<b>Name of the Scheme</b>	<b>Aditya Birla Sun Life Equity Savings Fund</b>																				
<b>Type of the Scheme</b>	An Open ended scheme investing in equity, arbitrage and debt																				
<b>Investment Objective</b>	To provide capital appreciation and income distribution to the investors by using a blend of equity derivatives strategies, arbitrage opportunities and pure equity investments. The Scheme does not guarantee/indicate any returns. There can be no assurance that the schemes' objectives will be achieved.																				
<b>Inception Date</b>	November 28, 2014																				
<b>No. of Folios &amp; AUM (As on May 31, 2021)</b>	Folios: 14,159 AUM in Crs: Rs 461.11																				
<b>Asset Allocation Pattern of the Scheme</b>	Under normal circumstances, the asset allocation of the Scheme will be as follows:																				
	<table border="1"> <thead> <tr> <th>Instrument</th> <th>Risk Profile</th> <th>Indicative Allocation (% of total Assets)</th> </tr> </thead> <tbody> <tr> <td>Equity &amp; Equity Related instruments including derivatives Out of which:</td> <td>Medium to High</td> <td>65-80%</td> </tr> <tr> <td>– Cash-futures : 20% - 60% arbitrage*</td> <td>Low to Medium</td> <td></td> </tr> <tr> <td>– Net long equity: 20% - 45% exposure*</td> <td>High</td> <td></td> </tr> <tr> <td>Debt &amp; Money market Instruments (including margin for derivatives)</td> <td>Low</td> <td>10-35%</td> </tr> <tr> <td>Units issued by REITs &amp; InvITs</td> <td>Medium to High</td> <td>0-10%</td> </tr> </tbody> </table>	Instrument	Risk Profile	Indicative Allocation (% of total Assets)	Equity & Equity Related instruments including derivatives Out of which:	Medium to High	65-80%	– Cash-futures : 20% - 60% arbitrage*	Low to Medium		– Net long equity: 20% - 45% exposure*	High		Debt & Money market Instruments (including margin for derivatives)	Low	10-35%	Units issued by REITs & InvITs	Medium to High	0-10%		
Instrument	Risk Profile	Indicative Allocation (% of total Assets)																			
Equity & Equity Related instruments including derivatives Out of which:	Medium to High	65-80%																			
– Cash-futures : 20% - 60% arbitrage*	Low to Medium																				
– Net long equity: 20% - 45% exposure*	High																				
Debt & Money market Instruments (including margin for derivatives)	Low	10-35%																			
Units issued by REITs & InvITs	Medium to High	0-10%																			
	<p>*The exposure to derivative shown in the above asset allocation tables would normally be the exposure taken against the underlying equity investments and should not be considered for calculating the total asset allocation. This denotes only hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures &amp; create completely covered positions. E.g. – The scheme invests 65% in equity stocks/index basket in the cash market and takes short position in futures market for relevant stocks/ index to the extent of exactly 65% to avail arbitrage between spot &amp; futures market. Thus the entire position is used to lock arbitrage profit.</p> <p>**This denotes only net long equity exposures aimed to gain from potential capital appreciation of these positions. Thus it is a directional equity exposure which is not hedged. The above asset allocation for defensive consideration will be for a maximum period of 30 days within which the asset allocation will be rebalanced back to as indicated for normal circumstances. The scheme may also invest up to 50% of the Debt allocation in securitized debt instruments except foreign securitized debt.</p> <p>The scheme may invest in derivatives instruments upto 50% of net assets subject to provisions specified in SEBI Circular no. DNP/Cir 29/2005 dated September 14, 2005 and SEBI Circular No. DNP/Cir-30/2006 dated January 20, 2006, SEBI circular No. SEBI/DNP/Cir-31/2006 dated September 22, 2006, SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and such other SEBI guidelines issued from time to time. The scheme may take exposure through derivative transactions in the manner and subject to limit as may be specified by SEBI from time to time. In accordance with SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021, the cumulative gross exposure through equity, debt and derivative positions (including commodity and fixed income derivatives), repo transactions other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should shall not exceed 100% of the net assets of the scheme.</p> <p>The scheme may take exposure in repo / reverse repo transactions in Corporate Debt Securities. The scheme shall participate in repo transactions only in AA and above rated corporate debt securities. The gross exposure to repo transactions in corporate debt securities shall not be more than 10% of the net</p>																				

assets. The cumulative gross exposure through repo transactions in corporate debt securities along with corporate debt and money market instruments and derivative positions shall not exceed 100% of the net assets of the scheme. The scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.

Subject to SEBI (MF) Regulations and in accordance with Securities Lending Scheme, 1997, SEBI Circular No MFD/CIR/ 01/ 047/99 dated February 10, 1999, SEBI Circular no. SEBI /IMD / CIR No 14 / 187175/ 2009 dated December 15, 2009, as amended from time to time, the Scheme may engage in Stock Lending not more than 20% of the net assets of the Scheme.

The scheme does not intend to invest in Foreign Securities and Credit default Swaps.

The scheme shall not engage in short selling activities.

If the debt/ money market instruments offer better returns than the arbitrage opportunities available in cash and derivatives segments of equity markets then the investment manager may choose to have a lower equity exposure. In such defensive circumstances the asset allocation will be as per the below table:

Instrument	Risk Profile	Indicative Allocation (% of total Assets)
Equity & Equity Related instruments including derivatives Out of which:	Medium to High	20-65%
– Cash-futures arbitrage* : 0% - 45%	Low to Medium	
– Net long equity exposure** : 20% - 45%	High	
Debt & Money market Instruments (including margin for derivatives)	Low	35-80%

\*This denotes only hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures & create completely covered positions.

\*\*This denotes only net long equity exposures aimed to gain from potential capital appreciation of these positions. Thus it is a directional equity exposure which is not hedged.

The above asset allocation for defensive consideration will be for a maximum period of 30 days within which the asset allocation will be rebalanced back to as indicated for normal circumstances. Any further deviation over the period of 30 days in the rebalancing would be referred to the Investment Committee of Aditya Birla Sun Life AMC Limited for review and suggestions.

#### Change in Asset Allocation

The above mentioned investment pattern is indicative and may change for short duration.

Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

<p><b>Investment Strategy</b></p>	<p>The Scheme will invest predominantly in equities. The equity portfolio will be created using a bottom up approach through fundamental research. A part of the portfolio will be managed using the arbitrage strategy by taking advantage from the price differentials / mis-pricing prevailing for stock / index in various market segments (Cash &amp; Futures). The Scheme will seek to reduce volatility of returns by actively using derivatives as hedge; although this will make the scheme forgo some upside, it shall help protect downside.</p>
<p><b>Risk Profile of the Scheme</b></p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p><b>Risks associated with investment in Arbitrage Strategies:</b></p> <ul style="list-style-type: none"> <li>• The scheme will aim to generate absolute returns over and above money market returns/liquid funds. The performance of the scheme will depend on the ability of the fund manager to identify opportunities prevailing in terms of price spread (difference) in the cash and derivative market. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price spread in the equity markets. There may be instances where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the Fund Manager due to lack of opportunities in the derivative market may not be able to outperform liquid/money market funds. In addition to this, there can be increase in number of transactions as the fund manager has to take simultaneous calls in cash and derivative market, which may lead to high portfolio turnover and consequently will lead to high transaction costs.</li> <li>• There can be no assurance or guarantee that the arbitrage opportunities may exist at all times in the capital market. The lack of arbitrage opportunities shall not provide an opportunity to the Fund Manager to exploit price discrepancies in the capital markets.</li> <li>• Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.</li> <li>• The Scheme intends to take advantage of opportunities arising out of corporate events like open offers, buy-back, merger, initial public offers, etc. The lack of such corporate events may lead to lack of opportunities to the Fund Manager.</li> </ul> <p><b>Risks Factors Associated With Investments In Interest Rate Swaps:</b> Being intended for use as a hedge instrument, Interest rate swaps will primarily help in mitigating interest rate risk of the portfolio. However, it may be exposed to following types of risks:</p> <ul style="list-style-type: none"> <li>• Counterparty risk – The counterparty risk is to the extent of gain made in any IRS transaction. To restrict such risks, the fund manager may consider booking profits and unwinding the position.</li> </ul> <p><b>RISKS FACTORS ASSOCIATED WITH INVESTMENTS IN REPO TRANSACTIONS IN CORPORATE BOND:</b></p> <p>In repo transactions, also known with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:</p> <ul style="list-style-type: none"> <li>• Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA.</li> <li>• Collateral Risk: In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.</li> </ul> <p>In case of any Downgrade and shortfall in the collateral the Fund Manager shall arrange for additional collateral/cash within a period of 1 Business Day, equivalent to the amount of shortfall and if the counterparty is unable to provide additional collateral/cash then it shall tantamount to early termination of repo agreement as a repo or sale repurchase agreement, securities are sold.</p>

	<p><b>Risks associated with Writing of Covered Call Options:</b></p> <p>a) Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however, the downside depends upon the increase in value of the underlying equity shares.</p> <p>b) The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.</p> <p>c) The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received, the scheme would be at a loss.</p> <p>d) The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme.</p> <p><b>Risk Factors associated with Securities Lending and Borrowing:</b></p> <p>Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lenders of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Scheme may not be able to sell lent out securities, which can lead to temporary illiquidity &amp; loss of opportunity.</p> <p><b>RISK FACTORS ASSOCIATED WITH INVESTMENTS IN UNITS OF REITS AND INVITS:</b></p> <ul style="list-style-type: none"> <li>• <b>Price-Risk or Interest-Rate Risk:</b> REITs &amp; InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.</li> <li>• <b>Credit Risk:</b> In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs &amp; InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.</li> <li>• <b>Liquidity or Marketability Risk:</b> This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. As these products are new to the market they are likely to be exposed to liquidity risk.</li> <li>• <b>Reinvestment Risk:</b> Investments in REITs &amp; InvITs may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.</li> </ul> <p>The above are some of the common risks associated with investments in REITs &amp; InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.</p>
<p><b>Risk Control</b></p>	<p>Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process in the following manner;</p> <p>The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns.</p> <p>The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks.</p>

	<p>With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in.</p> <p>While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.</p>																																				
<b>Plans/Options</b>	<p>The Scheme will have <b>Regular Plan and Direct Plan**</b> with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form.</p> <p>Each of the above (Regular and Direct) Plan under the scheme will have the following Options:</p> <p>(1) <b>Growth</b> Option and</p> <p>(2) <b>Income Distribution cum capital withdrawal (“IDCW”) Option (Payout of IDCW/ Reinvestment of IDCW/ IDCW Sweep Facility)^</b></p> <p><i>^the amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains</i></p> <p><b>**DIRECT PLAN:</b></p> <p>i. <b>Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund and is not available for investors who route their investments through a Distributor.</b></p> <p>ii. <b>Eligible investors:</b> All categories of investors (whether existing or new Unitholders) as permitted under the Scheme Information Document of the Scheme are eligible to subscribe under Direct Plan.</p> <p>iii. <b>Modes for applying:</b> Investments under Direct Plan can be made through various modes offered by the Mutual Fund for investing directly with the Mutual Fund including through Stock Exchange Platforms for Mutual Funds [excluding other Platform(s) where investors’ applications for subscription of units are routed through Distributors].</p> <p>iv. <b>How to apply:</b></p> <p>a.
