The fund will avoid active duration management. In fact, the fund manager within the maximum permissible mandate would endeavour to match the maturity of the underlying portfolio with proposed investment horizon.</p> <p>The scheme shall not invest in government securities and State Developmental Loans but may invest in money market instruments including T-Bills, Repo and Reverse Repos &amp; Tri-Party Repos within the limits mentioned in asset allocation pattern. Rigorous in-depth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out before investing. In addition, criteria such as sound corporate managements, prospects of good future growth and strong past performance will be considered.</p>
<p><b>Risk Profile of the Scheme</b></p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. Scheme Specific Risk Factors are summarized below:</p> <p>Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., risks associated with creation of segregated portfolios, investments in REITs and InvITs, investments in unrated securities, investments in Derivatives, including Interest rate swaps, (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in foreign securities, investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc. The Scheme shall also be subject to risks associated with investments in repo transactions in corporate bond. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of the Trustee.</p>

KEY INFORMATION MEMORANDUM

	<p>The Scheme shall not have exposure in fixed income securities in excess of 20% of net assets in any sector as per sectoral classification as prescribed by AMFI. Provided further that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the total investment / exposure in HFCs shall not exceed 20% of the net assets of the scheme.</p> <p>Further provided that the above sectoral limit is not applicable for:</p> <ol style="list-style-type: none"> <li>i. Please refer to SID for detailed scheme specific risk factors.</b></p>
<p><b>Risk Control Strategies</b></p>	<p>Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns.</p> <p>The Scheme endeavors to generate returns by predominantly investing in corporate debt securities across the credit spectrum of varying maturities taking into account the duration guidelines. Rigorous in-depth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out before investing.
