| Investment Strategy        | The Scheme would adopt top-down and bottom-up approach of investing and will aim at being diversified across various industries and / or sectors and/ or market capitalization. The investment emphasis of the scheme would be on identifying companies with sound corporate managements and prospects of good future growth. Essentially, the focus would be on stocks driven by long-term fundamentals. However, short term opportunities would also be seized, provided underlying values supports these opportunities. A portion of the scheme will also be invested in IPOs, emerging sectors, concept stocks and other primary market offerings that meet our investment criteria.  The Scheme would invest a substantial portion of its investible assets in equity and equity related instruments.   |
|                            | instruments. Pending investment of the scheme may be invested in debt & money market instruments and other liquid instruments or both. The scheme may have prudent exposure to Futures & Options (F&O) to capture opportunities arising out of market imperfection and to hedge the portfolio, whenever necessary.   |
| Risk Profile of the Scheme | Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:   |
|                            | Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in Repo Transactions in Corporate Bond, investments in Securities Lending and Borrowing, investment in securities with structured obligations/credit enhancements, writing of call options, creation of segregated portfolios, investments in Securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of the Trustee. Investors may, if they wish, consult the |
| Risk Control               | The overall portfolio structuring would aim at controlling risk at a moderate level. Both very aggressive and very defensive postures would be avoided. Stock-specific risk will be minimised by investing only in those companies that have been thoroughly researched by ABSLAMC's research team. Risk will also be managed through broad diversification of the portfolio within the framework of the above mentioned investment objective and policies. Macroeconomic risk will be addressed through focused and ongoing review of relevant business and economic environment. All efforts will be made to protect the NAV of the scheme and the interest of the unit holders.   |
|                            | Liquidity will be a very important consideration for investment decisions, due to the potential of large redemptions inherent in open ended schemes. As a result, a reasonable proportion of the scheme's investments will be made in relatively liquid investments.   |
|                            | While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.  |
| Plans/Options              | The Scheme will have <b>Regular Plan and Direct Plan**</b> with a common portfolio and separate NAVs.
