Term of the Day

Risk Management

Definition: Risk management is a process by means of which risks are identified, assessed, monitored and finally mitigated for any process or organisation. It is a process which is considered very critical for proper functioning and maintenance of any organisation. Some of the risks which a company is generally exposed to are financial risk, environmental risk, theft risk besides others.

Explanation

Risk Management is a critical part of organization’s strategy and it is widely seen as an essential part of the business. Companies face various risks and it is strategically very important to make provisions for them and mitigate them wherever possible. Effective risk management practices of the organization makes it less vulnerable and better prepared for uncertainty. Some of the common methods of mitigating risks are transferring it to a third party (insurance), budgeting for the same, implementing stringent control measures and finally creating a backup plan. Let us take an example of a company X based in India.
