Term of the Day

Dark Pools

Definition: Dark pools are private, non-public trading venues where large institutional investors can buy or sell securities anonymously, without revealing their orders to the broader market.

Explanation

Dark pools exist to facilitate large trades without causing significant price movements in the open market. When big players like mutual funds or hedge funds execute large orders on public exchanges, it can lead to sharp price fluctuations. Dark pools help avoid this by allowing trades to occur discreetly.
