Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Birla Sun Life Gold Fund is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects or returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 100,000/- made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

- **This being a Fund of Funds scheme, investors shall have to bear the expense ratio of the underlying scheme in addition to the expense ratio of the scheme.**
- The Scheme's performance may depend upon the performance of the underlying scheme. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Fund.
- The liquidity of the scheme's investment may be restricted by trading volumes, transfer process & settlement periods. It may also be affected by the liquidity of the underlying ETF units. Currently, the liquidity for gold ETF units on the exchange may be low. There might be an impact cost for liquidating units on the exchange. However, Authorised Participants are appointed for the underlying ETF to ensure that the market price of units is nearer to the NAV of the underlying Gold ETF units.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying ETF where the Scheme has invested and will not include the investments made by the underlying ETF.
- The NAV of the scheme shall be determined, based on the closing market price of the underlying Gold ETF on the exchange(s). In case the underlying Gold ETF is not traded on any particular business day then the NAV of the scheme shall be derived based on NAV of the underlying Gold ETF in accordance with valuation policy. Any delay in declaration of NAV of any particular underlying Gold ETF may result in delay of the computation of the NAV of the scheme.
- The Fund will subscribe/redeem according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions/redemptions received are not adequate enough for transaction in creation unit size, the BSL Gold fund will buy/sell BSL Gold ETF units directly on the stock exchange without waiting for additional subscription/redemption.

- The scheme may invest in debt and money market instruments from time to time, as per the Asset Allocation pattern, which will have a different return profile compared to gold returns profile..
- As Birla Sun Life Gold ETF is not actively managed, the underlying investments may be affected by a general decline in the domestic price of gold and other instruments invested under the plan. Birla Sun Life Gold ETF invests in physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.
- **Tracking Error:** Tracking error is defined as the annualised standard deviation of the variance between daily returns of the NAV of the scheme and the underlying benchmark (physical gold in this case) for any given period. Tracking Error is always calculated against the 'Total Returns Index' which shows the returns on the Index portfolio, inclusive of dividend.

Tracking error may have an impact on the performance of BSL Gold Fund. The scheme's ability to achieve close correlation with the underlying benchmark may be impacted by factors including but not limited to :

- Buy/Sell transactions at different point of time during the trading session, which may not correspond to the closing price.
- Delay in purchase/sale of gold due to:
 - Illiquidity of gold.
 - Delay in realization of Sale proceeds.
 - Creation of a lot size to buy the required amount of gold.
- Execution of large buy / sell orders.
- The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
- Holding of cash equivalents to meet redemptions, expenses, dividend payouts etc.
- Transaction cost (including taxes and insurance premium) and recurring expenses.
- Delay in realization of unit holder's funds.

RISKS ASSOCIATED WITH INVESTMENTS IN BIRLA SUN LIFE GOLD ETF

As the Scheme will predominantly invest in BSL Gold ETF (the underlying scheme), the Scheme will be subject to following risk factors associated with investment in the underlying scheme:

- **Liquidity Risk:** Trading in units of the ETF on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the ETF is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the ETF will continue to be met or will remain unchanged.
BSL Gold ETF has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell gold. However, the Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.
- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant/Market maker to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the ETF to buy/sell gold against the purchase and redemption requests received.
- **Passive Management of Investments:** BSL Gold ETF shall follow a passive investment strategy. BSL Gold ETF's performance may be affected by the general price decline in the gold prices. BSL Gold ETF shall invest in Gold regardless of their investment merit. BSL Gold ETF does not aim to take any defensive position in case of falling markets.
- **Active Market:** Although BSL Gold ETF is proposed to be listed on exchanges, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Tracking Error:** Tracking error may have an impact on the performance of BSL Gold ETF. However, the AMC will endeavour to keep the tracking error as low as possible. Tracking error may be accounted by the various reasons which includes but not limited to expenses, cash balance to meet redemptions, dividend payout, delay in purchase/sell of gold, Illiquidity, delay in realization of sale proceeds, buy/sell transactions at different point in time which may not correspond to the closing price, transaction cost (including taxes, insurance etc), creation of lot size etc. The AMC would monitor the tracking error of the BSL Gold ETF on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal

circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the volatility in the markets and any other reasons beyond the control of the Fund Manager. There can be no assurance or guarantee that the underlying scheme will achieve any particular level of tracking error relative to performance of the benchmark Index (physical gold).

- **Redemption Risk:** Investors may note that even though this is an open ended scheme, BSL Gold ETF would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Authorised Participant(s) to provide liquidity in secondary market on an ongoing basis. The Authorised Participant(s) would offer daily two-way quote in the market. Further the price received upon redemption of units may be less than the value of the gold represented by them.
- The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. And hence the units of BSL Gold ETF may trade above or below the NAV. However given that the investors can transact with AMC directly beyond the creation unit size of BSL Gold ETF there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.
- The gold price reflects the prices of gold at a point in time, which is the price at close of business day. BSL Gold ETF, however, may trade these securities at different points in time during the trading session and therefore the prices at which BSL Gold ETF trades may not be identical to the closing price of gold.
- **Market Risk:** The value of the Units relates directly to the value of the gold held by BSL Gold ETF and fluctuations in the price of gold could adversely affect investment value of the Units. The factors that may affect the price of gold, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of gold that may be imposed by RBI, trade and restrictions on import/export of gold or gold jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the Gold.
- **Performance/Asset Class Risk:** The performance of the gold will have a direct bearing on the performance of BSL Gold ETF. The returns from physical gold may underperform returns from any other asset class.
- **Currency Risk:** The formula for deriving the NAV of the units of BSL Gold ETF is based on the imported (landed) value of the gold, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or Gold will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical Gold:** There is a risk that part or all of BSL Gold ETF's gold could be lost, damaged or stolen. Access to BSL Gold ETF's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of BSL Gold ETF and consequently on investment in units.
- **Counter party Risk:** There is no Exchange for physical gold in India. The Mutual Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.
- **Operational Risks:** Gold Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Gold Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. In addition, investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power. In the event that the price of gold declines, the value of investment in Units is expected to decline proportionately.
- BSL Gold ETF may not be able to acquire or sell the desired number of units of gold due to conditions prevailing in the market, such as, but not restricted to circuit filters on the gold ETF (if any), liquidity and volatility in gold prices
- The units of BSL Gold ETF will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, securities transactions tax and such other costs.
- The NAV of the units of Gold ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of gold at based on the prescribed formula. This may lead to a condition where the NAV is too different from the domestic market price of gold. In such cases the trustees reserves the right to delay or suspend the buy/sell transactions.

- A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors
- The Trustee, in general interest of the Unit holders of BSL Gold ETF offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.
- Governments, central banks and related institutions, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of Units of BSL Gold ETF will be adversely affected.
- Conversion of underlying physical gold into the Units of BSL Gold ETF may attract capital gain tax depending on acquisition cost and holding period.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN FIXED INCOME SECURITIES

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME:

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (Mutual Funds) Regulations 1996, as amended from time to time would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS:

- Neither this Scheme Information Document nor the Units have been registered in any jurisdiction. The distribution of this Scheme Information Document in certain jurisdictions may be restricted or totally prohibited and accordingly, persons who come into possession of this Scheme Information Document are required to inform themselves about, and to observe, any such restrictions and / or legal requirements.
- Investors should study this Scheme Information Document carefully in its entirety and should not construe the contents hereof as advise relating to legal, taxation, investment or any other matters. As is the case with any

investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem Units. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors associated with the scheme.

- From time to time, funds managed by the affiliates / associates of the Sponsor may+ invest either directly or indirectly in the Scheme. The funds managed by these affiliates/associates may acquire a substantial portion of the Scheme's Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme.
- The NAV of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures.
- A Unitholder may invest in the Scheme and acquire a substantial portion of the scheme units. The repurchase of units by the Unitholder may have an adverse impact on the units of the Scheme, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.
- Mutual Funds are vehicles of securities investments that are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors that impact the value of the Scheme' investments include, but are not restricted to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc
- Within the regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may however increase the risk of the portfolio.
- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in Statement of Additional Information (SAI) / Scheme Information Document
- Redemptions due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, the Mutual Fund, the AMC, their directors or their employees shall not be liable for any tax consequences that may arise.
- There is no guarantee or assurance on the frequency or quantum of dividends, which shall be subject to availability of distributable surplus.
- Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times and that the decisions made by the fund manager may not always be profitable. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Growth, appreciation, dividend, bonus, income, etc if any, referred to in this Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
- In respect of transaction in Units of the Scheme through Stock Exchange Platform for Mutual Funds, allotment and redemption of Units on any Business Day will depend upon the modalities of processing viz. collection of application form, the order processing / settlement by respective stock exchanges and their respective clearing corporations, on which the Fund has no control. Moreover, transactions conducted through the Stock Exchange Platform shall be governed by the guidelines and directives issued by respective recognised stock exchange(s)

The investors under the Scheme shall bear the recurring expenses of the scheme in addition to the expenses of underlying scheme in which the scheme makes investment.

- The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. E. INVESTMENT STRATEGY

The investment objective of the scheme is to provide returns that tracks returns provided by BSLGold ETF.

To achieve the investment objective, the scheme will predominantly invest in units of Birla Sun Life Gold ETF. Accordingly, the Scheme may buy/sell the units of BSL Gold ETF either directly with the Fund or through the secondary market on the Stock Exchange(s). The scheme would also invest in debt & money market securities to the extent necessary to meet the liquidity requirements for the purpose of repurchases or redemptions.

The AMC shall endeavor that the returns of BSL Gold Fund will replicate the returns generated by the underlying scheme and is not expected to deviate more than 2%, on an annualized basis net of recurring expenses in the Scheme. However, this may vary due to reasons beyond the control of the Fund Manager.

The deviation from the underlying BSL Gold ETF as specified above shall mainly be on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.

The table shows below the impact that could happen on fund performance as a result of delay in receipt of money considered from period of inception of BSL Gold ETF till March 31, 2016.

% difference in NAV between 'n' days	2 days	3 days	4 days	5 days	6 days	7 days
Average	0.06	0.08	0.11	0.14	0.17	0.20
Max	9.36	8.66	8.66	11.10	12.26	12.30
Min	-10.72	-11.25	-11.25	-11.28	-12.64	-13.16

The above table is only for illustration purposes based on underlying assumption that deployment of entire corpus is delayed by no. of days mentioned above. However, in reality, as the deployment of subscriptions on an ongoing basis may not be significant in proportion to corpus of fund, the impact may not be material. Further, the deviations may normally be expected to average out over a longer time horizon.

The fund would endeavor to maintain the indicated asset allocation as mentioned above. However, there could be a variance in the asset allocation on account of receipt of cash flows, considering the existing operational procedure as explained hereafter:

Post Dated Cheque (PDC)

PDC is nothing but postdated cheques, which is generally obtained from the investors for SIP transactions mostly at remote locations not covered by ECS. The cheques are banked on the respective cycle dates for realisation of funds.

C) Utilization of Funds

Transactions are accepted before the cut off time as specified by SEBI from time to time. All the transactions are reported in our Registrars and Transfer Agents system by the respective branches across India and funds get deposited into the banks accounts. On the basis of clear Funds being available for deployment, cash flows are reported to the fund manager on timely basis.

The inputs regarding cash flows by various modes of acceptance shall be planned on a daily basis. The subscription/redemption request shall be reported and used as a basis for investing in BSL Gold ETF on realization of funds. The same shall also form the basis for subsequent deployment of funds in BSL Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. Fund Manager may acquire units of BSL Gold ETF through stock exchange or subscribe directly to BSL Gold ETF (i.e. direct via BSLAMC) depending on market dynamics in the best interest of investors.

Why Invest in Gold?

Historically, Gold has been perceived as a store of value. Globally, its appeal as an investment option however has grown significantly in this decade, as institutional and retail investors have recognized this as a key portfolio diversifier and started allocating a part of the portfolio.

Key benefits and reasoning for investing in gold can be summarized as follows:

- **Safe Haven:** Gold is one of the financial assets that do not rely on an issuer's promise to pay, offering shelter from default risk. It is considered to be a store of value during volatile & uncertain times. 2008 was a case in point. During 2008, when most asset classes like equity, credit and real estate gave negative returns between 10% to 70%, gold gave 30% positive returns
- **Portfolio Diversification:** By investing in different asset classes with diverse co-relations, investors expect to optimize the risk adjusted returns. Gold has low co-relation with other asset classes such as Debt & Equity. Low co-relation indicates that gold is driven by unique economic and market dynamics. Due to this, its price responds to various trends and developments like inflation, money supply very differently. Thus, gold is a good portfolio diversifier.
- **Inflation hedge:** The value of gold, in terms of the real goods and services that it can buy, has remained largely stable for many years. The real price of gold has endured a century characterized by sweeping change and repeated geopolitical shocks and more than retained its purchasing power. In contrast, the real value of most currencies has generally declined. (Source: World Gold Council's website www.gold.org)
- **Demand & Supply** - As is true of all asset prices, gold's price moves in response to the changing balance between supply and demand. Mine production is relatively inelastic due to the long lead times that exist in gold mining, which explains why the rally in the gold price since 2001 has still not engendered an increase in production levels. Meanwhile, demand has shown sustained growth, due at least in part to rising income levels in gold's key markets. This has created the foundation for the most positive outlook the precious metal has known for a quarter of a century.

Current Methods of investing in Gold

Currently, one can invest in Gold in India by the following modes:

1. Buying Jewellery, coins & bars from a Jeweller
2. Buying coins or bars from Banks
3. Buying Gold ETFs

Lets observe how the three compare on different parameters cited below:

Criteria	Physical (From Jeweller)	Physical (From Bank)	Gold ETFs
Availability of Standard Pricing	No; may differ from jeweller to jeweller	No; may differ from bank to bank	Yes; linked to International (LBMA*) prices
Premium paid over gold price	High (making charges and fat margins)	High (coin design / denomination and fat margins)	Low - only brokerage charges for trading account
Risk of purity of Gold	High	Low	Virtually no risk
Storage Requirements	High, as it is in physical form; locker or safe	High, as it is in physical form; locker or safe	Low; for the investor, it is stored in a demat account
Convenience	Low; Physical movement and transfer is involved	Low; Physical movement and transfer is involved	High; the assets are held in a demat account
Security of the asset	Investor is responsible	Investor is responsible	ETF manager takes care of this
Resale Value	At a high discount; making charges are deducted again	As per current regulations, banks can't buy back gold	Easily traded on the listed exchange at a value close to the prevailing price of gold. Only brokerage to be deducted
Wealth Tax	Yes	Yes	No
Long Term Capital Gains Tax	If held for more than 3 Years	If held for more than 3 Years	If held for more than 1 year

The above information is provided for general information purposes only. For individual nature of tax implications, investors are advised to refer to his/her tax consultant.

What is evident from the above is that there is a huge retail investment demand for Gold in India. However, investors so far have not preferred Gold ETF, despite it being the most convenient and cost efficient form of gold investment. This is primarily because

1. ETF is relatively a new concept in India. Retail investors have hardly started understanding Mutual Funds after almost 2 decades of existence.
2. There is no advisory available therefore only well informed investors invest through this route.
3. Investors cannot avail of systematic investment plan which could let them small amounts every month in a disciplined way & benefit from cost averaging.
4. Investors without demat account can't participate. This further restricts the potential investor base for Gold ETF.
5. Less than 1% people in India have Demat account. The precondition for Demat restricts the addressable market.

Solution – Birla Sun Life Gold Fund, a Fund of Funds scheme

While keeping all the above benefits of Gold ETFs intact, the Fund will be able to offer the following additional benefits to its investors.

- **Ease of investing/Liquidity:** Since investor deals directly with the fund house, investor can avail of the benefit of primary liquidity at applicable NAV, rather than depending on the secondary market liquidity at market price in case of ETFs. Given the size and liquidity for Gold ETFs in India, a Fund investing in Gold ETF can help reduce the liquidity risk substantially.
- **Facility of Systematic Investment Plan (SIP):** By opting for Systematic Investment Plan (SIP), as a facility, investors can invest small amounts of money at the prevailing NAV in Birla Sun Life Gold Fund on a regular basis.

With SIP, investors can avail of several benefits as explained below:

- **Discipline in investment:** Investing through an SIP helps investors to develop a discipline in investment, since investor will be actively planning to set aside that much money at regular intervals.
- **Rupee cost averaging:** The advantage of investing small amounts regularly over a long period is that the investor can ride out the ups and downs of the market. Here's how: since investment is made on regular basis, regardless of the market, investor may be able to get a better overall price for investment, and

therefore, better returns. This is the rupee cost averaging i.e. buying fewer units during rising markets and more units during falling markets, thereby reducing the average cost per unit.

- **The Power of compounding:** Setting aside a small amount every month can, over time, add up to quite a large sum, thanks to the power of compounding.
- **Availability of Special Products/facilities:** Investor may avail, add on, facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan as may be made available under Birla Sun Life Gold Fund from time to time etc.
- Demat account is not a pre-requisite for investment in Birla Sun Life Gold Fund, thereby enhancing the addressable market.
- **Ease of understanding the Scheme offering:** Investors relate much faster with the Mutual Funds than ETFs. Hence the understanding and acceptability of this mode of gold-investing could be much greater. For example, NAV is represented in rupee terms rather than in grams. This makes it more intuitive as a mode of financial investment to investors.
- **Cost Effective:** Investing in gold through the Birla Sun Life Gold Fund through physical application under 'Direct mode' enables investor invest in a low cost manner as the investor does not have to incur the following charges applicable for investing through the dematerialized mode.

Example: if an investor subscribing Rs. 50,000/- each in Birla Sun Life Gold ETF through the dematerialized mode and Birla Sun Life Gold Fund through physical application would incur following charges:

Charges	Gold ETF through Demat Mode	Gold Fund through Physical Application 'Direct' Mode
Account Opening charges	Nil	Nil
Annual Maintenance charges of Demat Account	Rs. 0 – Rs. 1200	NA
Delivery brokerage charges [^]	Rs. 25 - Rs. 175	Nil
Transaction charges ^{^^}	Rs. 25	Nil
Annual Scheme Recurring Expenses*	Rs. 500	Rs. 750**
Total	Rs. 550 - Rs. 1900	Rs. 750

Investors should note that above explained example considers the following:

- The investor invests in Birla Sun Life Gold Fund under 'Direct Plan'. However, in case the application is routed through any AMFI registered distributor, the upfront commission, if any, on investment made by the investor shall be required to be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.
- ^{^^}In accordance with provisions of SEBI circular Cir/IMD/ DF/13/ 2011 dated August 22, 2011, transaction charges may be paid to the AMFI registered distributors in respect of subscription / purchase applications (excluding switch application) made by investors and routed through any AMFI registered distributor / agent / broker. Please refer page 55 for further details on Transaction charges.
- The cost efficiency explained above may not accrue in case of investors who opt to hold units of Birla Sun Life Gold Fund in electronic (demat) mode.
- [^]Delivery brokerage in the above example is in the range of 0.05% to 0.35%. The above charges may vary as per different brokers. Charges like trading account opening charges, service tax, education cess, exchange levy and stamp duty is applicable on the transactions in dematerialized mode.
- * **Assuming** the Annual Scheme Recurring Expenses, as shown above, is levied @ 1.00% p.a. under Birla Sun Life Gold ETF, the expense to be charged to Birla Sun Life Gold Fund would be 0.50% p.a. as the total expense under both the Scheme would not exceed 1.50% p.a. [excluding expenses permissible under regulation 52(6A)]
- ** Investment in Birla Sun Life Gold ETF + Birla Sun Life Gold Fund investing in Birla Sun Life Gold ETF = ₹ 50000*1% + ₹ 50000*0.5% = ₹ 500 + ₹ 250 = ₹ 750.

Risk Control

Investments made by the scheme would be in accordance with the investment objective of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

Risk Mitigation measures for Portfolio Volatility: Gold ETFs being passively managed carry lesser risk compared to active management. The underlying ETF scheme where the fund intends to invest follow the underlying price of gold which is valued as per SEBI norms and therefore the level of portfolio volatility would be same as that of the underlying gold price. There may not be additional volatility on account of fund manager decision. The Fund Manager would also endeavour minimal cash levels to keep performance deviation from the underlying ETF to minimal.

Risk mitigation measures for Managing Liquidity: Gold ETFs invest in physical gold which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets Association. Liquidity issues are not envisaged as gold is a globally traded commodity and thereby very liquid. There are also designated Authorised Participants who facilitate liquidity on the exchange.

Risk Mitigation Measures for Tracking Error:

Sources of Tracking Error	Mitigation Measures
The trade execution prices may be different from Closing NAV of underlying scheme (BSL Gold ETF).	The execution price of BSL Gold ETF will be a factor of demand/supply on the stock exchange. The difference tends to average out over a longer time horizon and that will moderate tracking error
Delay in the purchase or sale due to market Illiquidity	The AMC appoints leaders in bullion business as Authorized Participants/Market Makers to enhance liquidity on the stock exchange and reduce the impact cost and that will help the fund to minimize tracking error
Funds flows in BSL Gold Fund of value lesser than Creation lot size of underlying scheme.	For small amounts of inflows/outflows which are less than the creation size of BSL Gold ETF, the BSL Gold Fund will buy/sell units of underlying scheme directly on the stock exchange without waiting for additional subscription / redemption to minimize tracking error.
Availability of Gold bars for creation of BSL Gold ETF.	The AMC makes arrangements with leading bullion banks/dealers to make gold bars available for creation of underlying scheme (BSL Gold ETF) and that in turn will help minimize tracking error.
Delay in realization of unit holder's funds	The inputs regarding cash flows by various modes of acceptance will be estimated on a daily basis by the fund. The subscription/redemption request will also be reported and used as a basis for planning investments in BSL Gold ETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error.
Holding of cash equivalents to meet redemptions, recurring expenses etc.	The Fund will keep offsetting the expenses/interest against the net inflows/outflows and keep investing/redeeming the balance amount from BSL Gold ETF to minimize the tracking error in best interest of investors.
Transaction cost (including taxes and insurance premium) and recurring expenses	The Fund seeks to keep it to the minimal to reduce the impact of the tracking error.
Execution of large buy / sell orders	These deals are done at best possible prices available at the time of investments. Distortions, if any would automatically get corrected over periods of time.
The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.	Units procured through exchanges have an auction process inbuilt into them, and hence the aforesaid risk is automatically mitigated. Even for lot size purchases, the fund deals with multiple reputed banks/authorized participants where the probability of default in trades is remote.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Portfolio Turnover

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavor to maintain a low portfolio turnover rate.

The terms and conditions for availing the 'Step-Up SIP' shall be as follows:

1. **Option for Frequency for Step-Up SIP:**
 - a. **Half Yearly Step-Up SIP:** Under this option, the amount of investment through SIP installment shall be increased by amount chosen / designated by Investor post every 6th (sixth) SIP installment.

In case the investor fails to specify both, i.e. the frequency for Step-Up SIP and amount for Step-Up SIP, the application form may be processed as conventional SIP, subject to it being complete in all other aspects.
4. **Maximum Tenure for Step-Up SIP:** 10 year (i.e. Investors may chose / have tenure of more than 10 years under SIP, however, in such cases, feature of Step-Up SIP shall be considered and processed for a maximum of 10 years only.)

Next 6 Installments	6,000	9,000

Value Systematic Transfer Plan (Value STP):

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- (a) In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per

installment OR the amount as determined by the following formula whichever is higher:

[(First installment amount) X (Number of installments including the current installment)] less (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer).

If the amount of transfer as calculated by the above formula is less than ₹ 500, then the default amount of ₹ 500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for

the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.

(b) The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment.

From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.

(c) The minimum number of installments and amount for enrollment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th, 14th,	For STP installments greater than ₹ 500 but less than ₹999, Unitholders are required to instruct for minimum 12 transfers of ₹ 500 and in multiples of ₹ 1 thereafter. For STP installments of ₹ 1000 and above, Unitholders are required to instruct for minimum 6 transfers of ₹ 1000 and in multiples of ₹ 1 thereafter.
Quarterly	20th, 21st, 28th	

(d) The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.

(e) In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If

STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.

(f) In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.

(g) In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.

(h) A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.

(i) Unitholder has the right to discontinue Value STP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.

(j) Value STP will be terminated/not processed under the following circumstances: (i) On marking of lien or pledge of Units in the Transferor Scheme (ii) On receipt of intimation of death of the Unitholder.

Subsequent capital appreciation, if any, will be the capital appreciation between the previous CATP date (where CATP has been successfully processed and paid) and the immediate next CATP date.

The key features of CATP are mentioned below:

(a) CATP is offered at Monthly and Quarterly intervals. In case none of the

frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.

(b) The minimum amount required to trigger instalment under CATP is ₹ 1 and in multiples of ₹ 1 thereafter.

(c) A Single CATP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.

(d) Unitholder has the right to discontinue CATP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.

IV. SWITCHING**(a) Inter - Scheme Switching option**

Unit holders under the Scheme have the option to Switch part or all of their Unit holdings in the Scheme to other scheme managed by the Mutual Fund and vice versa, as per the features of the respective scheme. This Option will be useful to Unit holders who wish to alter the allocation of their investment among various scheme(s) / plan(s) of the Mutual Fund (subject to completion of lockin period, if

any, of the units of the scheme(s) from where the units are being switched) in order to meet their changed investment needs. The Switch will be effected by way of a Redemption of Units from the Scheme / Plan and a reinvestment of the Redemption proceeds in the scheme / plan and accordingly, to be effective, the Switch must comply with the Redemption rules and the issue rules of the respective scheme (for e.g. as to the minimum number of Units that may be redeemed or issued, Exit Load etc). The price at which the Units will be Switched out of the respective Scheme/ Plan will be based on the Redemption Price, and the proceeds will be invested at the prevailing sale price for units in that scheme / plan.

(b) Intra-Scheme Switching option:

Unit holders under the Scheme have the option to Switch their Unit holdings from Growth option to Dividend option or vice-versa within the same Plan offered under the Scheme. No Exit Load will be charged in respect of such Intra-Scheme Switching. The switches would be done at the applicable NAV based prices and the difference between the NAVs of the two options will be reflected in the number of units allotted.

However, switch transactions are currently not available in case of units held in electronic (demat) mode. To affect a switch, a Unit Holder must provide clear instructions. Such instructions may be provided in writing or by completing the transaction slip/form attached to the account statement. The switch request can be made for an amount equivalent or higher than the minimum application amount of the scheme into which the switch is made. A Unit holder may request switch of a specified amount or a specified number of Units only. If the Unit holder has specified both the amount and the number of Units, switch-out of units will be carried out based on the number of units specified by the Unit holder.

The Account Statement will be issued in lieu of Unit Certificates.</p> <p>Normally no Unit certificates will be issued. However, if the applicant so desires, the AMC shall issue a non-transferable Unit certificate to the applicant within 5 business days of the receipt of request for the certificate. For such declaration the Fund will announce a Record Date / Book Closure and all Unitholders whose names appear in the Register of Unit holders as on the Record Date / Book Closure shall be eligible to be issued such Bonus Units. These Units will be pari-passu with the original Units. Bonus Units so issued will be credited to the Unit holders' account in the respective Plans / Option. Pursuant to allotment of Bonus Units, the per Unit NAV of the respective Plans/Options would fall in proportion to the Bonus Units. The issue of such Units will increase the number of Units held by the Unit holder in the Plans /Options of the Scheme and so also the total number of Units outstanding in the Plans /Options of the Scheme. Fresh account statements and/or confirmations will be sent to all Unit holders after the allotment of bonus units in accordance with applicable SEBI regulations from time to time.</p>
<p>Dividend</p>	<p>The dividend warrants shall be dispatched to the unitholders within 30 days of the date of declaration of the dividend. However, in cases of holding specified as 'Anyone or Survivor', any of the Unit holders will have the power to make Redemption request, without it being necessary for all the Unit holders to sign. However, in all cases, the Redemption proceeds will be paid only to the first named holder.</p> <p>In case an investor has purchased Units of a scheme of Birla Sun Life Mutual Fund on more than one Business Day (either during the New Fund Offer Period, or on an ongoing basis), the Units purchased prior in time will be redeemed/switched-out first. Thus, in case of valid application for redemption/switch-out is made by the investor, those Units of the scheme which have been held for the longest period of time will be redeemed/switched-out first i.e. on a First-in-First-Out basis.</p> <p>However, where Units under a Scheme are held under both Regular and Direct Plans and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number), failing which the request would be processed from the Regular Plan. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan.</p> <p>The Redemption would be permitted to the extent of clear credit balance in the Unit holder's account. The Redemption request can be made by specifying the rupee amount or by specifying the number of Units to be redeemed. However, in case of units held in electronic (demat) mode, the redemption request can be given only in number of Units. Also Switch transactions are currently not available in case of units held in electronic (demat) mode. The minimum amount of Redemption may be changed in future by the AMC. If the balance in the account of the Unit holder does not cover the amount of Redemption request, then the Mutual Fund is authorised to close the account of the Unit holder and send the entire such (lesser) balance to the Unit holder.</p> <p>AMC will endeavor to credit the redemptions payouts directly to the designated Bank A/c of the unitholder through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit). D. COMPUTATION OF NET ASSET VALUE

The Net Asset Value (NAV) per Unit of the scheme will be computed by dividing the net assets of the scheme by the number of Units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI Regulations, or such norms as may be specified by SEBI from time to time.

In calculating net assets of Birla Sun Life Gold Fund, the value of units of underlying scheme (Birla Sun Life Gold ETF) shall be based on its closing market price on the principal exchange. In case the units of the underlying scheme are not traded on any stock exchange on any particular business day then the valuation of the units of the underlying scheme shall be derived based on the NAV of the underlying scheme in accordance with the valuation policy.

NAV of Units under the scheme shall be calculated as shown below:

$$\begin{aligned} & \text{Market or Fair Value of the scheme's Investments} \\ & + \text{Current Assets (including accrued income)} \\ & - \text{Current Liabilities and Provisions (including accrued expenses)} \end{aligned}$$

$$\text{NAV (₹) per Unit} = \frac{\text{Market or Fair Value of the scheme's Investments} + \text{Current Assets (including accrued income)} - \text{Current Liabilities and Provisions (including accrued expenses)}}{\text{No. of Units outstanding under the scheme}}$$

The NAVs of the Scheme will be calculated upto four decimals and units will be allotted upto 3 decimals.

Section IV – FEES AND EXPENSES

This section outlines the expenses that will be charged to the Scheme and also about the transaction charges, if any, to be borne by the investors. The information provided under this Section seeks to assist the investor in understanding the expense structure of the Scheme and types of different fees / expenses and their percentage the investor is likely to incur on purchasing and selling the Units of the Scheme.

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationery, bank charges etc. In case of Scheme where entry load was charged during the NFO, the same was utilized for meeting the initial issue expenses in terms of SEBI circular No. SEBI/IMD/CIR No.1/64057/06 dated April 4, 2006, and any expenditure over and above the entry load collected was borne by the AMC. In case of Scheme where no entry load was charged, entire expenses were borne by AMC.

B. ANNUAL SCHEME RECURRING EXPENSES
