|                            | investment profile of the Cohere shall be effected only in secondaries with the previous of each  |
|----------------------------|---|
|                            | investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.  |
| Investment Strategy        | The corpus of the Scheme will be primarily invested in Small Cap equity and equity related securities of the companies in the small cap segment that have a potential to appreciate in the long run. The Scheme may also invest a small portion of its corpus in fixed income securities including money market instruments to manage its liquidity requirements. The fund manager will select equity securities on a bottom-up stock selection approach. Under bottom up approach, the main focus is on identifying stocks on their individual merits irrespective of the sectors to which they belong as opposed to first identifying sectors and then choosing stocks within that sectors which is followed under top-down approach. Hence, under bottom-up approach among other things, consideration will be given to fundamentals of the companies, management quality & strength of their businesses. Apart from sound fundamentals and management, the fund would lay emphasis on valuations and long have an exposure of more than 25% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time.  |
| Risk Profile of the Scheme | Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:  |
|                            | <ul> <li>The investments under the Scheme will be concentrated in the Small Cap segment and hence may perform differently than a broad market portfolio. Small Cap stocks are generally more volatile and less liquid as compared to Large Cap stocks. Further Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.</li> <li>Investing in companies which are part of the Nifty Small cap 100 TRI stocks is based on the premise that relatively small and other than small cap companies will increase their earnings and grow into larger, more valuable companies. However, as with all equity investing, there is the risk that a company will not achieve its expected earnings results, or that an unexpected change in the market or within the company will occur, both of which may adversely affect investment results. Historically, stocks which are part of the Nifty Full Small Cap 100 TRI stocks. Thus, relative to larger, more liquid stocks, investing in small and other than small cap companies used than all and other than small cap stocks. The biggest risk of equity investing is that returns can fluctuate and investors can lose money.</li> </ul> |
| Risk Control               | Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous in-depth credit evaluation of the securities proposed to be invested in will be carried out by the investment team of the AMC.   |
|                            | The Scheme may also use various derivatives products for the purpose of hedging and portfolio balancing from time to time, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.   |
|                            | While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.   |
| Plans/Options              | The Scheme will have <b>Regular Plan and Direct Plan**</b> with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form.<br>Each of the above (Regular and Direct) Plan under the scheme will have the following Options:<br>(1) <b>Growth</b> Option and<br>(2) <b>Dividend</b> Option (Payout & Reinvestment)<br>** <u>DIRECT PLAN</u> :<br>i. <b>Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly</b>   |
