However, it must be distinctly understood that actual declaration of dividends and frequency thereof is at the discretion of trustees. There is no assurance or guarantee to Unitholders as to the rate of dividend distribution nor that the dividends will be paid regularly. The dividends shall be paid in the name of the sole / first holder and, if applicable, will be posted to the Registered Address of the sole / first holder in the original application form. Reinvestment of dividend shall constitute a constructive payment of dividends to the unitholders and a constructive receipt of the same amount from each unitholder for reinvestment in units. On reinvestment of dividends, the number of units to the credit of the unitholders will increase to the extent of the dividend reinvested divided by the applicable NAV as explained above. There shall, however, be no entry/sales load on the dividends so reinvested.

Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Infrastructure Fund is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

- The investments under the scheme are oriented towards equity & equity related securities of companies belonging to the infrastructure industries and hence will be affected by risks associated with the infrastructure industries. The performance of the companies, which form the investment universe of this scheme, would be affected by the growth and performance of the infrastructure sector in the country.

- As the scheme may hold securities that are not in the Nifty 50 TRI and may invest in limited number of sectors with higher concentration in certain sectors and industries, it may perform differently from the general stock markets.

Risks associated with investment in Equity and Equity related instruments:

- Equity and Equity related securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- In respect of investments in equity and equity-related instruments, there may be risks associated with trading volumes, settlement periods and transfer procedures that may restrict liquidity of investments in equity and equity-related securities. In the event of inordinately large number of redemptions or of a restructuring of the schemes' investment portfolio, there may be delays in the redemption of units.
- Within the regulatory limits, the Fund Manager may choose to invest in unlisted securities that offer attractive yields. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. This may however increase the risk of the portfolio. The liquidity and valuation of the schemes' investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of disinvestments.
- Investment made in unlisted equity or equity-related securities may only be realizable upon listing of these securities. Settlement problems could cause the Scheme to miss certain investment opportunities.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment may not get implemented instantly.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Factors associated with investments in Foreign Securities:

- Investments in International (overseas) securities including Exchange Traded Funds involves increased risk and volatility, not typically associated with domestic investing, due to changes in currency exchange rates, foreign government regulations, differences in auditing and accounting standards, potential political and economic instability, limited liquidity, and volatile prices. Further, risks associated with introduction of extraordinary exchange control, economic deterioration, and changes in bi-lateral relationships.
- To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.
- **Currency Risk:** The schemes may invest in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.
- **Country Risk:** The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.
- The Scheme(s) may also invest in Foreign Securities as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the Schemes may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as all other restrictions on investments as applicable.

Risk Factors associated with investments in Derivatives:

- As and when any Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place.
- The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.
- The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

- Risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potential high volatility of the futures markets.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with investments in Securitised Debt:

Domestic securitised debt assets would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The Securitised debt assets and the underlying asset classes like housing loans, Auto Loans and Corporate loans have the following risk factors.

- **Limited Recourse and Credit Risk:** Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.
- **Bankruptcy Risk:** If the originator of securitised debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- **Risk of Co-mingling:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risks associated with Mortgage Backed Securities (MBS) - Housing Loans

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.
 - **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
 - **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

Risks associated with Asset Backed Securities (ABS)-Auto Loans.

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayments in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

Risks associated with Asset Backed Securities (ABS) – Corporate Loans

- **Credit Risk:** The fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the Borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.

- **Prepayment Risk:** The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the fund.
- **Limited Liquidity and Price Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

Risks associated with Stock Lending:

There are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Risks factors associated with Short Selling: The Scheme will not engage in Short Selling activities.

B. RISK CONTROL STRATEGIES

Investments made by the scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. The overall portfolio structuring would aim at controlling risks at a moderate level. Both very aggressive and very defensive postures would be avoided. Stock specific risk will be minimised by investing only in those companies that have been thoroughly evaluated by ABSLAMC's investment team. Risk will also be managed through broad diversification of portfolio within the framework of the abovementioned investment objectives. Macroeconomic risk will be addressed through focus and ongoing review of relevant businesses and economic environment. Liquidity would be an important consideration of investment decisions, due to potential of large redemptions inherent in an open ended scheme. As a result, a reasonable portion of the portfolio will be invested in liquid counters.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by RBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

- Changes in Government Policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each unitholder is advised to consult his / her own professional tax advisor.
- The NAV of the scheme may be affected by changes in the general market conditions, factors and forces affecting capital market in particular, level of interest rates, various market related factors, settlement periods and transfer procedures.
- A Unitholder may invest in the schemes and acquire a substantial portion of the scheme units. The repurchase of units by the Unitholder may have an adverse impact on the units of the schemes, because the timing of such repurchase may impact the ability of other Unit holders to repurchase their units.
- Mutual Funds are vehicles of securities investments that are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors that impact the value of the Scheme' investments include, but are not restricted to, fluctuations in the bond markets, fluctuations in

interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.

The funds managed by these affiliates/associates may acquire a substantial portion of the Scheme's Units and collectively constitute a major investment in the Scheme. Accordingly, Redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such Redemption and may affect the ability of other Unit Holders to redeem their respective Units.
- Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times and that the decisions made by the fund manager may not always be profitable. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.

- Growth, appreciation, dividend, bonus, income, etc if any, referred to in this Document are subject to the tax laws and other fiscal enactments as they exist from time to time.

The Riskometer categorizes the schemes of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the schemes falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing.

Section II – INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

Aditya Birla Sun Life Infrastructure Fund is an open ended equity scheme investing in the Infrastructure sector.

B. INVESTMENT OBJECTIVE

The scheme seeks to provide medium to long-term capital appreciation, by investing predominantly in a diversified portfolio of equity and equity related securities of companies that are participating in the growth and development of Infrastructure in India.

C. ASSET ALLOCATION AND INVESTMENT PATTERN

Under normal circumstances, the asset allocation pattern shall be as under:

Instrument	Range	(% age of investible corpus)	
		Normal Allocation	Risk Profile
Equity and Equity related Instruments	80%-100%	90%	Medium to High
Money Market Instruments	0%-20%	10%	Low to Medium

- The scheme may also invest in derivative instruments upto 50% of the net assets of the scheme for the purpose of hedging and portfolio balancing and other uses as may be permitted by SEBI. As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- If permitted by SEBI under extant regulations/guidelines, the scheme may also engage in stock lending subject to a maximum of 25%, in aggregate, of the net assets of the scheme and in case of a single intermediary. There can be temporary illiquidity of the securities that are lent out and the Scheme may not be able to sell such lent-out securities, resulting in an opportunity loss. In case of a default by counterparty, the loss to the Scheme can be equivalent to the securities lent.
- The scheme may invest upto 25% of its net assets in ADRs/GDRs and equities of listed overseas companies, which in the judgment of the Asset Management Company are eligible for investment as part of the scheme's portfolio and is consistent with the investment strategy, subject to the investment restrictions specified by SEBI / RBI from time to time.

Change in Asset Allocation

The above mentioned investment pattern is indicative and may change for short duration.

Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

The Scheme intends to participate in derivatives trading within the equity component of their portfolios. Some of the strategies involving derivatives that may be used by the Investment Manager, with an aim to protect capital and enhance returns include:

Strategy Number 1: Hedging against an anticipated rise in equity prices. The scheme has a corpus of Rs. 100 crores and has invested Rs. 65 crores in equity and still has a cash of Rs.15 crores available to invest in the equity component. The Fund may buy index futures of a value of Rs.15 crores. The scheme may reduce the exposure to the future contract by taking an offsetting position as investments are made in the equities the scheme wants to invest in. Here, if the market rises, the scheme gains by having invested in the index futures.

Event	Gain/(Loss) from Derivatives position	Gain/(Loss) from Cash Market position	Overall Gain/(Loss) to Equity Component of Scheme
5% rise in equity price	$15 * 5\% = \text{Rs. } 0.75 \text{ crs}$	$65 * 5\% = \text{Rs. } 3.25 \text{ crs}$	Rs. 4 Crores
5% fall in equity price	$15 * 5\% = \text{Rs. } (0.75) \text{ crs}$	$65 * 5\% = \text{Rs. } (3.25) \text{ crs}$	Rs. (4) Crores

Strategy Number 2: Hedging against anticipated fall in equity prices. If the Fund has a negative view on the market and would not like to sell stocks, as the market might be weak, the scheme of the Fund can go short on index/stock futures. Later, the scheme can sell the stocks and unwind the future positions. A short position in the future would offset the long position in the underlying stocks and this can curtail potential loss in the portfolio. For instance: The scheme has a corpus of Rs. 100 crores and is 65% invested in equities. If the fund manager wishes to reduce the equity exposure to Rs. 30 crores, he would sell index/stock future contracts of Rs. 35 crores.

Event	Gain/(Loss) from Derivatives position	Gain/(Loss) from Cash Market position	Overall Gain/(Loss) to Scheme
5% fall in equity price	$35 * 5\% = \text{Rs. } 1.75 \text{ crs.}$	$65 * 5\% = \text{Rs. } (3.25) \text{ crs}$	Rs. (1.5) Crores
5% rise in equity price	$35 * 5\% = \text{Rs. } (1.75) \text{ crs.}$	$65 * 5\% = \text{Rs. } 3.25 \text{ crs}$	Rs. 1.5 Crores

Strategy Number 3: Using Index Futures to increase percentage investment in equities. This strategy will be used for the purpose of generating returns on idle cash, pending its investment in equities. The Scheme being open

ended in nature upon conversion and maybe subject to daily inflows. There may be a time lag between the inflow of funds and their deployment in equities. If so desired, the AMC would be able to take immediate exposure to equities via index futures. The position in index futures may be reversed in a phased manner, as the funds are deployed in the equity markets.

The scheme has a corpus of Rs. 75 crore and there is an inflow of Rs. 5 crore in a day. The AMC may buy index futures contracts of a value of Rs. 5 crore. Later as the money is deployed in the underlying equities, the value of the index futures contracts can be suitably reduced.

Equity Allocation	Event	Equity Portfolio Gain/(Loss) (Rs. in crore)	Derivative Gain / (Loss) (Rs. in crore)	Total Portfolio Gain / (Loss) (Rs. in crore)
Rs. 50 Crore Equity exposure	10% rise in equity prices	5	Nil	5
Rs. 50 Crore Equity exposure + Rs. 5 Crore long position index futures	10% rise in equity prices	5	0.5	5.5
Rs. 50 Crore Equity exposure	10% fall in equity prices	(5)	Nil	(5)
Rs. 50 Crore Equity exposure + Rs. 5 Crore long position index futures	10% fall in equity prices	(5)	(0.5)	(5.5)

RISKS

- The strategy of taking a long position in index futures increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.
- The long position will have as much loss as a gain in the underlying index. e.g. if the index appreciates by 10%, the future value rises by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain / loss due to the movement of the underlying index. This is called the basis risk.
- While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

Strategy Number 4: Using Index Futures to decrease percentage investment in equities.

Similarly, in the case of a pending outflow of funds the AMC, in order to reduce exposure in equities may enter into futures contracts to sell the Index at a future date. This position can be unwound over a period in time by simultaneously selling the equity shares from the investment portfolio of the Scheme. Since the price of the futures contracts is expected to be positively correlated with the index, the value of a short position will move in the direction opposite to the movement in the index. The strategy of taking a short position in the index future would reduce the market exposure, in line with the reduced net assets, in case of a significant redemption.

Example:

Assume a scheme has an equity exposure of Rs. 50 crore. If the Fund Manager wishes to reduce the equity exposure to Rs. 40 crore in a short time, he would sell index futures contracts of a value of Rs.10 crore.

Portfolio	Event	Equity Portfolio Gain / (Loss) (Rs. in Crore)	Derivative Gain / (Loss) (Rs. in Crore)	Total Portfolio Gain / (Loss) (Rs. in Crore)
Rs. 50 Crore Equity exposure	10% fall in equity prices	(5)	Nil	(5)
Rs. 50 Crore Equity exposure + Rs. 10 Crore short position index futures	10% fall in equity prices	(5)	1	(4)
Rs. 50 Crore Equity exposure	10% rise in equity prices	5	Nil	5
Rs. 50 Crore Equity exposure + Rs. 10 Crore short position index futures	10% rise in equity prices	5	(1)	4

RISKS

- The strategy of taking a short position in index futures reduces the market exposure. The short position is negatively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not be a perfect hedge.
- The short position will have as much loss as a gain in the underlying index. e.g. if the index appreciates by 10%, the future value falls by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain / loss due to the movement of the underlying index. This is called the basis risk.
- While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

Strategy Number 5: Portfolio Protection Using Index Put

The purchase of an index put option gives the scheme the option of selling the index to the writer of the put at a predetermined level of the index, called the strike price. If the index falls below this level, the scheme benefits from the rise in the value of the put option.

Similarly, as a stock hedging strategy, the purchase of a put option on the underlying stock would give the scheme the option to sell the stock to the writer of the option at the predetermined strike price. This would lead to a capping of the loss in value of a stock.

Example:

Let us assume a scheme with a corpus of Rs. 75 crore. Let us also assume an index level of 1000. The scheme is invested 50 crore in equities. The scheme purchases a put option on the index with a strike price of Rs. 950 for an assumed cost of Rs. 50 lakhs.

The following table illustrates the portfolio returns:

% change in Index	Index Value	Equity Portfolio Value Rs. in crore (A)	Option Value Rs. in crore (B)	Cost of the Put Option Rs. in crore (C)	Portfolio Value Rs. in crore (A+B+C)	% Returns from portfolio
10	1100	55.00	0	(0.5)	54.50	9
5	1050	52.50	0	(0.5)	52.00	4
(5)	950	47.50	0	(0.5)	47.00	(6)
(10)	900	45.00	2.5	(0.5)	47.00	(6)
(15)	850	42.50	5	(0.5)	47.00	(6)

A similar put option can be purchased on any individual stock and the downside may be capped.

RISKS

- The table shows that the portfolio value will not fall below Rs. 47 crore, while the scheme benefits from any increase in stock prices. The table assumes perfect correlation between the equity portfolio and the index. However, this may not be the case. Therefore, the minimum portfolio value cannot be assured, but the loss is expected to be lower in a portfolio with a put option on the index, as compared to a normal portfolio.
- The put option would lead to a gain based on the difference between the strike price and the index level at expiration date, if positive. However, in case the option is reversed before the expiration date, the market price received on the sale of the option may be different from the price calculated.
- While options markets can be more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the scheme to purchase or close out a specific options contract.
- In the case of purchase of a stock put, the strategy is a perfect hedge on the expiration date of the put option. On other days, there may be (temporary) imperfect correlation between the share price and the put option, which can potentially take the stock value below the minimum under the hedge.

Strategy Number 6: Using Alpha Strategy

The fund will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying an IT stock and selling Nifty IT Index future or a bank stock and selling Bank Index futures or buying a stock and selling the Nifty Index. The objective of the strategy is to generate alpha by superior stock selection and removing market risks by hedging with appropriate index.

For instance: The scheme has a corpus of Rs. 100 crores and is 65% invested in equities. Of the equity component, the fund manager has 5% exposure to. The scheme takes an offsetting position by making investments Nifty IT index future. Here, the different market scenarios are illustrated in the table below:-

Event	Gain/(Loss) from Derivatives position	Gain/(Loss) from Cash Market position	Absolute Gain
10% fall in stock price & 5% fall in index price	$3.25 * 5\% = \text{Rs. } (0.1625) \text{ crs.}$	$3.25 * 10\% = \text{Rs. } (0.325) \text{ crs}$	(0.1625)
10% fall in index price & 5% fall in stock price	$3.25 * 10\% = \text{Rs. } (0.325) \text{ crs.}$	$3.25 * 5\% = \text{Rs. } (0.1625) \text{ crs}$	0.1625
10% rise in stock price & 5% rise in index price	$3.25 * 5\% = \text{Rs. } 0.1625 \text{ crs.}$	$3.25 * 10\% = \text{Rs. } 0.325 \text{ crs.}$	0.4875
10% rise in index price & 5% rise in stock price	$3.25 * 10\% = \text{Rs. } 0.325 \text{ crs.}$	$3.25 * 5\% = \text{Rs. } 0.1625 \text{ crs.}$	0.4875
10% rise in index price & 10% rise in stock price	$3.25 * 10\% = \text{Rs. } 0.325 \text{ crs.}$	$3.25 * 10\% = \text{Rs. } 0.325 \text{ crs.}$	0.65

Risk Associated with this Strategy

- The stock selection under this strategy may under-perform the market and generate a negative alpha.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

These may be

across the above-mentioned sectors or other areas of Infrastructure as may be identified by the Scheme. A combination of the top down approach and bottom up approach will be followed in the stock selection process. The top down approach will focus on an analysis of macro economic factors, economic changes & trends, key policy changes, infrastructure spending, etc. The bottom-up approach would seek to identify companies with high profitability and scalability supported by sustainable competitive advantages. The performance of this scheme will be compared with its peers in the Industry. The performance will be placed before the Investment Committee as well as the Board of Directors of the AMC and the Trustee Company in each of their meetings.

Rationale for adoption of benchmark:

The index is designed to reflect the market behaviour and performance of companies that represents infrastructure sector such as power, port, air, roads, railways, shipping and other utility services providers. NIFTY Infrastructure TRI is computed using free float market capitalization method, wherein the level of the index reflects the total free float market value of all the stocks in the index relative to particular base market capitalization value. Value Systematic Transfer Plan (Value STP):

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Aditya Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- a. In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per installment OR the amount as determined by the following formula whichever is higher:

[(First installment amount) X (Number of installments including the current installment)] less (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer).

If the amount of transfer as calculated by the above formula is less than Rs. 500, then the default amount of Rs.500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.

- b. The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment.
- c. From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.
- d. The minimum number of installments and amount for enrollment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th, 14th, 20th, 21st, 28th	For STP installments greater than Rs. 500 but less than Rs. 999, Unitholders are required to instruct for minimum 12 transfers of Rs.500 and in multiples of Rs. 1 thereafter.
Quarterly		

- e. The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.
- f. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If
- g. STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.
- h. In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- i. In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.
- j. A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.
- k. Unitholder has the right to discontinue Value STP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the

offices of the Fund or its Authorised Collection Centres.

The key features of CATP are mentioned below:

In the event of failure of dispatch of dividend within the stipulated 30 day period, the AMC shall be liable to pay interest @ 15 per cent per annum to the unit holders for the period of such delay.</p> <p>AMC will endeavor to credit the dividend payouts directly to the designated Bank A/c of the unitholders of Aditya Birla Sun Life Mutual Fund schemes through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit / NECS). AMC reserves the right to use any of the above mode of payment as deemed appropriate for all folios where the required information is available.</p>
Redemption	<p>Redemption or repurchase proceeds shall be dispatched to the unitholders within 10 working days from the date of redemption or repurchase.</p> <p>The Units can be Redeemed (i.e. sold back to the Mutual Fund) or Switched-out on every Business Day at the Redemption Price. The Redemption / Switch-out request can be made by way of a written request / pre-printed form / relevant tear off section of the Transaction Slip enclosed with the Account Statement, which should be submitted at / may be sent by mail to any of the ISCs.</p> <p>In case an investor has purchased Units of the Scheme on more than one Business Day (either during the New Fund Offer Period, or on an ongoing basis), the Units purchased prior in time will be redeemed/switched-out first. Thus, in case of valid application for redemption/switch-out is made by the investor, those Units of the scheme which have been held for the longest period of time will be redeemed/switched-out first i.e. on a First-in-First-Out basis.</p> <p>However, where Units under a Scheme are held under both Regular and Direct Plans and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number), failing which the request would be processed from the Regular Plan. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan.</p> <p>The Redemption would be permitted to the extent of clear credit balance in the Unit holder's account. The Redemption request can be made by specifying the rupee amount or by specifying the number of Units to be redeemed. If a Redemption request is for both, a specified rupee amount and a specified number of Units, the specified number of Units will be considered the definitive request. If only the Redemption amount is specified by the Unit holder, the AMC will divide the Redemption amount so specified by the Redemption Price to arrive at the number of Units. The request for Redemption of Units could also be in fractions, upto three decimal places. However, in case of units held in electronic (demat) mode, the redemption request can be given only in number of Units. Also Switch transactions are currently not available in case of units held in electronic (demat) mode. The minimum amount of Redemption may be changed in future by the AMC. If the balance in the account of the Unit holder does not cover the amount. Redemption request, then the Mutual Fund is authorised to close the account of the Unit holder and send the entire such (lesser) balance to the Unit holder.</p> <p>In case the Units are held in the names of more than one Unit holder, where mode of holding is specified as "Joint", Redemption requests will have to be signed by all the joint holders. However, in cases of holding specified as 'Anyone or Survivor', any of the Unit holders will have the power to make Redemption request, without it being necessary for all the Unit holders to sign. However, in all cases, the Redemption proceeds will be paid only to the first named holder.</p> <p>AMC will endeavor to credit the redemptions payouts directly to the designated Bank A/c of the unitholder through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit). AMC reserves the right to use any of the above mode of payment as deemed appropriate for all folios where the required information is available. AMC/Mutual Fund, however, reserves the right to issue a cheque / demand draft inspite of an investor opting for Electronic Payout.</p> <p>Bank Details: In order to protect the interest of investors from fraudulent encashment of cheques, the current SEBI (MF) Regulations have made it mandatory for investors to mention in their application / Redemption request, the bank name and account number. Applications without these details are liable to be rejected.</p>
Delay in payment of redemption / repurchase	<p>The Asset Management Company shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @</p>

- It is assumed that the expenses charged are evenly distributed throughout the year.
- The expenses of the Direct Option under the Scheme will be lower to the extent of the above mentioned distribution expenses/ commission. The NAVs of Direct Plan and Regular Plan will be different.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.
