified record date. AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that actual declaration of dividends and frequency thereof is at the discretion of trustees. There is no assurance or guarantee to Unitholders as to the rate of dividend distribution nor that the dividends will be paid regularly. The dividends shall be paid in the name of the sole / first holder and, if applicable, will be posted to the Registered Address of the sole / first holder in the original application form. To safeguard the interest of the unit holders from loss/ theft of dividend cheques, investors should provide the name of their bank, branch, account number and IFSC/ MICR Number in the application form. Dividend cheques will be sent to the unit holder after incorporating such information. However, AMC will endeavor to credit the dividend payouts directly to the designated Bank A/c of the unitholder through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit / NECS). AMC reserves the right to use any of the above mode of payment as</p>

deemed appropriate for all folios where the required information is available. On payments of dividends, the NAV will stand reduced by the amount of dividend paid and the dividend distribution tax, if applicable. In case the Dividend amount payable is less than or equal to Rs. 250/- (Rupees Two Hundred and Fifty only) the same will be compulsorily reinvested in the corresponding Scheme(s)/Plan(s) on the ex-dividend date at Applicable NAV. The amount of dividend reinvested will be net of applicable taxes.

**Dividend Reinvestment Facility**

Unitholders opting for dividend option may choose to reinvest the dividends to be received by them in additional units of the scheme. Under this facility the dividend due and payable to the unitholders will be compulsorily and without any further act by the unitholders, reinvested in the dividend option (on the next business day after the record date) at a price based on the prevailing Ex-Dividend Net Asset Value (NAV derived post declaration of dividend) per unit on the record date. The amount of dividend reinvested will be net of tax deducted at source, wherever applicable. Reinvestment of dividend shall constitute a constructive payment of dividends to the unitholders and a constructive receipt of the same amount from each unitholder for reinvestment in units. On reinvestment of dividends, the number of units to the credit of the unitholders will increase to the extent of the dividend reinvested divided by the applicable NAV as explained above. There shall, however, be no entry/sales load on the dividends so reinvested.

**Dividend Sweep Facility**

Under Dividend Sweep Facility, Unitholders can now opt for transferring the dividend earned under open ended Debt / Equity Schemes to the Growth Option of any open - ended Debt / Equity Schemes of the Fund. The criteria of complying with the 'Minimum Application Amount' specified in the SID for respective Target Scheme will not be applicable to avail this facility. For instance, if the minimum application amount for fresh purchases in Aditya Birla Sun Life Equity Hybrid '95 Fund - Direct Plan - Growth Option is Rs. 5,000/-, Unitholder can avail the facility even if the amount of dividend is less than Rs. 5,000/- (subject to a minimum of Rs.1,000/-). The minimum amount of dividend eligible for transfer (net of applicable taxes, if any) under Dividend Sweep Facility is Rs. 1,000/- (Rupees One Thousand Only). In case the dividend amount to be transferred is less than the eligible amount, then the dividend will be re-invested in the Scheme or paid to the Unitholder as per the existing option opted by the Unitholder. This facility shall not be available to the Unitholders who have opted for Reinvestment facility under Daily Dividend Option under Source Scheme(s). Unitholders will have the right to discontinue the facility at any time by sending a written request to the Investor Service Centres (ISCs) of Aditya Birla Sun Life AMC Limited. Notice of such discontinuance should be received at least 7 (seven) business days prior to the Dividend Record Date. On receipt of the valid request, the facility will be terminated. This facility shall be processed on the record date of the dividend declared under the Scheme. Further this facility shall not allow for switch of partial dividend or switch of dividend to multiple schemes.

**Growth Option**

Under this option, no dividends will be declared. The income attributable to units under this option will continue to remain invested and will be reflected in the NAV of the units under this option.

<p><b>Default Plan / Option / Sub-option</b>  (In case the investor fails to specify his preference, the given default plan / option / sub-option would apply)</p>	<p><b>Default Option/ Sub-Option:</b> Daily Dividend Option (Reinvestment Facility). ## Section I – INTRODUCTION

### A. RISK FACTORS

#### STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Overnight Fund is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

#### SCHEME SPECIFIC RISK FACTORS

##### Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and Money Market Instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a Money Market Instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

##### Risk Factors associated with investments in Derivatives:

- As and when any Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates

and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

- Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place.
- The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.
- The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- Risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potential high volatility of the futures markets.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

#### **Risks associated with investments in Securitised Debt:**

Domestic securitised debt assets would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The Securitised debt assets and the underlying asset classes like housing loans, Auto Loans and Corporate loans have the following risk factors.

- **Limited Recourse and Credit Risk:** Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.
- **Bankruptcy Risk:** If the originator of securitised debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- **Risk of Co-mingling:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

#### **Risks associated with Mortgage Backed Securities (MBS) - Housing Loans**

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
- **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

#### **Risks associated with Asset Backed Securities (ABS)-Auto Loans.**

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of

prepayments may be influenced by a variety of economic, social and other factors. Prepayments in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.

- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

#### **Risks associated with Asset Backed Securities (ABS) - Corporate Loans**

- **Credit Risk:** The fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the Borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.
- **Prepayment Risk:** The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the fund.
- **Limited Liquidity and Price Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

**Risks associated with Stock Lending:** The scheme shall not engage in Stock Lending activities.

**Risks Factors Associated With Short Selling:** The scheme shall not engage in Short Selling activities.

#### **Risks factors associated with investments in Repo transactions in Corporate Bond:**

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.
- **Collateral Risk:** Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA or equivalent and above rated money market and corporate debt securities. Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. The fund manager shall then arrange for additional collateral from the counterparty, within a period of 1 business day. If the counterparty is not able to top-up either in form of cash / collateral, it shall tantamount to early termination of the repo agreement.

## **B. RISK CONTROL STRATEGIES**

Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in. The Scheme may also use various derivatives products for the purpose of trading, hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

**Credit Risk**

Every investment in Debt and Money Market Instruments of any issuer would be made in accordance with Credit policy as defined and established by AMC from time to time. The Credit Policy, which is reviewed and monitored on a regular basis by Investment Committee, inter alia, enumerates issuer selection process, the various parameters to be considered for setting up credit exposure limits and Credit authorisation matrix for such limits, credit monitoring process etc.

The following parameters shall be considered for selection:

- (i) The exposure to a counter party is based on the networth of the counterparty. The fund manager would do a risk assessment of the issuer before making the investments. Further, continuous monitoring of the networth of the company is done. The risk assessment by the fund manager includes the monitoring of the following:
  - I. Capital Structure
  - II. Debt Service coverage ratio
  - III. Interest coverage
  - IV. Profitability margin
  - V. Current ratio
- (ii) The fund managers determine the sector to which the counter party relates. The fund managers assigns risk weightages to sectors and shall not invest in sectors which carry a high credit risk. The risk weightages are based upon various factors like the nature of products/services of the sector, current state and future outlook for the sector, subsidies provided to the sector and government regulations for the sector.
- (iii) The fund manager shall also check the track record of the company in terms of its financials and any defaults to its creditors.
- (iv) The fund managers shall consider the track record of the sponsor/ parent of the counterparty. It includes the financials of the sponsor/ parent company and whether the parent/sponsor has defaulted in the past.
- (v) The fund manager can also have a call with the Management of the company as a part of its research of the company.
- (vi) The fund manager will also check for Credit Default Swaps spreads of the company in global market, if any available.

The above parameters are dependent upon the information available at the time of due diligence. The fund manager shall endeavour to include all these parameters but investors should note that these parameters are indicative and can change from time to time at the discretion of the fund manager.

**Price-Risk or Interest-Rate Risk**

The fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.

**Reinvestment Risk**

Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.

**Concentration Risk**

The Fund Manager shall endeavor to mitigate the risk by taking exposure to high rated instruments and locking in at the point of investment to such issuance yields.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

**C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the

Mutual Fund on the applicable NAV on the 15<sup>th</sup> day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

## D. SPECIAL CONSIDERATIONS

- Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Schemes. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unitholder is advised to consult his / her own professional tax advisor.
- The NAV of the Schemes may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures.
- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in Statement of Additional Information (SAI) / SID.
- Mutual Funds are vehicles of securities investments that are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Schemes. The various factors that impact the value of the Scheme's investments include, but are not restricted to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- Redemptions due to change in the fundamental attributes of the Schemes or due to any other reasons may entail tax consequences.
- Growth, appreciation, dividend, bonus, income, etc. if any, referred to in this Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
- Investors should study this SID carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, investment or any other matters. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before taking a decision to invest/redeem Units. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors associated with the scheme.
- From time to time, funds managed by the affiliates / associates of the Sponsor may invest either directly or indirectly in the Scheme. The funds managed by these affiliates/associates may acquire a substantial portion of the Scheme's Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- A Unitholder may invest in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unitholder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.
- Within the regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may however increase the risk of the portfolio.
- Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times and that the decisions made by the fund manager may not always be profitable. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- In respect of transaction in Units of the Scheme through Stock Exchange Platform for Mutual Funds, allotment and redemption of Units on any Business Day will depend upon the modalities of processing viz. collection of application form, the order processing / settlement by respective stock exchanges and their respective clearing corporations, on which the Fund has no control. Moreover, transactions conducted through the Stock Exchange Platform shall be governed by the guidelines and directives issued by respective recognised stock exchange(s).
- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the schemes of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing.

In the money market, activity levels of the Government and Non-Government Debt vary from time to time. Instruments that comprise a major portion of money market activity include but are not limited to,

- CBLO/Tri-party Repo
- Treasury Bills
- Government Securities with a residual maturity of < 1 year
- Commercial Paper
- Certificates of Deposit
- Banks Rediscounting Scheme (BRDS)

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. PSU / DFI / Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The following table gives approximate yields prevailing on October 12, 2018 on some instruments. These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in the macro economic conditions and RBI Policies.

Generally, for instruments issued by a non-Government entity (corporate/PSU bonds), the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on various factors including the credit rating of the entity.

**Additional disclosures w.r.t. Investments in Securitised Debt:**
**1. How the risk profile of securitized debt fits into the risk appetite of the scheme**

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. The asset may be either a loan to a single counterparty or a pool of loans. In this scheme the Fund manager ensures that as securitised debt instruments are relatively illiquid, the fund manager buys these with a view to hold them till maturity. Thus, In line with the investment strategy of the Scheme and considering that there would be no intermediate redemption pressures for the Fund Manager, the Scheme may take limited exposure to rated Securitized Debt. Credit assessment of the underlying asset or loans is done to evaluate if it meets internal norms set by the AMC.

Investment in these instruments will help the Scheme in aiming at reasonable returns. These returns come with a certain degree of risks which are covered separately in the SID. Accordingly, the risk profile of the securitised debt instruments matches that of the prospective investors of this Scheme and hence can be considered in the fund universe.

**2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.**

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

The scheme will invest in instruments of the originator only if the originator has an investment grade rating. Over and above the credit rating assigned by credit rating agencies to the originator, ABSLMF will conduct an additional evaluation on:

- Previous track record on origination, servicing and performance of existing pools
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
  - Outlook for the economy (domestic and global)
  - Outlook for the industry
  - Originator/Pool specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the company as well as agency. For single loan PTC, credit evaluation of the underlying corporate will be carried out as with any other debt instruments.

**3. Risk mitigation strategies for investments with each kind of originator**

In terms of specific risks attached to securitization, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks

## Aditya Birla Sun Life Overnight Fund

would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher, which helps in making their overall risks comparable to other AAA rated asset classes.

The Scheme may invest in securitized debt assets. The asset may be either a loan to a single counterparty or a pool of loans. The Scheme intends to invest in securitized instruments rated by a SEBI recognized credit rating agency. In addition, some specific risk mitigation measures will include:

**Limited Recourse and Credit Risk:** Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme.

**Risk Mitigation:** In addition to careful scrutiny of credit profile of borrower/pool additional security in the form of adequate cash collaterals and other securities may be obtained to ensure that they all qualify for similar rating.

**Bankruptcy Risk:** If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', and then the Scheme could experience losses or delays in the payments due.

**Risk Mitigation:** Normally, specific care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'. It is also in the interest of the originator to demonstrate the transaction as a true sell to get the necessary revenue recognition and tax benefits.

### **Limited Liquidity and Price risk**

Presently, secondary market for securitized papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

**Risk Mitigation:** Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity. The liquidity risk and HTM nature is taken into consideration at the time of analyzing the appropriateness of the securitization.

### **Risks due to possible prepayments: Weighted Tenor / Yield**

Asset securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

**Risk Mitigation:** A certain amount of prepayments is assumed in the calculations at the time of purchase based on historical trends and estimates. Further a stress case estimate is calculated and additional margins are built in.

### **Bankruptcy of the Investor's Agent**

If Investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement.

**Risk Mitigation:** All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent.

### **4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments**

Framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

**Aditya Birla Sun Life Overnight Fund**

Characteristics / Type of Pool	Mortgage Loan/ Loan Against Properties	Commercial Vehicle & Construction Equipment	Car	Two Wheeler	Micro Finance Pools	Personal Loans	Single Sell Downs	Others

Information illustrated in the Table above, is based on the current scenario relating to Securitized Debt market and is subject to change depending upon the change in the related factors.

We endeavor to consider some of the important risk mitigating factors for securitized pool i.e.

- Average maturity of the pool: based on different asset classes and current market practices
- Collateral margin including cash collateral and other credit enhancements
- Loan to Value Ratio
- Average seasoning of the pool,
- Default rate distribution
- Geographical Distribution
- Maximum single exposure: Retail pools (passenger cars, 2-wheelers, Micro finance, personal loans, etc.) are generally well diversified with maximum and average single exposure limits within 1%.

As illustrated above, these factors vary for different asset classes and would be based on interactions with each originator as well as the credit rating agency.

**5. Minimum retention period of the debt by originator prior to securitization**

The Mutual Fund will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

**6. Minimum retention percentage by originator of debts to be securitized**

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

**7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund**

Investments made by the scheme in any asset are done based on the requirements of the scheme and is in accordance with the investment policy. All Investments are made entirely at an arm's length basis with no consideration of any existing / consequent investments by any party related to the transaction (originator, issuer, borrower etc.). Investments made in Securitized debt are made as per the Investment pattern of the Scheme and are done after detailed analysis of the underlying asset. There might be instances of Originator /obligor investing in the same scheme but both the transactions are at arm's length and avoid any conflict of interest. In addition to internal controls in the fixed income investment process, there is regular monitoring by the compliance team, risk management group, and internal review teams. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

**8. In general, the resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt**

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized debt are done after appropriate research by credit analyst. The ratings are monitored for any movement. The entire securitized portfolio is published in the fact sheet and disclosed in the web site for public consumption with details of underlying exposure and originator.

**Trading in Derivatives**

SEBI has permitted Mutual Funds to participate in derivatives trading subject to observance of guidelines issued by it in this behalf. Accordingly, Mutual Funds may use various derivative products from time to time, as

## Aditya Birla Sun Life Overnight Fund

would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

### Exposure to Derivatives

Further, the exposure limits for trading in derivatives by Mutual Fund specified by SEBI vide its circular Ref. No. Cir/IMD/DF/11/2010 dated August 18, 2010, is as follows:

1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following
  - Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
  - Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1
  - Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
  - The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point (1) above.
8. Definition of Exposure in case of derivatives positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

### Example of a derivatives transaction

#### Basic Structure of a Swap

Bank A has a 6 month Rs. 10 crore liability, currently being deployed in call. Bank B has a Rs 10 crore 6 month asset, being funded through call. Both banks are running an interest rate risk. To hedge this interest rate risk, they can enter into a 6 month MIBOR (Mumbai Inter Bank Offered Rate) swap. Through this swap, A will receive a fixed preagreed rate (say 7%) and pay "call" on the NSE MIBOR ("the benchmark rate"). His paying at "call" on the benchmark rate will neutralise the interest rate risk of lending in call. B will pay 7% and receive interest at the benchmark rate. His receiving of "call" on the benchmark rate will neutralise his interest rate risk arising from his call borrowing. The mechanism is as follows:

- Assume the swap is for Rs 10 crore March 1st to September 1st. A is a fixed rate receiver at 7% and B is a floating rate receiver at the overnight compounded rate.
- On March 1st, A and B will exchange only an agreement of having entered this swap. This documentation would be as per International Securities Dealers Association (ISDA).
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On September 1st they will calculate the following:

A is entitled to receive interest on Rs 10 crore at 7% for 184 days i.e. Rs 35.28 lakh, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.

B is entitled to receive daily compounded call rate for 184 days & pay 7% fixed.

On September 1st, if the total interest on the daily overnight compounded benchmark rate is higher than Rs 35.28 lakhs, A will pay B the difference. If the daily compounded benchmark rate is lower, then B will pay A the difference.

## Aditya Birla Sun Life Overnight Fund

Effectively Bank A earns interest at the rate of 7% p.a. for six months without lending money for 6 months fixed, while Bank B pays interest @ 7% p.a. for 6 months on Rs 10 crore, without borrowing for 6 months fixed. As per abovesaid RBI circulars, mutual funds are permitted to do Interest Rate Swaps/Forward Rate Agreements, for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Derivatives can be traded over the exchange or can be structured between two counter-parties. Those transacted over the exchange are called Exchange Traded derivatives whereas the other category is referred to as OTC (Over the Counter) derivatives. Some of the differences of these two derivative categories are as under:

Some of the differences of these two derivative categories are as under:

**Exchange traded derivatives:** These are quoted on the exchanges like any other traded asset class. The most common amongst these are the Index Futures, Index Options, Stock Futures and Options on individual equities / securities. The basic form of the futures contract is similar to that of the forward contract, a futures contract obligates its owner to purchase a specified asset at a specified exercise price on the contract maturity date. Futures are cash-settled and are traded only in organised exchanges. Exchange traded derivatives are standardised in terms of amount and delivery date. Standardisation and transparency generally ensures a liquid market together with narrower spreads. On the other hand, for delivery dates far in the future, there may be insufficient liquidity in the futures market whereas an OTC price may be available.

**OTC derivatives:** OTC derivatives require the two parties engaging in a derivatives transaction to come together through a process of negotiation. It is a derivative that is customised in terms of structure, amount, tenor, underlying assets, collateral etc.

### Investment process and recording of Investment Decisions

The AMC through its various policies and procedures defines prudential and concentration limits to de-risk the portfolio. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The responsibility for the investment decisions is with the fund managers and the CEO of the AMC does not have any role in the day to day decision making process. All the decisions will be recorded alongwith their justifications. The AMC and Trustee will review the performance of the scheme in their Board meetings. The performance would be compared with the performance of the benchmark index and with peer group in the industry.

### Investment in other Schemes

The Scheme may, in line with its investment objectives, invest in another Scheme under the management of ABSLAMC or of any other Asset Management Company. The aggregate Interscheme investment by ABSLMF under all its Schemes, other than fund of fund schemes, taken together, in another Scheme managed by ABSLAMC or in any other Scheme of any other Mutual Fund, shall not be more than 5% of the net asset value of the Fund. No fee shall be charged by the AMC on any investment in another Scheme under the management of ABSLAMC or of any other Asset Management Company.

### Investments in the Scheme by the AMC, Sponsor, or their affiliates

Under Regulation 28(4) of the SEBI (MF) Regulations, 1996 inserted by Gazette Notification No. LADNRO/Gn/2014-15/01 dated May 06, 2014, the AMC shall invest in the Scheme and such investment will not be redeemed unless the Scheme is wound up.

In addition to investments as mandated under Regulation 28(4) of the Regulations as mentioned above, the AMC, may invest in the scheme during the continuous offer period subject to the SEBI (MF). As per the existing SEBI (MF) Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the scheme. The Sponsor, Trustee and their associates or affiliates may invest in the scheme on an ongoing basis subject to SEBI (MF) Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time.

### Investment of Subscription Money

The AMC shall commence investment out of the NFO proceeds received in accordance with the investment objectives of the Scheme only on or after the closure of the NFO period. The Mutual Fund/ AMC can however deploy the NFO proceeds in CBLO/Tri-party Repo before the closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in CBLOs/Tri-party Repos during the NFO period. The appreciation received from investment in CBLO/Tri-party Repo shall be passed on to investors.

## Aditya Birla Sun Life Overnight Fund

Further, in case the minimum subscription amount is not garnered by the scheme during the NFO period, the interest earned upon investment of NFO proceeds in CBLO/Tri-party Repo shall be returned to investors, in proportion of their investments, along-with the refund of the subscription amount.

### **Borrowing by the Mutual Fund**

Under the SEBI (MF) Regulations, the Mutual Fund is allowed to borrow to meet the temporary liquidity requirements of its Scheme for the purpose of Redemption of Units or the payment of interest or dividend to the Unit holders. Further, as per the SEBI (MF) Regulations, the Mutual Fund shall not borrow more than 20% of the Net Assets of the scheme and the duration of such borrowing shall not exceed a period of six months. The Mutual Fund may raise such borrowings after approval by the Trustee from Sponsor or any of its Associate / Group Companies or Banks in India or any other entity at market related rates prevailing at the time and applicable to similar borrowings. The security for such borrowings, if required, will be as determined by the Trustee.

## **E. INVESTMENT STRATEGY**

- i. The primary investment objective of the scheme is to generate regular returns in line with the overnight rates. Investments would be made normally in short term instruments including CBLO/Tri-party Repo / Reverse repos, debt instruments with overnight maturity / liquidity. Price volatility of a fixed interest security increases with the residual maturity of the security. The scheme intends to hold short-term securities to minimize price volatility. Individual instruments are selected based on yield, liquidity, credit risk of issuer, exposure to issuer, etc.
- ii. **Portfolio Turnover-** The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavors to maintain a low portfolio turnover rate. Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other Money Market Instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.

## **F. FUNDAMENTAL ATTRIBUTES**

Following are the fundamental attributes of the scheme, in terms of Regulation 18 (15A) of the SEBI Regulations

- **Type of Scheme:** An open ended debt scheme investing in overnight securities.
- **Investment objective:** To generate reasonable income through investments in debt securities, Money Market Instruments & CBLO/Tri-party Repo having maturity of 1 day.  
**The Scheme does not guarantee/indicate any returns. There can be no assurance that the schemes' objectives will be achieved.**
- **Asset Allocation Pattern:**  
Please refer to 'Section II - C. Asset Allocation and Investment Pattern' of this SID for details.

  - A written communication about the proposed change is sent to each Unitholders and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
  - The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

## G. BENCHMARK

The performance of the scheme will be benchmarked to the performance of **CRISIL Overnight Index**.

### Rationale for adoption of benchmark:

CRISIL Overnight Index track the performance of a money market portfolio with a 100% allocation to CBLOs/Tri-party Repos or securities maturing in one day. Thus, on the basis of the investment pattern/objective of the scheme and the composition of the index the Benchmark has been chosen.

**Value Systematic Transfer Plan (Value STP):**

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Aditya Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the

Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- a. In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per installment OR the amount as determined by the following formula whichever is higher:

*[(First installment amount) X (Number of installments including the current installment)] less (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer).*

If the amount of transfer as calculated by the above formula is less than Rs. 500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.

- b. The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment. From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.
- c. The minimum number of installments and amount for enrollment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th,	For STP installments greater than Rs 500 but less than Rs. 999, Unitholders are required to instruct for minimum 12 transfers of Rs 500 and in multiples of Re. 1 thereafter.
Quarterly	14th, 20th, 21st, 28th	
		For STP installments of Rs 1000 and above, Unitholders are required to instruct for minimum 6 transfers of Rs 1000 and in multiples of Re. 1 thereafter.

- d. The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.
- e. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.
- f. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- g. In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.
- h. A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.

### III. SWITCHING

#### (a) Inter - Scheme Switching option

Unit holders under the Scheme have the option to Switch part or all of their Unit holdings in the Scheme to other schemes managed by the Mutual Fund and vice versa, as per the features of the respective scheme. This Option will be useful to Unit holders who wish to alter the allocation of their investment among various scheme(s) / plan(s) of the Mutual Fund (subject to completion of lockin period, if any, of the units of the scheme(s) from where the units are being switched) in order to meet their changed investment needs. The Switch will be effected by way of a Redemption of Units from the Scheme / Plan and a reinvestment of the Redemption proceeds in the scheme / plan and accordingly, to be effective, the Switch must comply with the Redemption rules and the issue rules of the respective scheme (for e.g. as to the minimum number of Units that may be redeemed or issued, Exit Load etc). The price at which the Units will be Switched out of the respective Scheme/ Plan will be based on the Redemption Price, and the proceeds will be invested at the prevailing sale price for units in that scheme / plan.

#### (b) Intra-Scheme Switching option:

Unit holders under the Scheme have the option to Switch their Unit holdings from Growth option to Dividend option or vice-versa within the same Plan offered under the Scheme. No Exit Load will be charged in respect of such Intra-Scheme Switching. The switches would be done at the applicable NAV based prices and the difference between the NAVs of the two options will be reflected in the number of units allotted.

However, switch transactions are currently not available in case of units held in electronic (demat) mode. To affect a switch, a Unit Holder must provide clear instructions. Such instructions may be provided in writing or by completing the transaction slip/form attached to the account statement. The switch request can be made for an amount equivalent or higher than the minimum application amount of the scheme into which the switch is made. A Unit holder may request switch of a specified amount or a specified number of Units only. If the Unit holder has specified both the amount and the number of Units, switch-out of units will be carried out based on the number of units specified by the Unit holder.

## D. COMPUTATION OF NET ASSET VALUE

The Net Asset Value (NAV) per Unit of the scheme will be computed by dividing the net assets of the scheme by the number of Units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

NAV of Units under the scheme shall be calculated as shown below:

$$\begin{aligned}
 & \text{Market or Fair Value of the scheme's Investments} \\
 & + \text{Current Assets (including accrued income)} \\
 & - \text{Current Liabilities and Provisions (including accrued expenses)}
 \end{aligned}$$

$$\text{NAV (₹) per Unit} = \frac{\text{Market or Fair Value of the scheme's Investments} + \text{Current Assets (including accrued income)} - \text{Current Liabilities and Provisions (including accrued expenses)}}{\text{No. of Units outstanding under the scheme}}$$

The AMC will calculate and disclose the NAV of the scheme on every business day. The NAVs of the Scheme will be calculated upto four decimals and units allotted upto three decimals. NAVs of growth option and dividend option will be different after the declaration of first dividend.

	<b>Amount (Rs.)</b>	<b>Units</b>	<b>NAV (Rs.)</b>
Invested on March 31, 2016 (A)	10,000.00	950.299	10.523
Value of above investment as on March 31, 2017 (post all applicable expenses) (B)	10,902.89	950.299	11.473
Expenses charged during the year (C)	150.00		
Value of above investment as on March 31, 2017 (after adding back all expenses charged) (D) [D= B+C]	11,052.89	950.299	11.631
Returns (%) (post all applicable expenses) (E) [E= (B-A)/A]		9.03%	
Returns (%) (without considering any expenses) (F) [F= (D-A)/A]		10.53%	

Note(s):

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.
- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.
