Comparative Performance of Major Global Equity Market

Nifty 50 vs Gold (\$) vs US Dollar Index - Rebase to 100

Term of the Day

Primary Market

Definition: The primary market is the segment of the capital market where new securities are issued and sold for the first time by companies or governments to raise funds.

Explanation

Think of the primary market as the first point of contact between a company and investors. When a company wants to raise capital, it issues shares through an Initial Public Offering (IPO). Investors buy these shares directly from the company, and the funds go to the issuer. This process helps businesses grow and expand. For example, when Company Z launches its IPO, it offers shares to the public for the first time. Once these shares are sold, they move to the secondary market for regular trading.
