	In order to diversify the portfolio, the scheme manager may invest upto 35% in stocks which have a higher or lower market capitalisation. A small portion of the portfolio may be kept in call and money market instruments in order to meet the liquidity needs.
	The investment emphasis of the scheme would be on identifying companies with sound corporate managements and prospects of good future growth. Past performance will also be a major consideration. Essentially, the focus would be on long-term fundamentally driven values. However, short-term opportunities would also be seized, provided they are supported by underlying values. As part of the investment strategy, scheme will book profits regularly to take advantage of the volatility in the market.
Risk Profile of the Scheme	Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:
	<ul> <li>The ability to absorb business changes is lesser in mid-cap companies as compared to some of their larger compatriots.</li> <li>These stocks may, at particular given time, have poor liquidity on the bourses and volatility levels could be higher.</li> </ul>
Risk Control	There are internal investment restrictions on individual stock exposure limits and there are sector exposure limits [only applicable to general equity funds]. Also there are restrictions on level of exposure to IPOs, private placements and small companies. In case of Birla Sun Life Midcap Fund, under normal circumstances, the Scheme would be investing in at least 20 companies and at least six sectors with a maximum exposure of 25% to each sector. However, the AMC reserves the right to modify this strategy from time to time and the changes would be informed to the unitholders in the next newsletter.
	While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

ABSLAMC and NISM/AMFI certified distributors who are KYD compliant are authorized to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by the scheduled commercial banks.
