INVESTING dynamically across bonds to leverage the changing rate cycles.

Aditya Birla Sun Life Dynamic Bond Fund
An open ended dynamic debt scheme investing across duration.

Inception date: September 27, 2004
An all-season debt scheme that focuses on corporate bonds, sovereign bonds and money market instruments aiming to generate income by dynamically managing the portfolio depending on the interest rate outlook.

How can you benefit?

If interest rates are likely to rise, ABSL Dynamic Bond Fund is flexible enough to change its investments to short-term bonds that mature faster. This way it can invest in newer bonds of higher rates, so that it can benefit from any rise in interest rates over time.

Once the interest rates are likely to have reached their peak, ABSL Dynamic Bond Fund has the option to invest in long-term bonds so that it can benefit from high interest rate for a longer term, and also if interest rates are likely to fall, the scheme may still gain!

If interest rates are likely to fall, the scheme may still gain!

Here's how: Suppose you own a bond with an interest rate of 9% and the rate falls to, say, 7%. That makes your bonds better than newly issued ones. So it can be sold for a profit.

Thus today, you tend to gain from high interest rates; tomorrow if the interest rate falls, you could make a little extra by selling your bond at a premium!

Earlier paragraphs explain the intended functioning of ABSL Dynamic Bond Fund and does not guarantee positive returns in rising and falling interest rate scenarios, since value of investment made may be affected by other factors not limited to Mark to Market losses. Further, bond values may fluctuate in response to the financial condition of individual issuers, changes in interest rates and general market & economic conditions. The portfolio of the scheme is subject to changes in line with the provisions of the Scheme Information Document (SID) of the scheme. Please refer to the SID for details on asset allocation, investment strategy and scheme specific risk factors.
