Enterprise Value (EV)

Definition: Enterprise Value is a measure of a company's total value, often considered as the theoretical price to acquire the entire business. It includes not just the equity value (market capitalization) but also accounts for debt and subtracts cash, giving a more comprehensive picture than market cap alone.

Explanation

Enterprise Value is a comprehensive measure of a **company's** total valuation. Unlike Market Capitalization, which only considers equity value (share price \times number of shares), EV includes debt, preferred equity, and minority interest, and subtracts cash and cash equivalents. This gives a more accurate picture of what it would cost to acquire the entire business.
