## Nifty 50 vs NSE Trading Volume

Source: NSE

## Nifty 50 vs Advances & Declines

Source: NSE

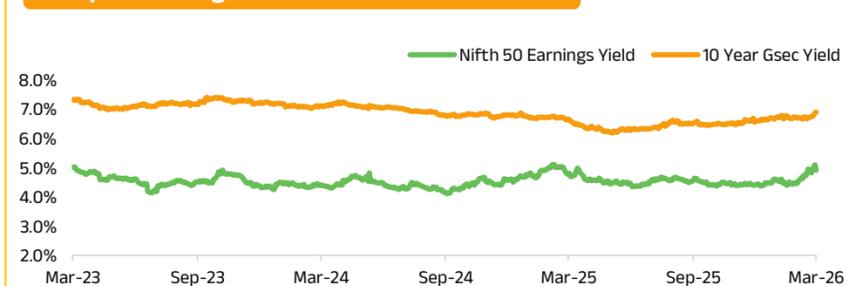

Indian equities extended their recovery today as easing geopolitical concerns and softer energy prices lifted investor confidence. Buying was broad-based across sectors, with cyclical and domestic-oriented stocks leading the gains. Improved global cues and a moderation in volatility supported risk appetite, while selective participation reflected lingering caution around foreign flows and macro stability despite the strong rebound.

Shriram Finance received CCI approval for MUFG Bank's \$4.4-billion investment, enabling the Japanese lender to acquire a 20% stake through preferential allotment—one of the largest FDI deals in India's financial sector.

REC Ltd's board approved a massive Rs. 1.6-lakh-crore market borrowing plan for FY27, which includes raising funds via tax-exemption bonds, domestic debentures, term loans, and external commercial borrowings.

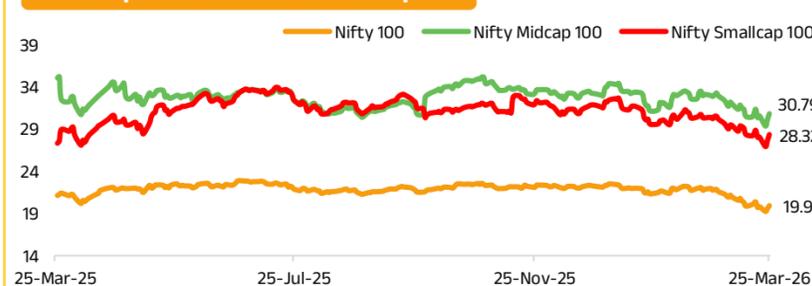

Maruti Suzuki's board approved a Rs. 10,189-crore investment for the first phase of its new Gujarat manufacturing plant, which will add 2.5 lakh units of annual capacity by 2029.

## Nifty 50 vs Gold (\$) vs US Dollar Index- Rebase to 100

## Term of the Day

### Risk Management

Definition: Risk management is a process by means of which risks are identified, assessed, monitored and finally mitigated for any process or organisation. It is a process which is considered very critical for proper functioning and maintenance of any organisation. Some of the risks which a company is generally exposed to are financial risk, environmental risk, theft risk besides others.

### Explanation

Risk Management is a critical part of organization's strategy and it is widely seen as an essential part of the business. Companies face various risks and it is strategically very important to make provisions for them and mitigate them wherever possible. Effective risk management practices of the organization makes it less vulnerable and better prepared for uncertainty. Some of the common methods of mitigating risks are transferring it to a third party (insurance), budgeting for the same, implementing stringent control measures and finally creating a backup plan. Let us take an example of a company X based in India.
