	level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in.
	The Scheme may also use various derivatives products for the purpose of trading, hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated. Scheme may utilize services of independent research agency for making investment in foreign securities / Funds.
	Portfolio Turnover
	The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate.
	The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is frequently used by portfolio managers who use an immunization strategy.
	Macaulay duration can be calculated:
	MacaulayDuration = $\frac{\sum_{t=1}^{n} \frac{t * C}{(1 + y)^{t}} + \frac{n * M}{(1 + y)^{n}}}{Current Bond Price}$
	Where:
	<ul> <li>t = respective time period</li> <li>C = periodic coupon payment</li> <li>y = periodic yield</li> </ul>
	<ul> <li>n = total number of periods</li> <li>M = maturity value</li> </ul>
	<ul> <li>M = maturity value</li> <li>Current Bond Price = Present value of cash flows</li> </ul>
	The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond.
	Factors Affecting Duration
	A bond's price, maturity, coupon and yield to maturity all factor into the calculation of duration. All else equal, as maturity increases, duration increases. As a bond's coupon increases, its duration decreases. As interest rates increase, duration decreases and the bond's sensitivity to further interest rate increases goes down. Also, sinking fund in place, a scheduled prepayment before maturity and call provisions lower a bond's duration.

Risk Control Strategies	Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in.
	before making a decision to invest/redeem Units. Investors in the Scheme are not being offered any guaranteed returns. Please refer to SID for detailed scheme specific risk factors.
	Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e.
	bond and foreign securities. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. - SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investment Schemes, etc. New Investors are therefore requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. - Once the investor has done KYC with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary including mutual funds. However, the Mutual Fund reserves the right to carry out fresh KYC of the investor.
- 4. It is mandatory for intermediaries including mutual funds to car out In-Person Verification (IPV) of its new investors w.e.f January 01, 2012. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. ABSLAMC and NISM/AMFI cartified distributors who are KYD compliant are authorized to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by the scheduled commercial banks.

Further, as per SEBI circular dated April 24, 2020, earlier circular on IPV stands modified as under:

- IPV/ VIPV would not be required when the KYC of the investor is completed using the Aadhaar authentication / verification of UIDAI.
- IPV / VIPV will not be required by the RI when the KYC form has been submitted online, documents have been provided through digiocker or any other source which could be verified online.
- 5. As per SEBI Circular dated April 24, 2020, The eSign mechanism of Aadhaar will be accepted in lieu of wet signature on the documents provided by the investor and the cropped signature affixed on the online KYC form under eSign will be accepted as valid signature.
